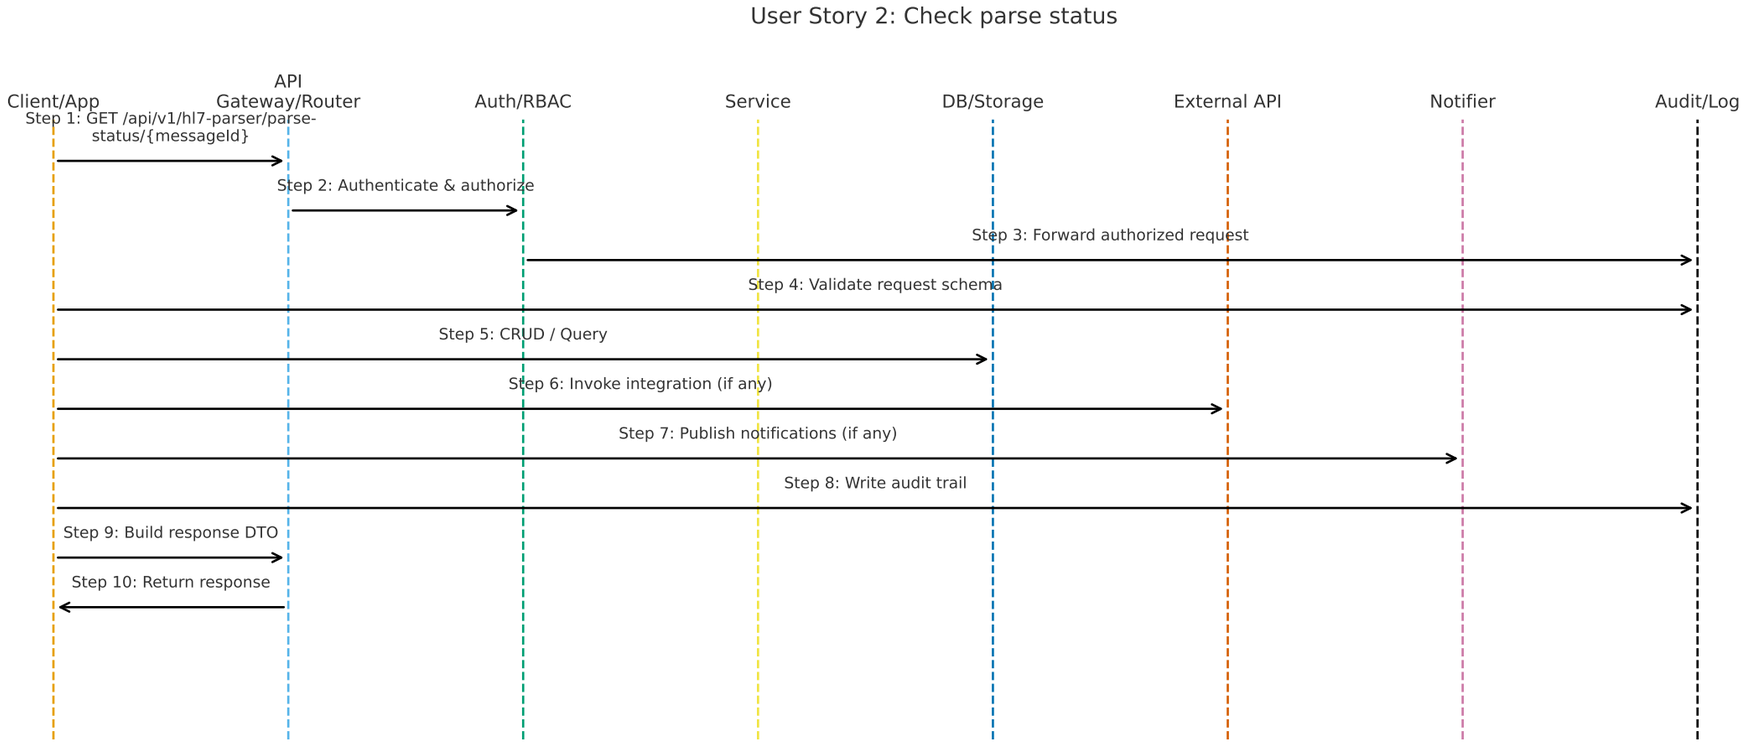
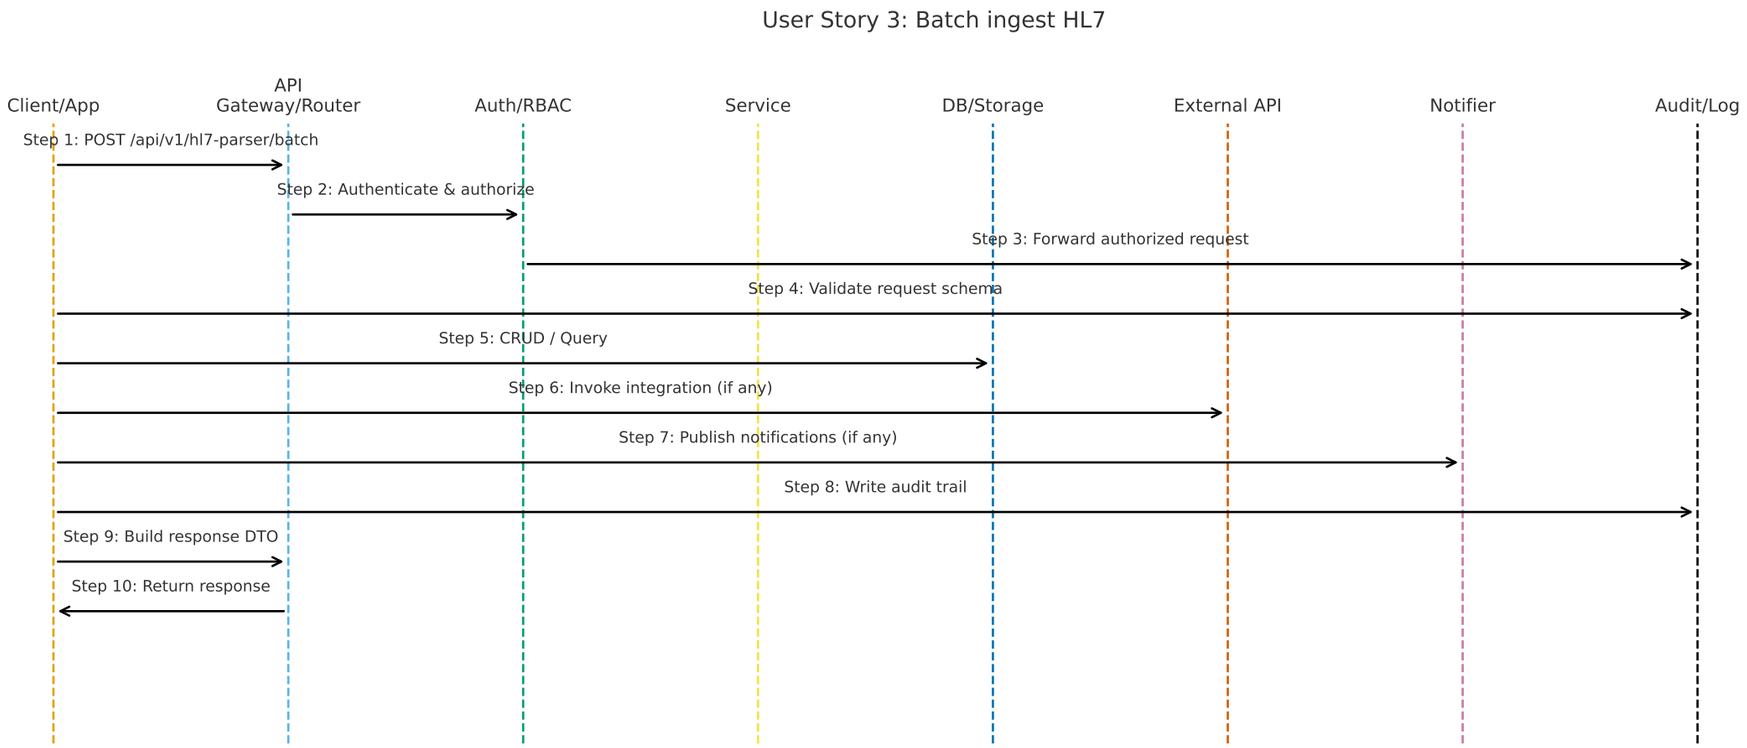
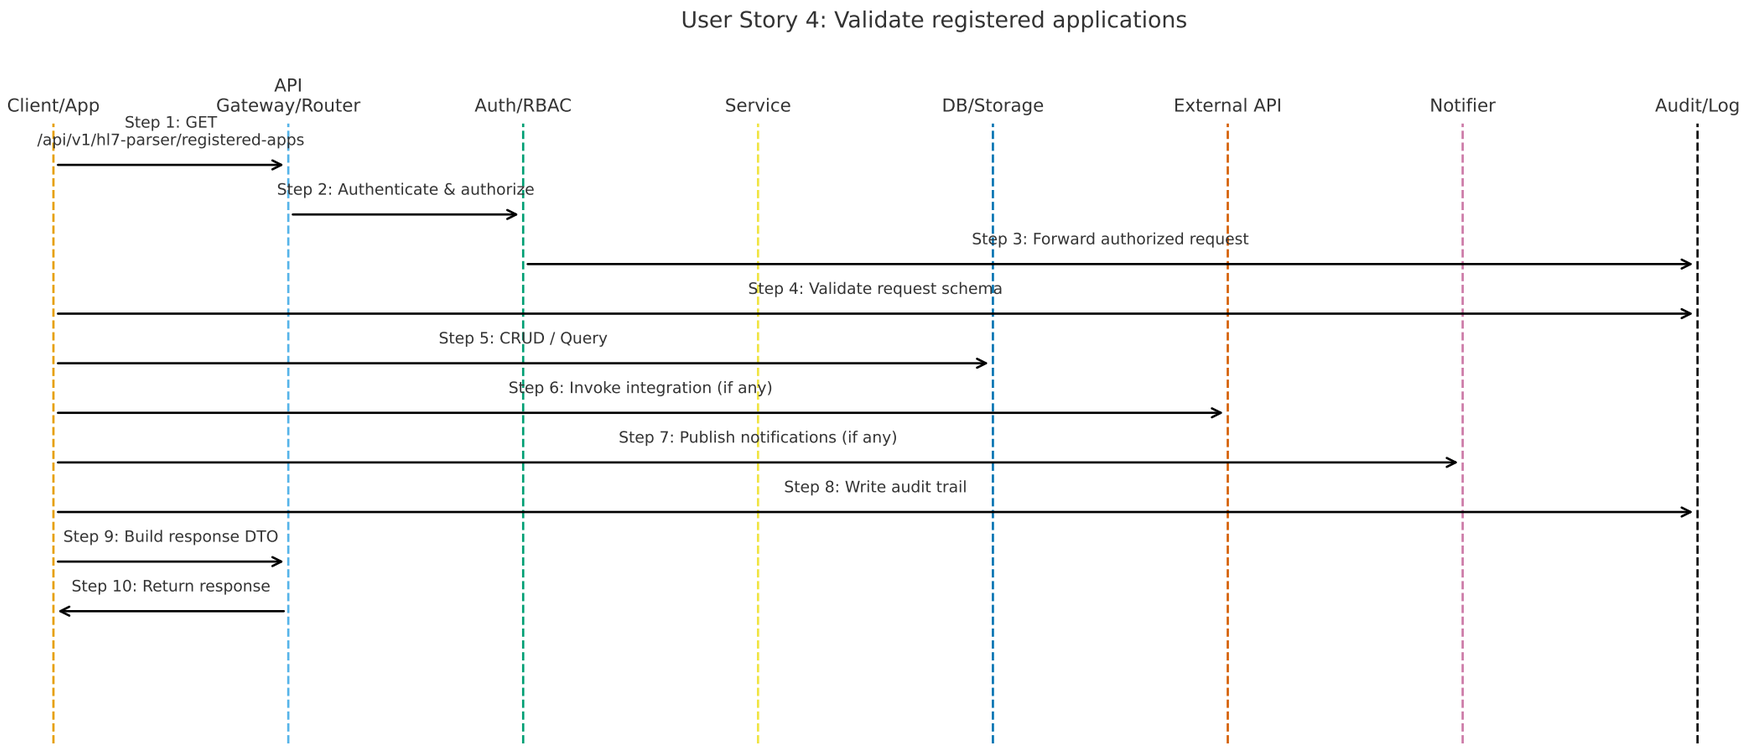
User Story 1: Ingest HL7 v2 message
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/hl7-parser/ingest
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



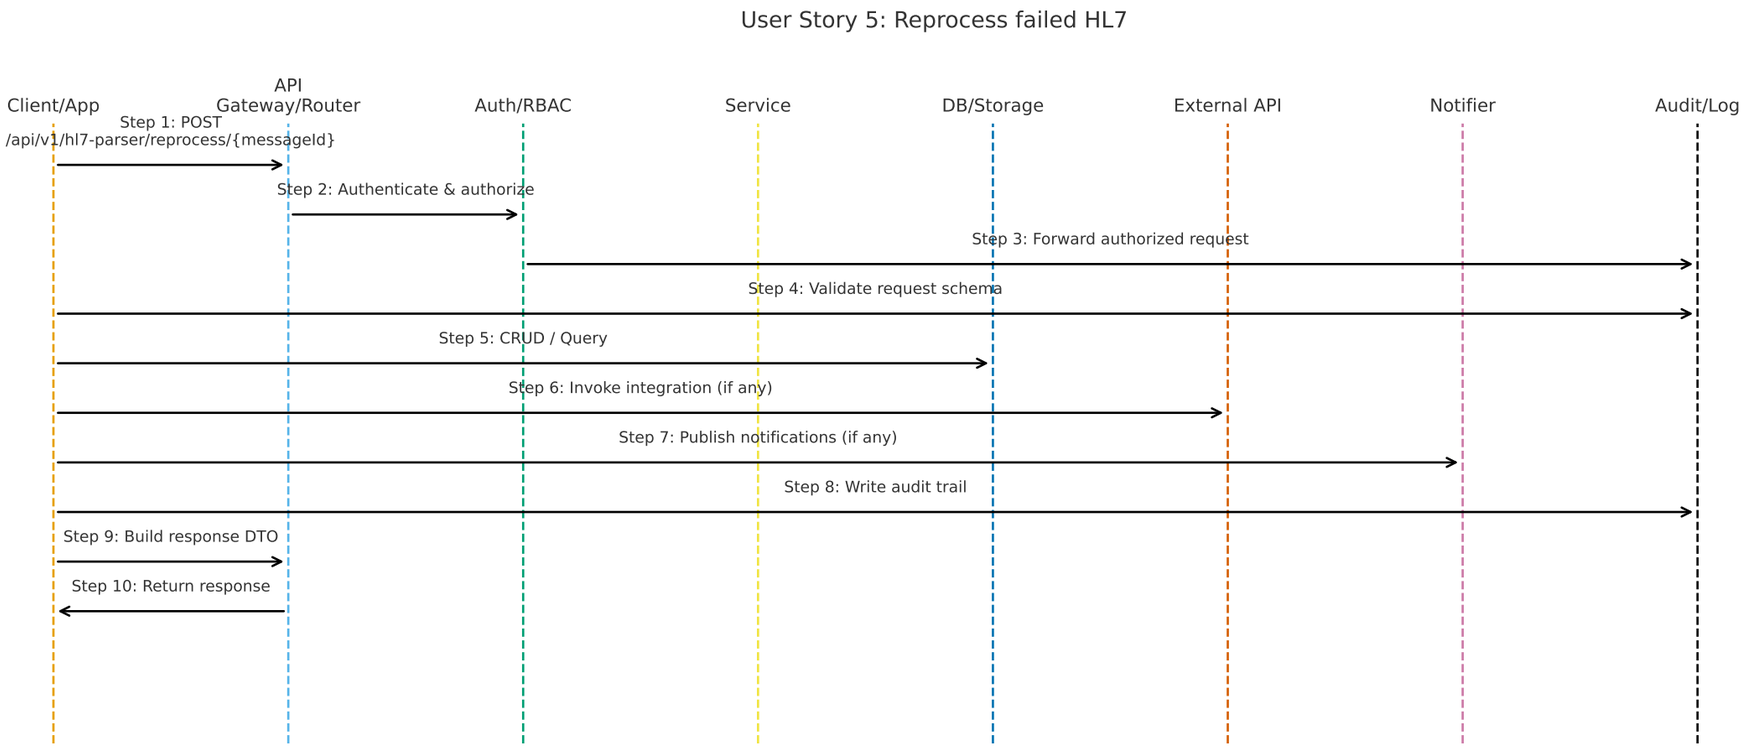
User Story 2: Check parse status
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /api/v1/hl7-parser/parse-status/{messageId}
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



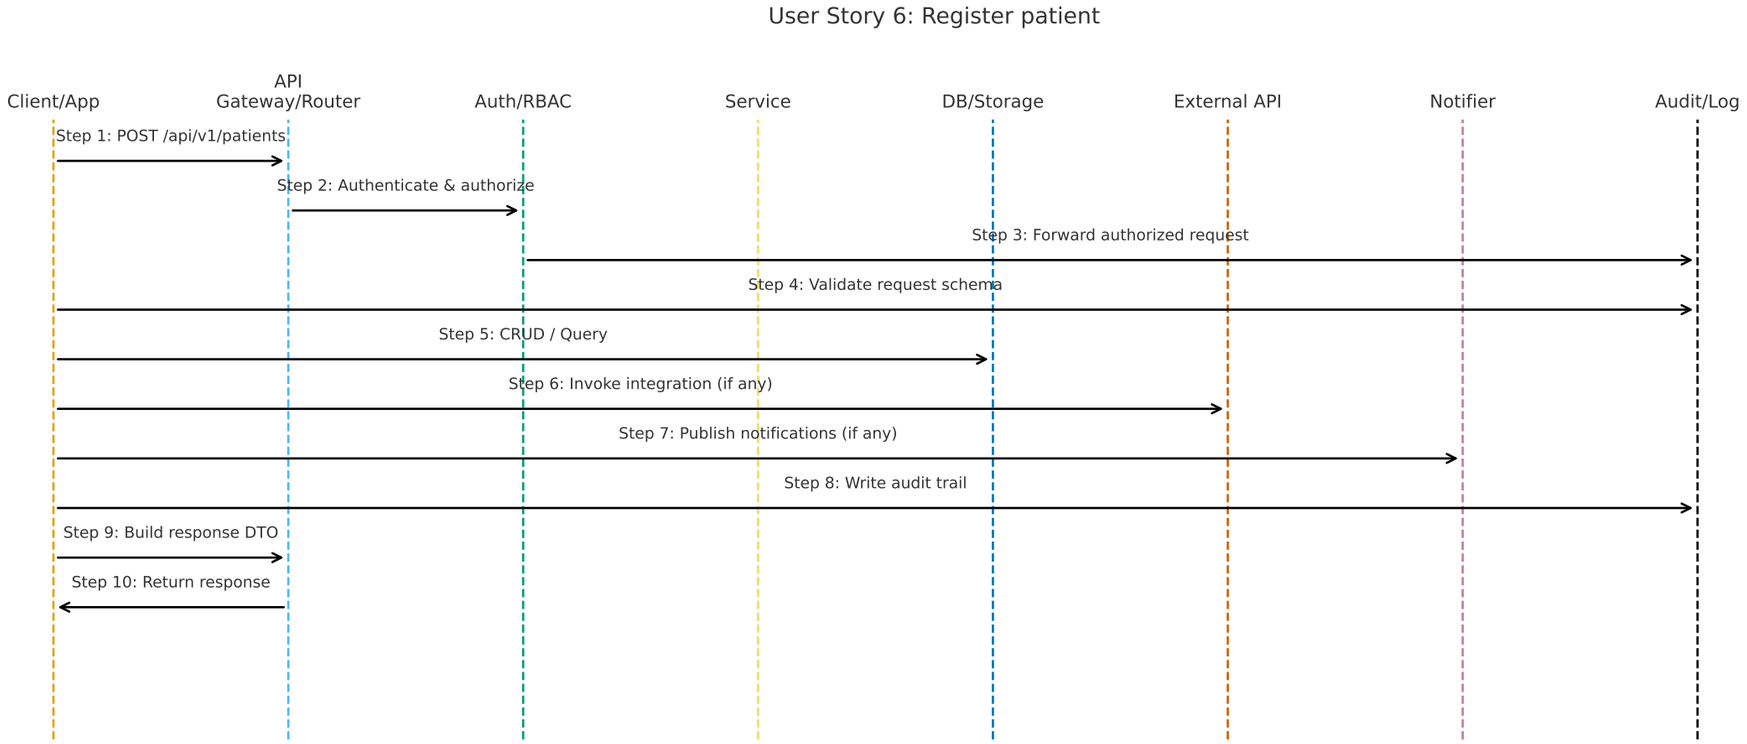
User Story 3: Batch ingest HL7
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/hl7-parser/batch
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



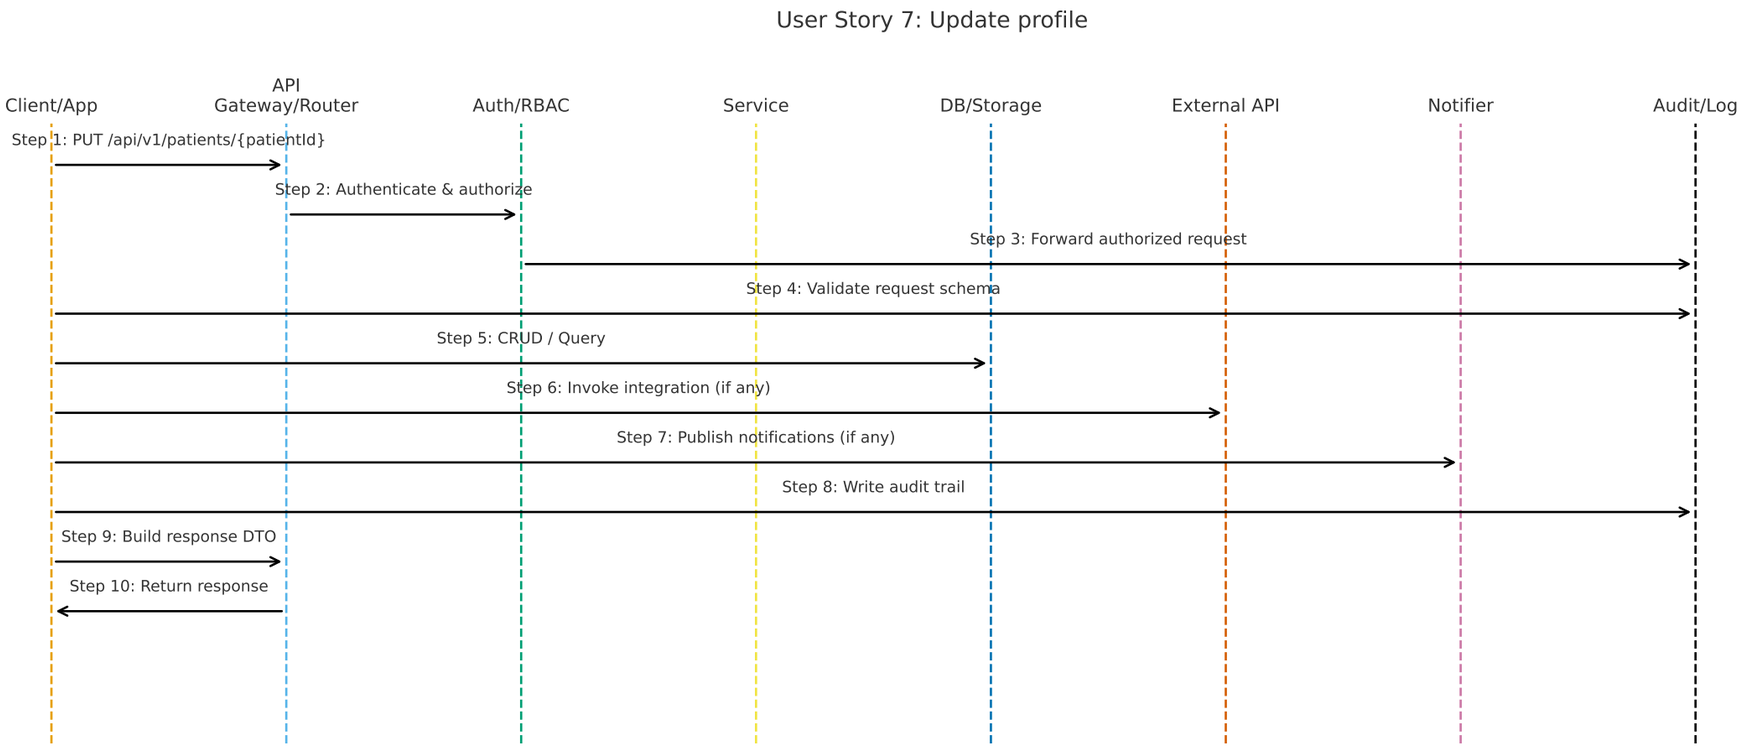
User Story 4: Validate registered applications
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /api/v1/hl7-parser/registered-apps
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



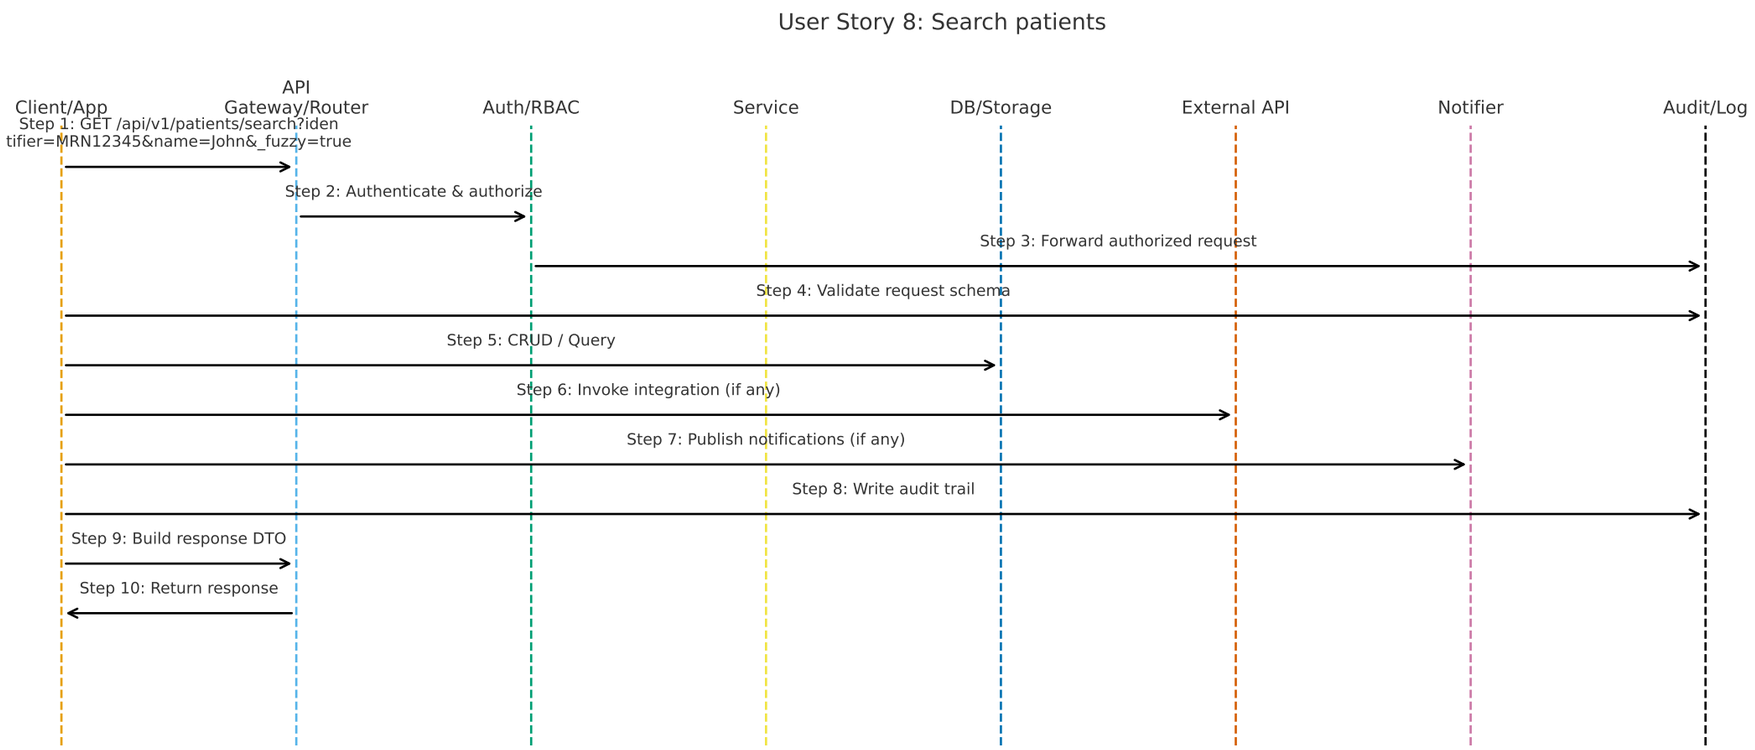
User Story 5: Reprocess failed HL7
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/hl7-parser/reprocess/{messageId}
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



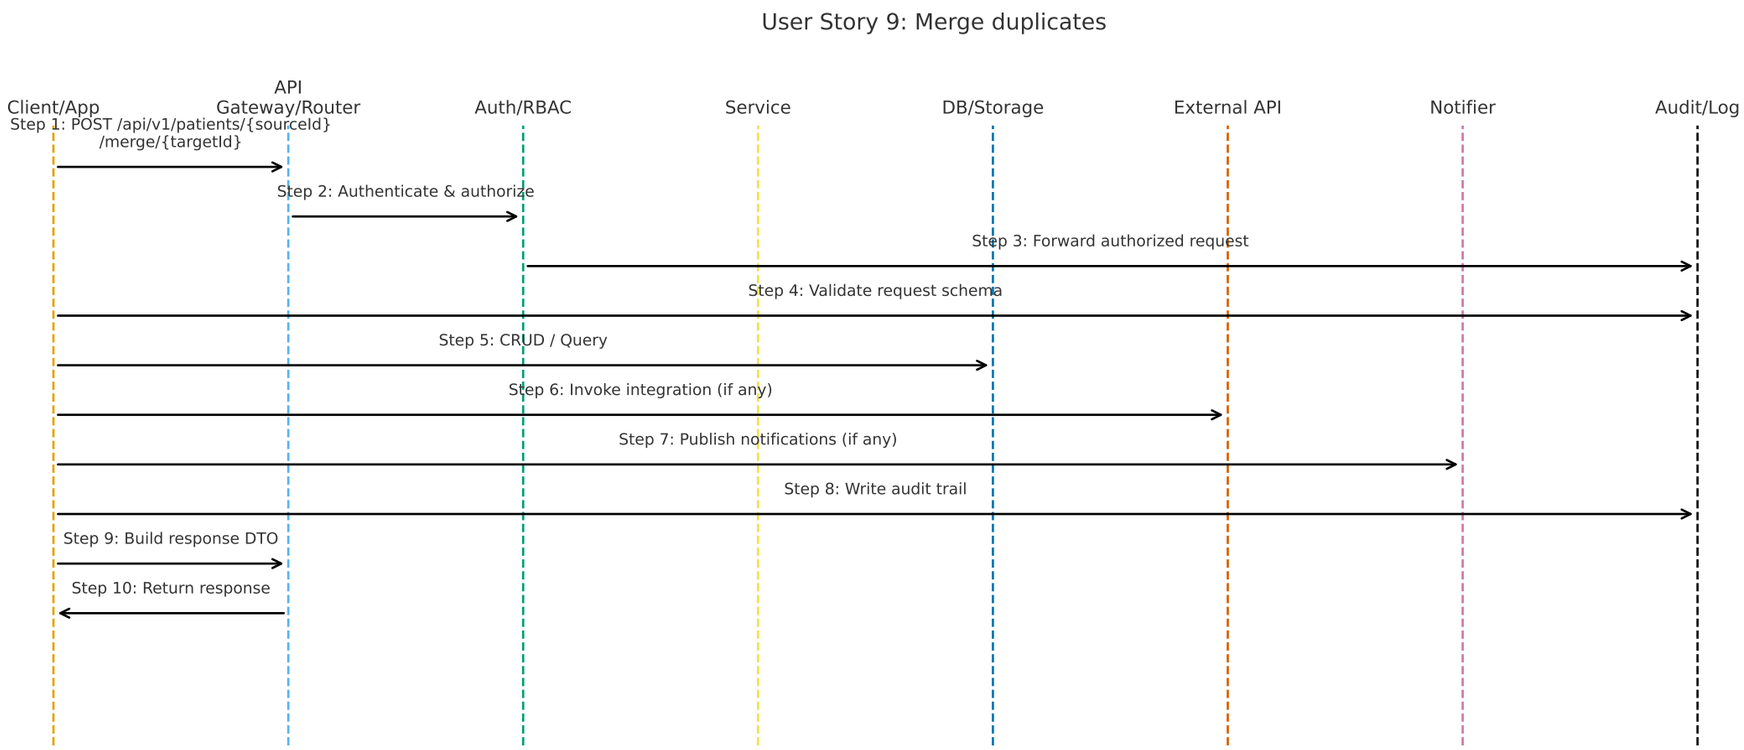
User Story 6: Register patient
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/patients
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



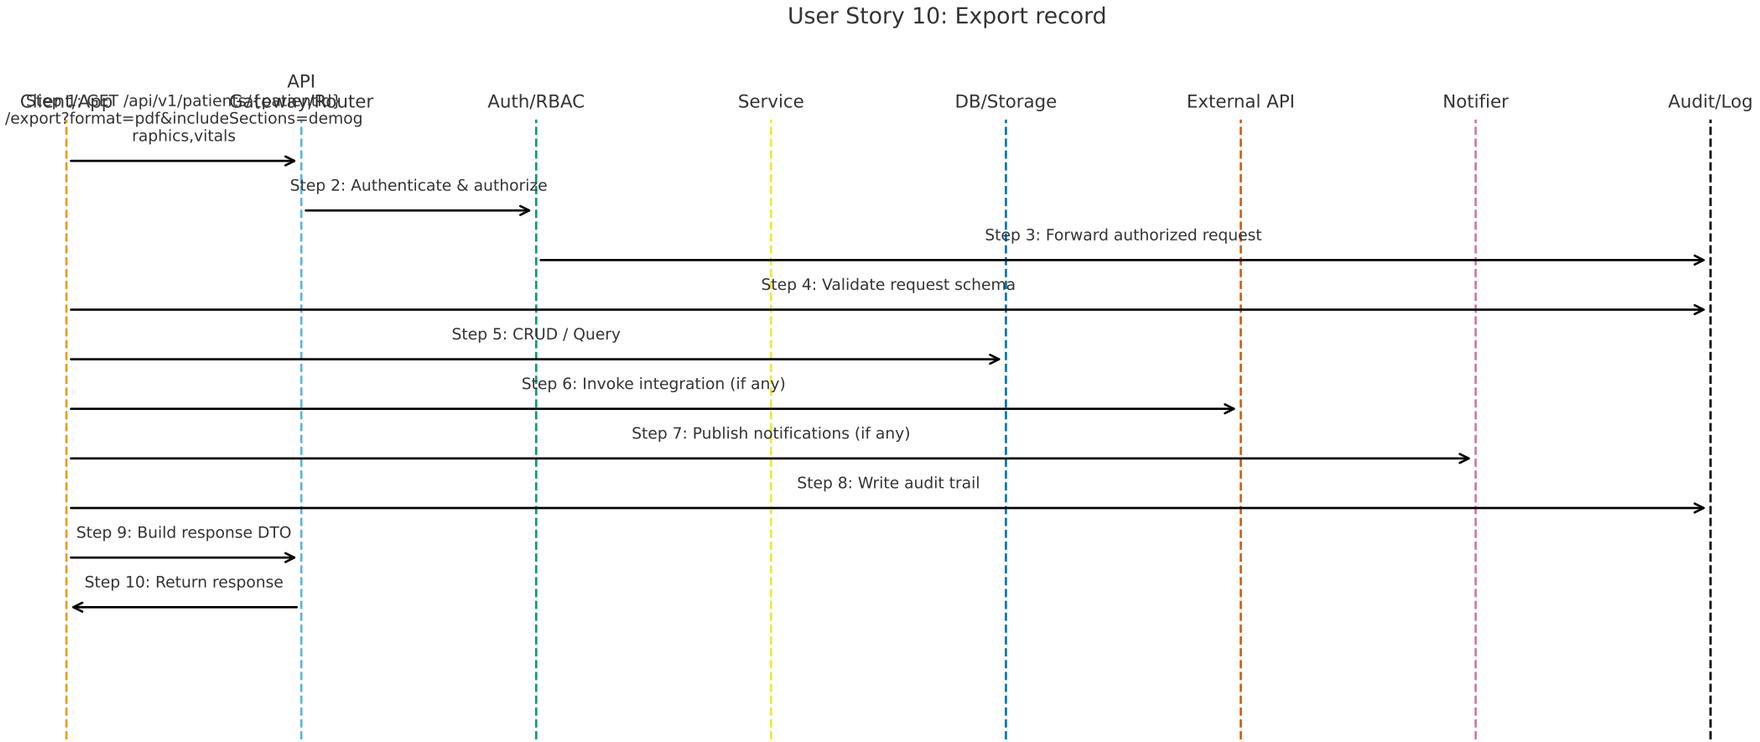
User Story 7: Update profile
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: PUT /api/v1/patients/{patientId}
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



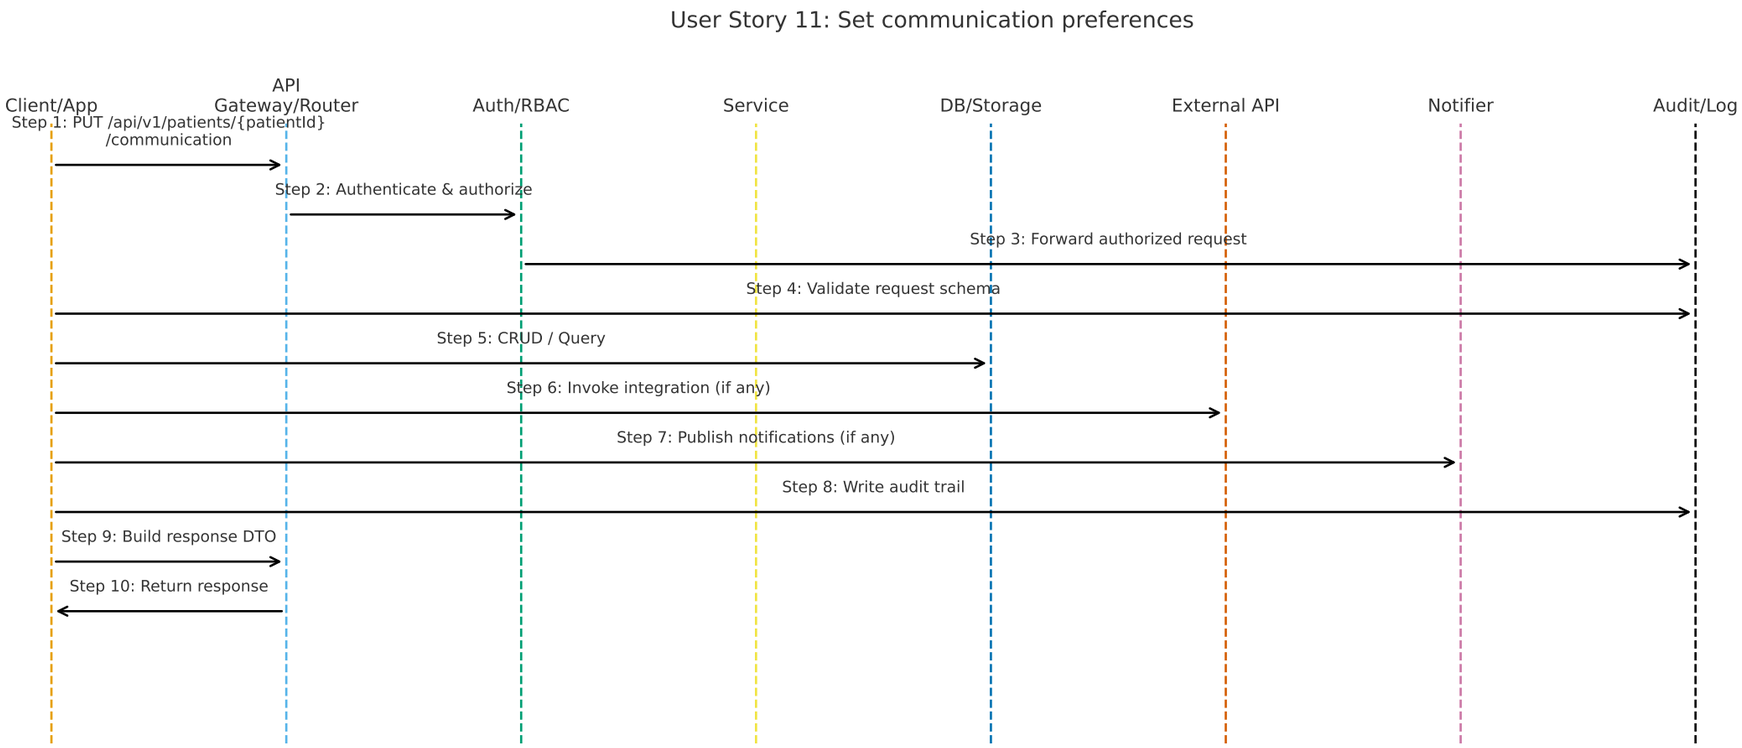
User Story 8: Search patients
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /api/v1/patients/search?identifier=MRN12345&name=John&_fuzzy=true
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



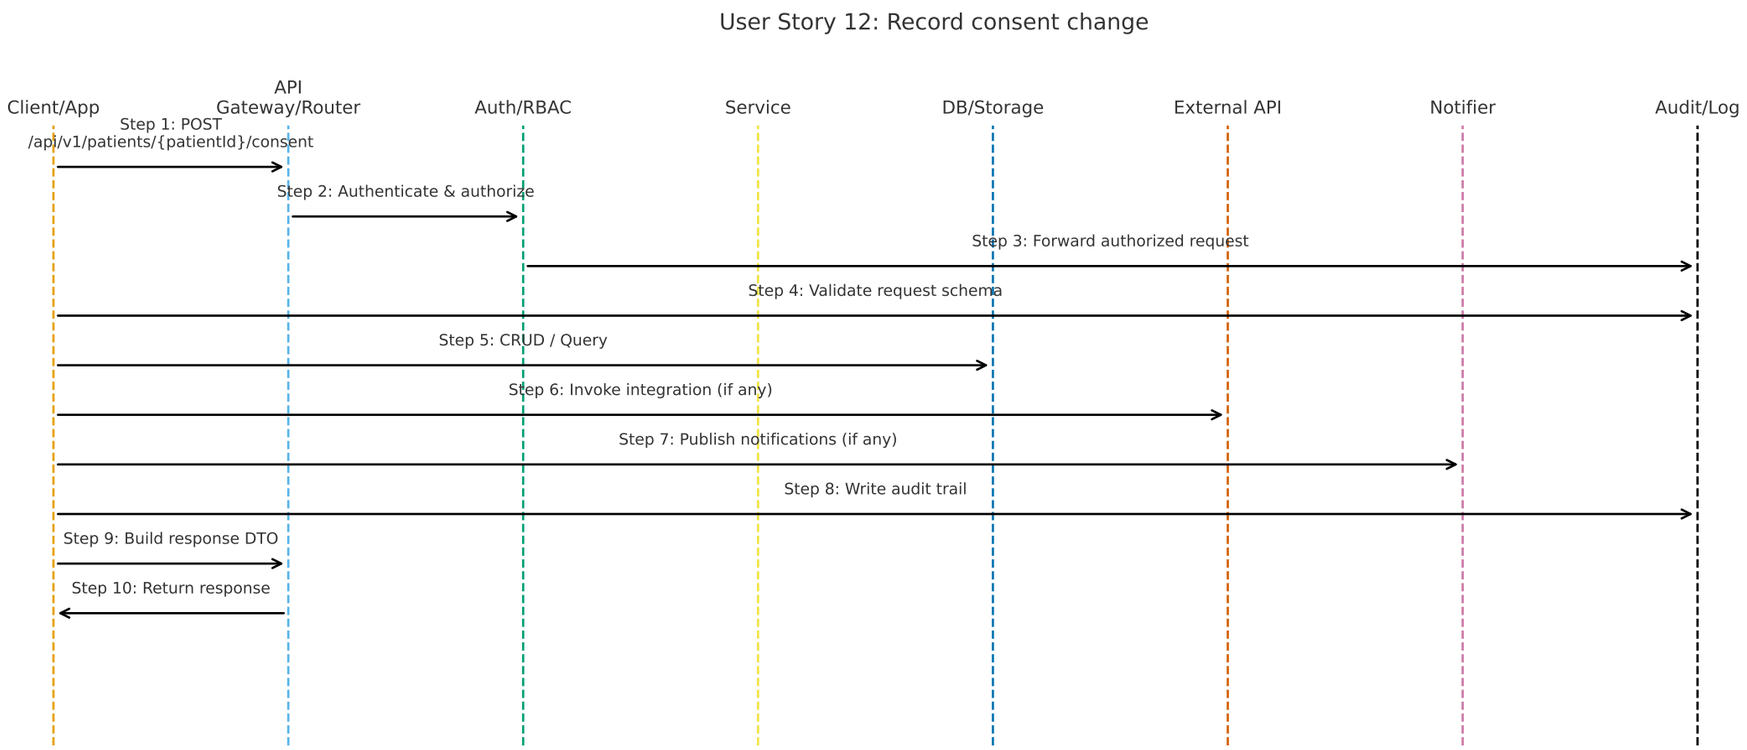
User Story 9: Merge duplicates
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/patients/{sourceId} /merge/{targetId}
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



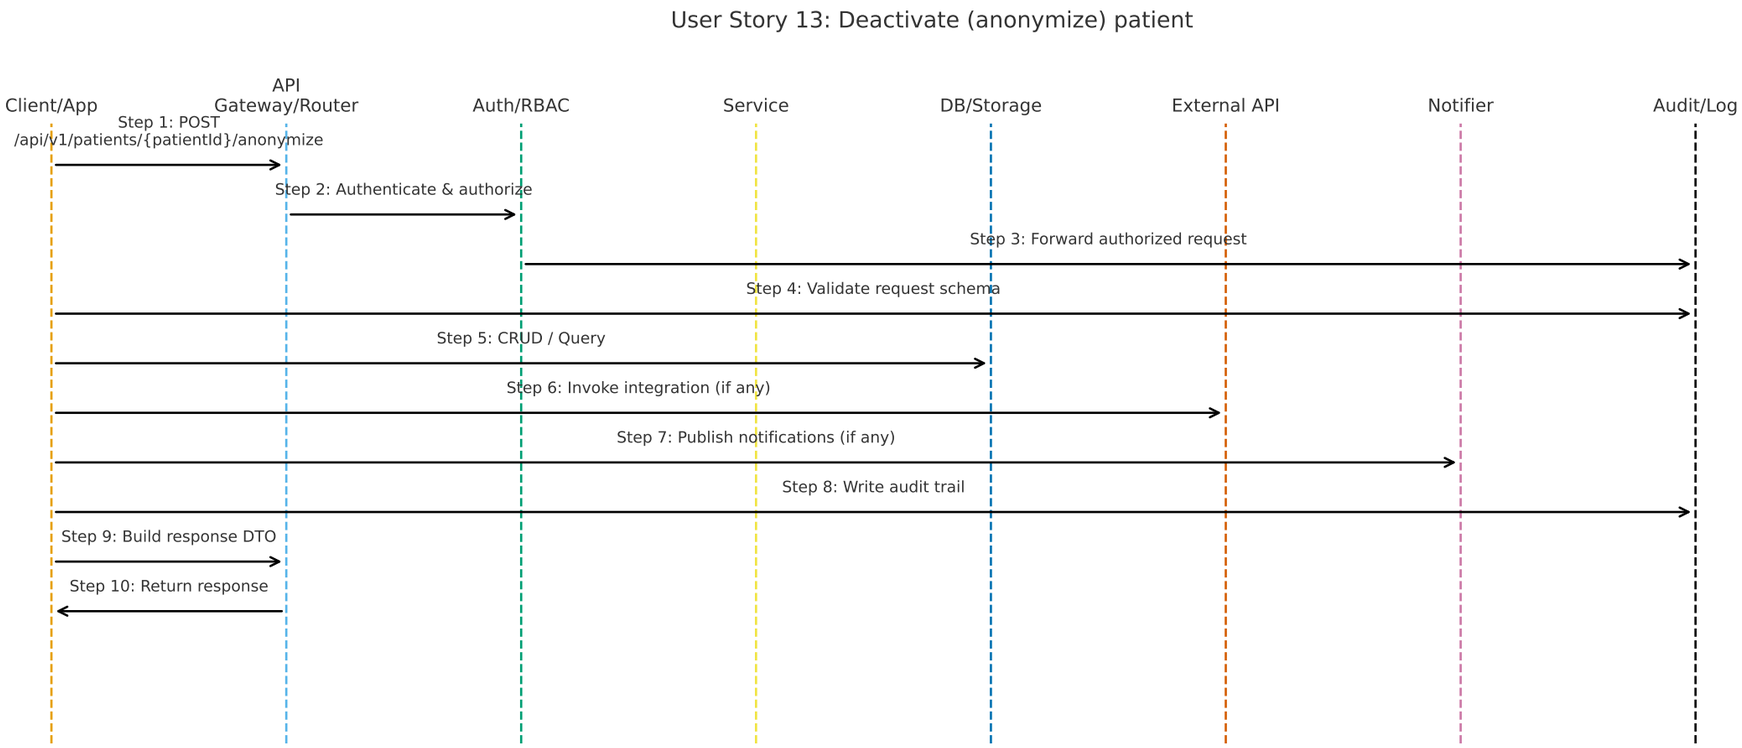
User Story 10: Export record
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /api/v1/patients/{patientId}/export?format=pdf&includeSections=demographics,vitals
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



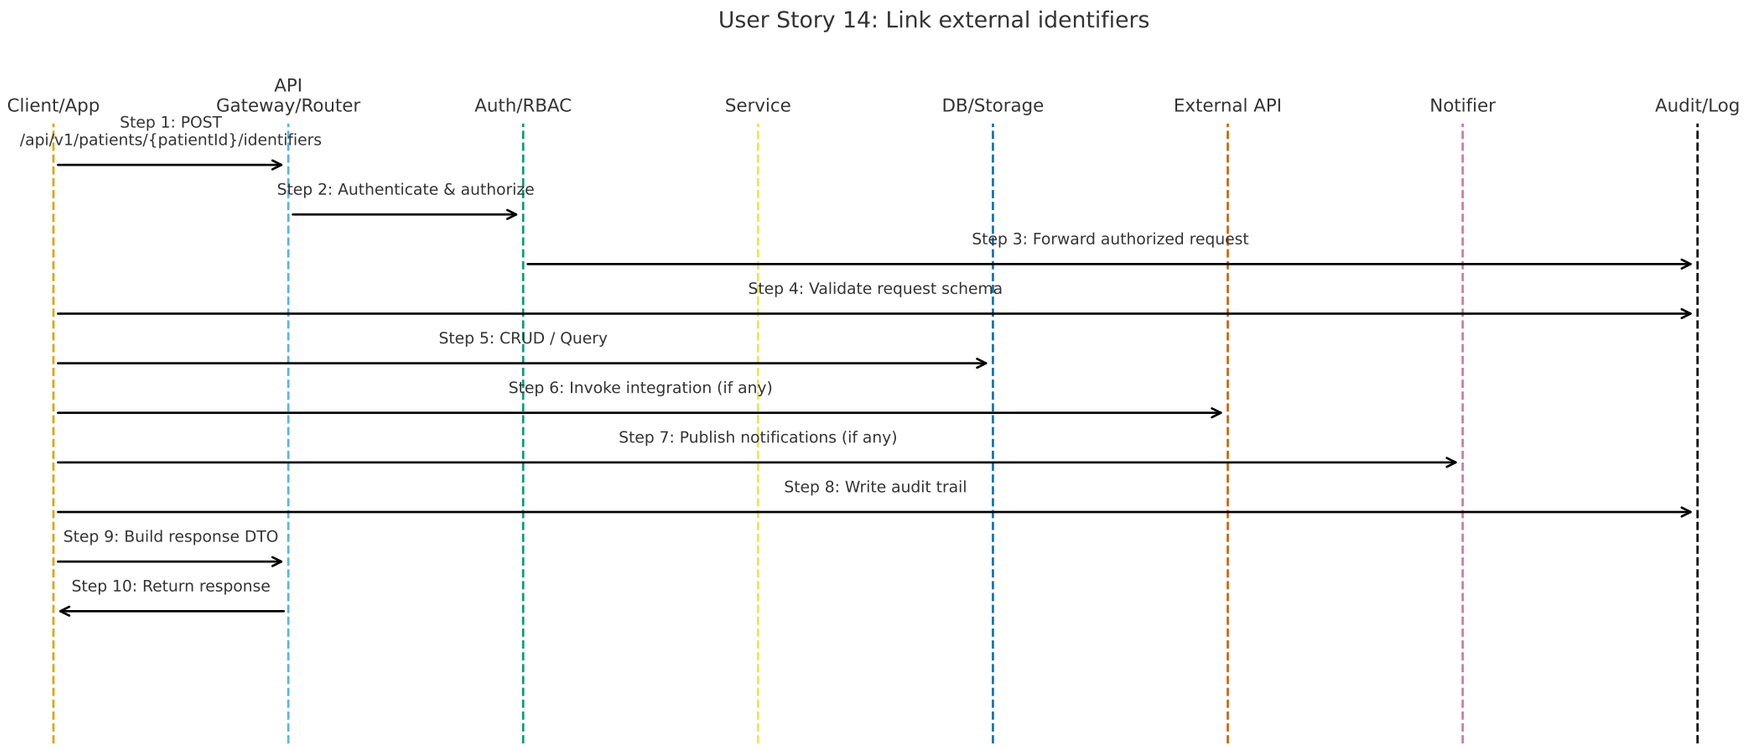
User Story 11: Set communication preferences
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: PUT /api/v1/patients/{patientId} /communication
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



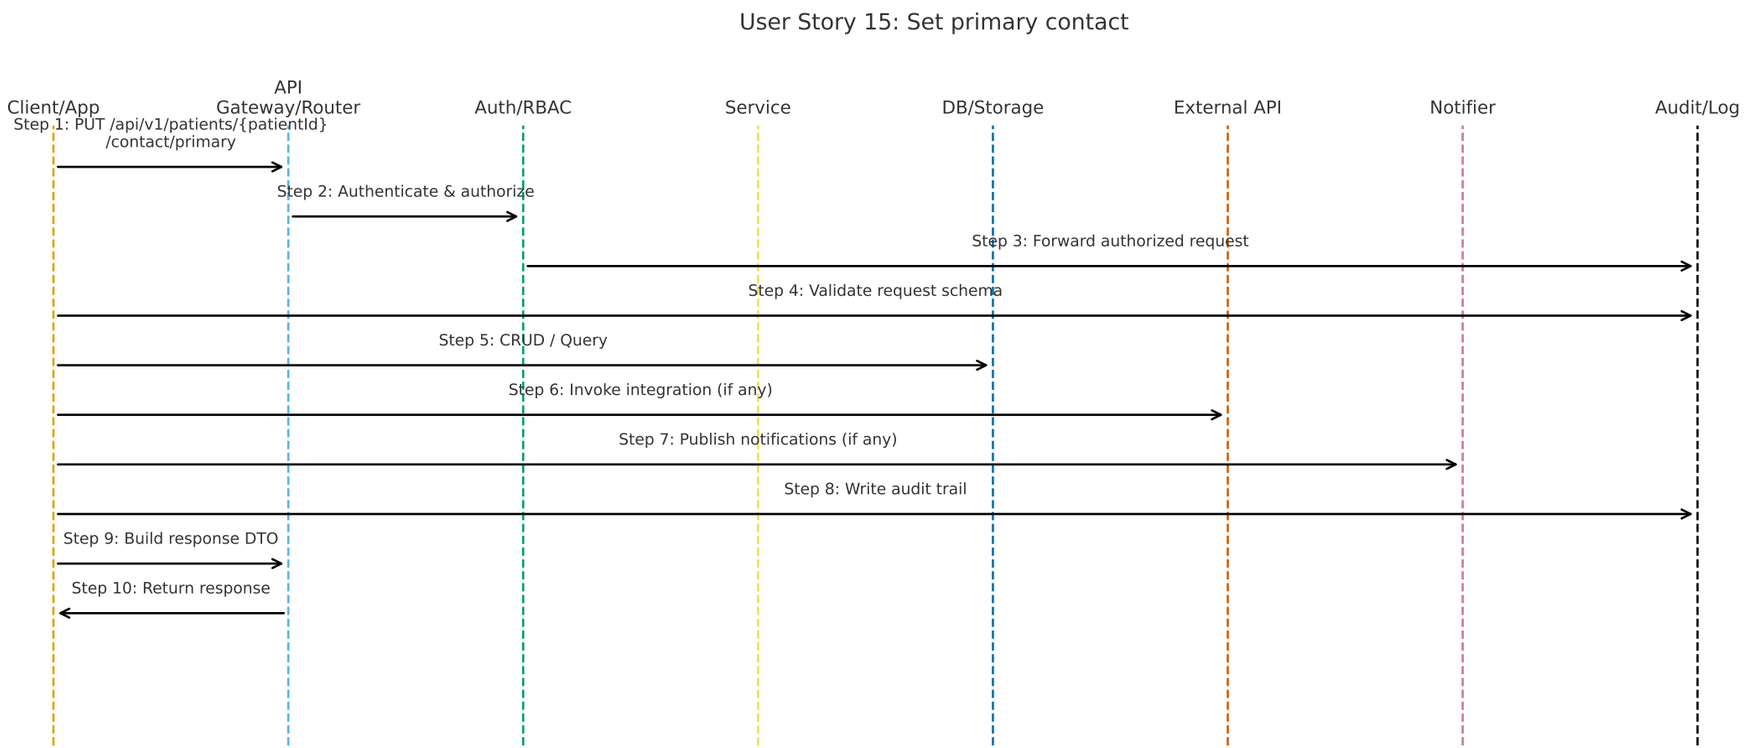
User Story 12: Record consent change
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/patients/{patientId}/consent
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



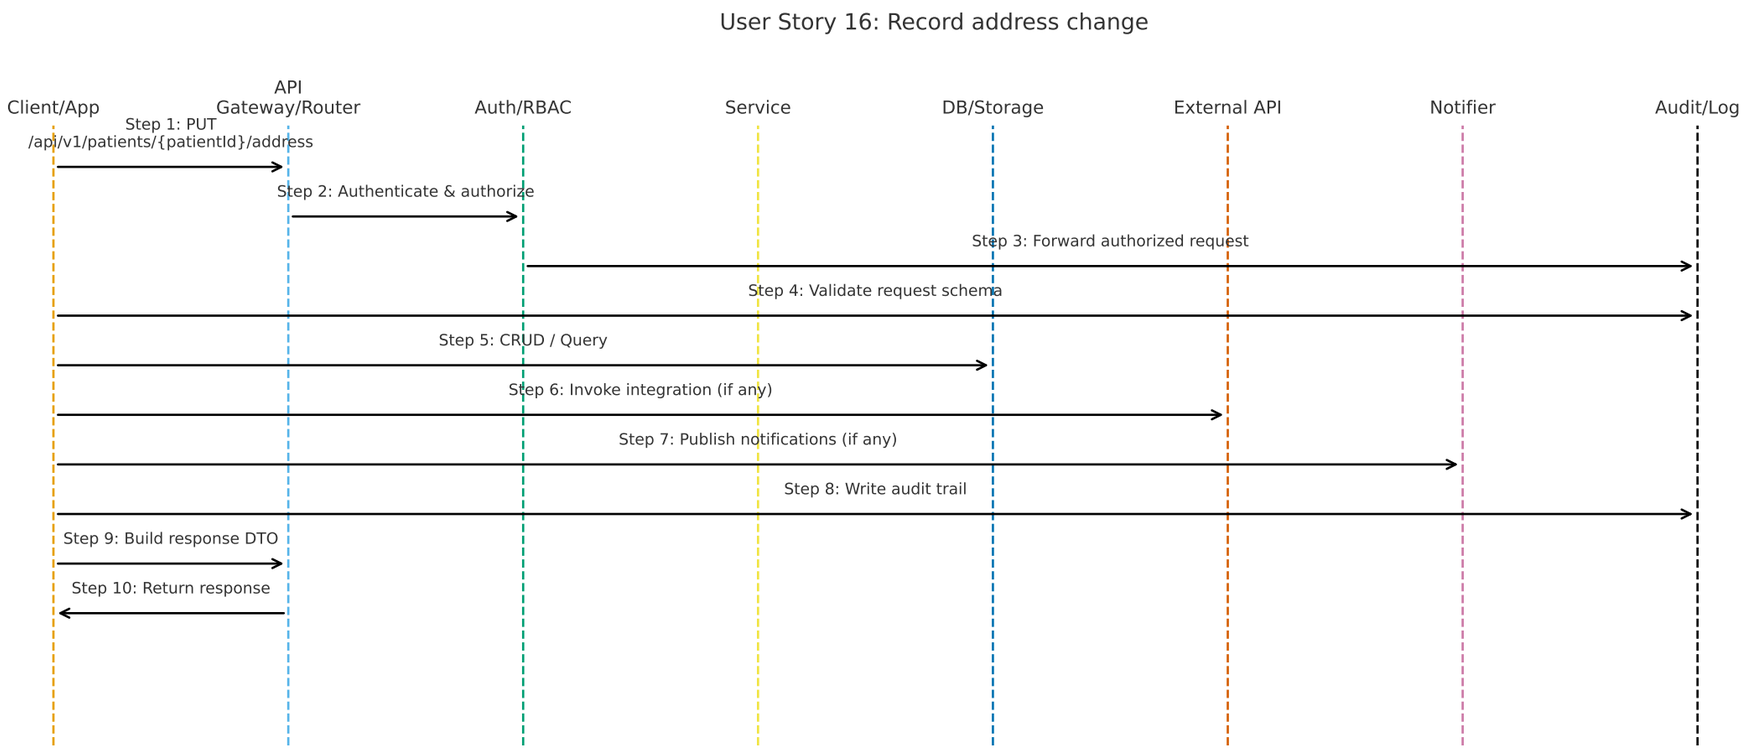
User Story 13: Deactivate (anonymize) patient
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/patients/{patientId}/anonymize
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



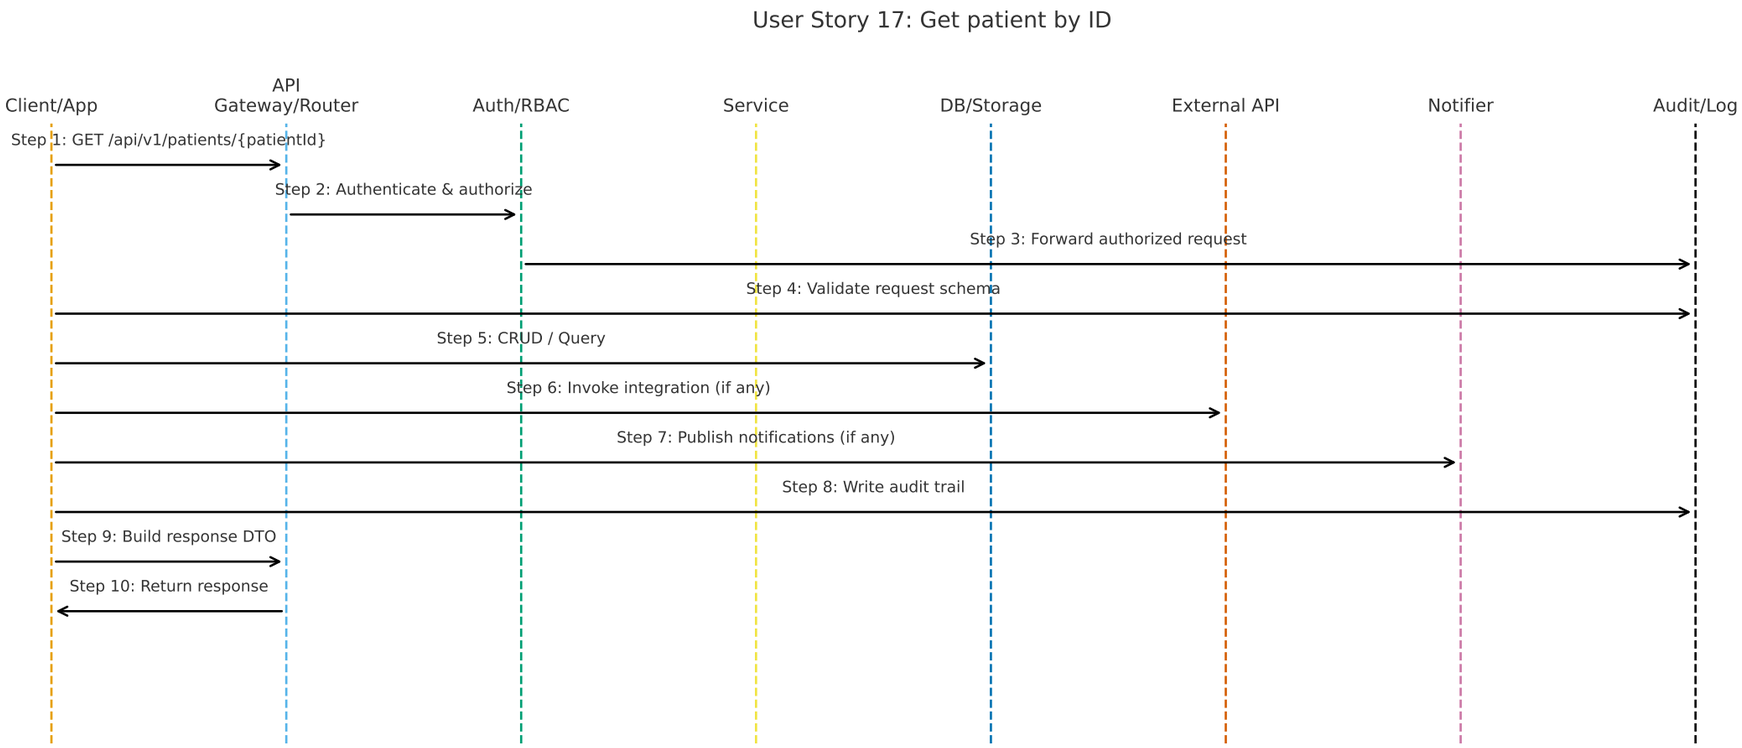
User Story 14: Link external identifiers
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/patients/{patientId}/identifiers
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



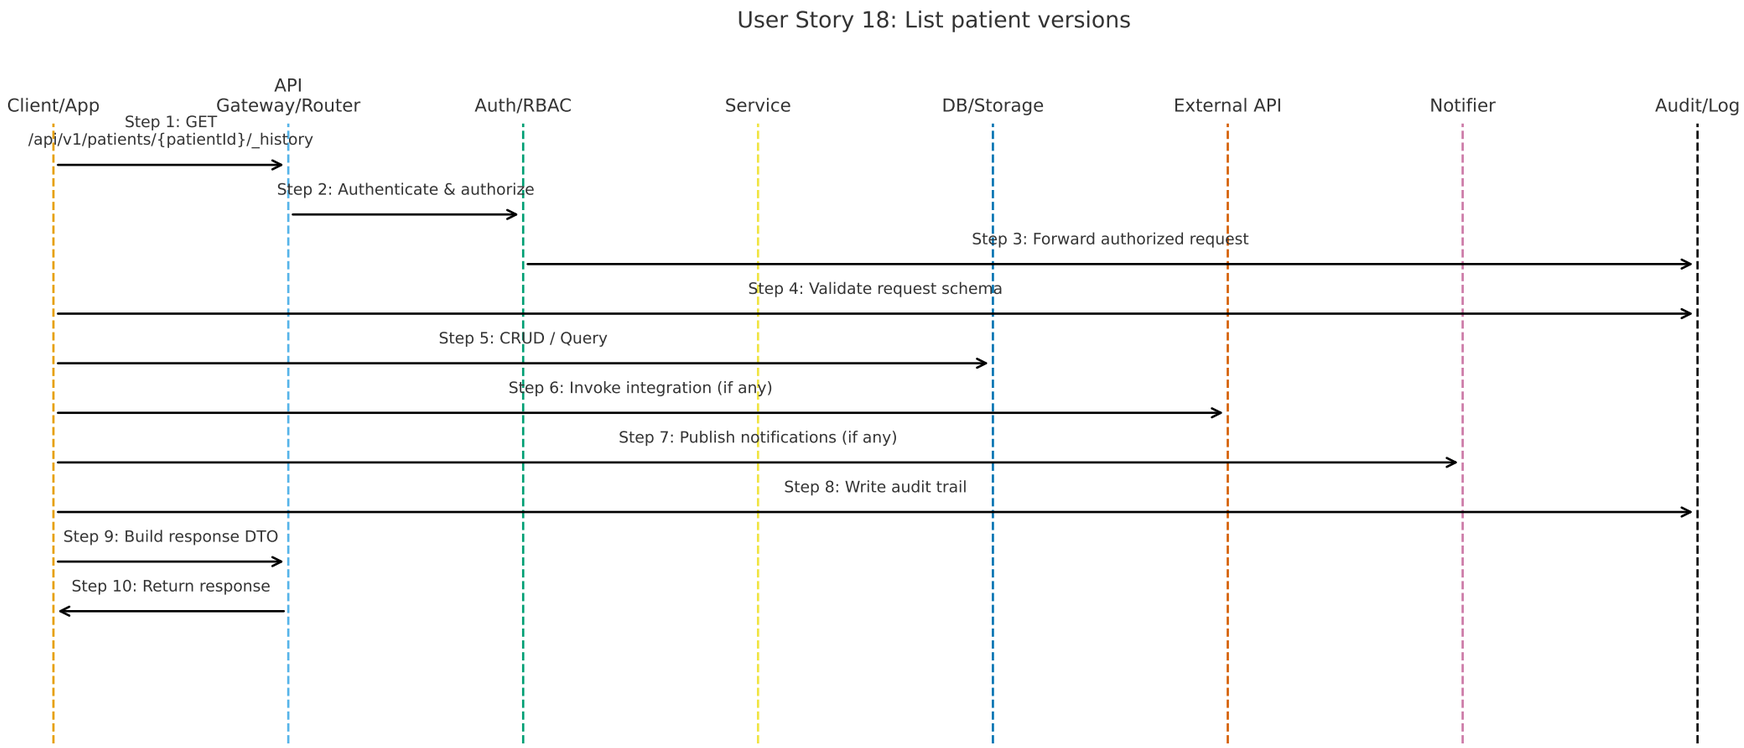
User Story 15: Set primary contact
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: PUT /api/v1/patients/{patientId} /contact/primary
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



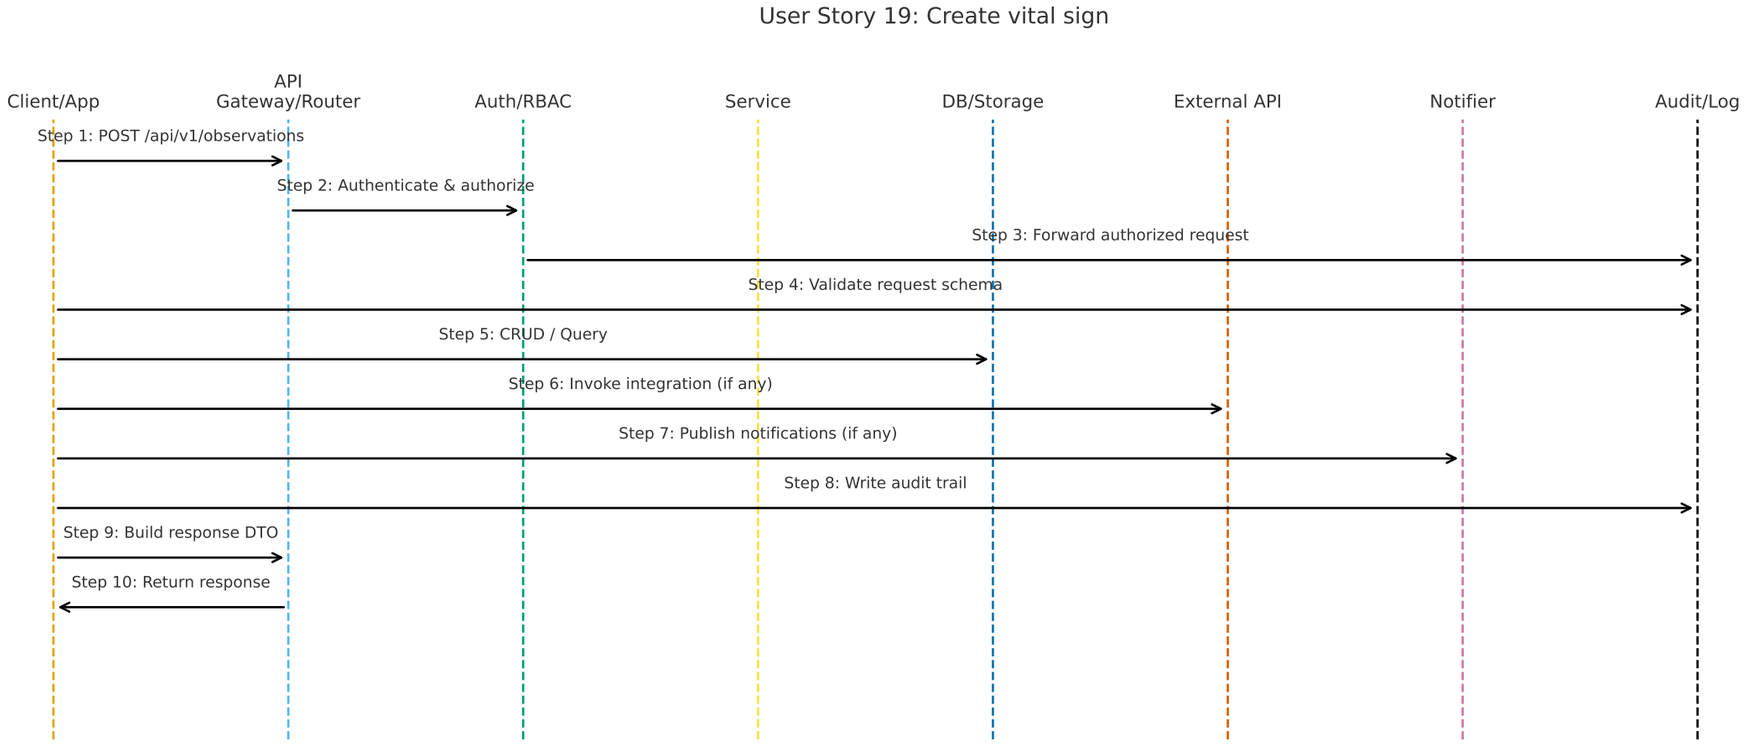
User Story 16: Record address change
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: PUT /api/v1/patients/{patientId}/address
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



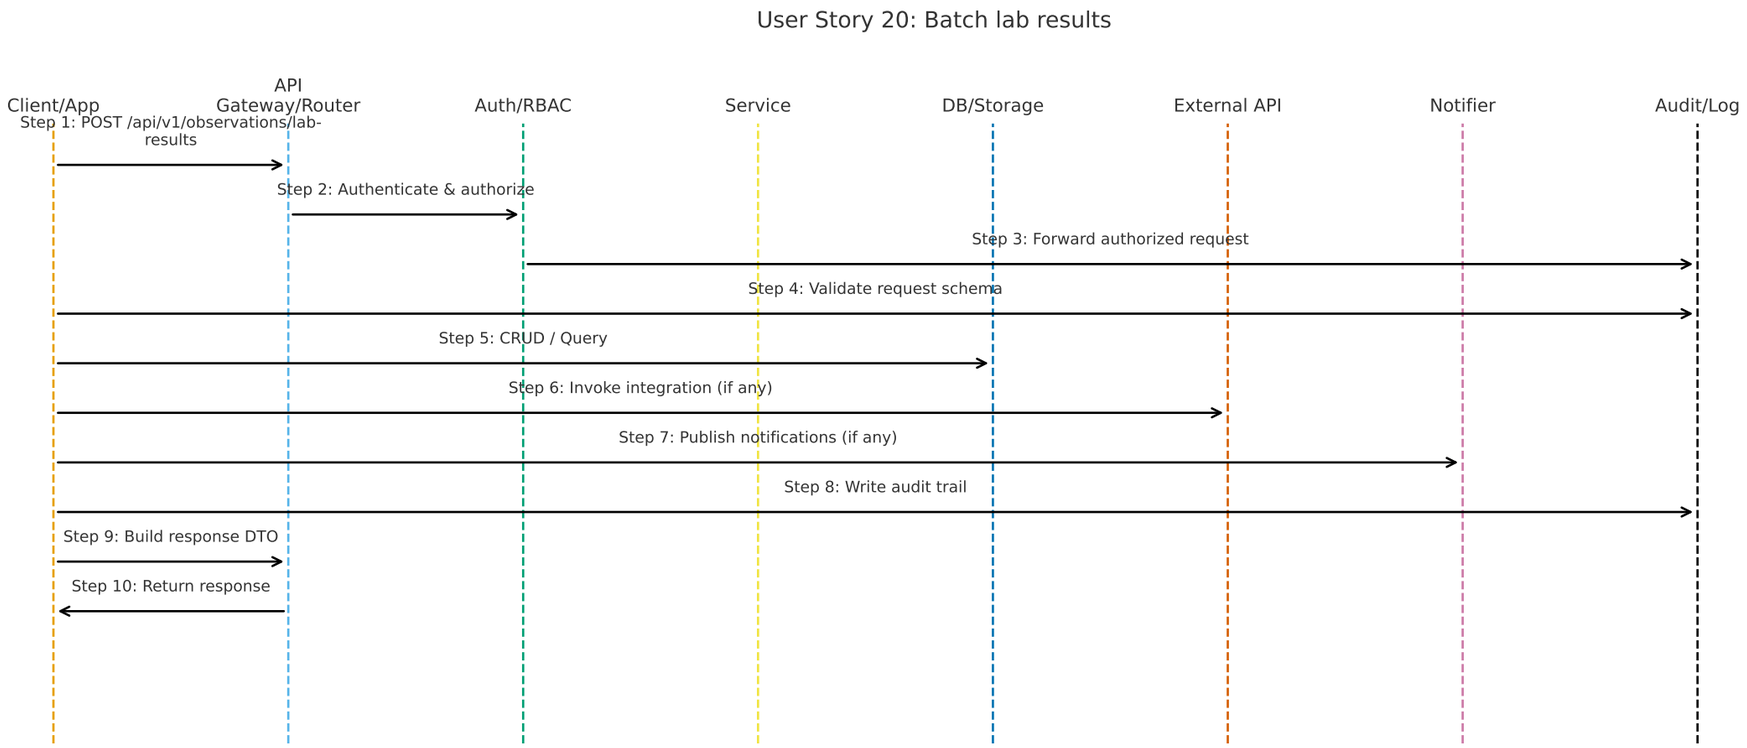
User Story 17: Get patient by ID
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /api/v1/patients/{patientId}
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



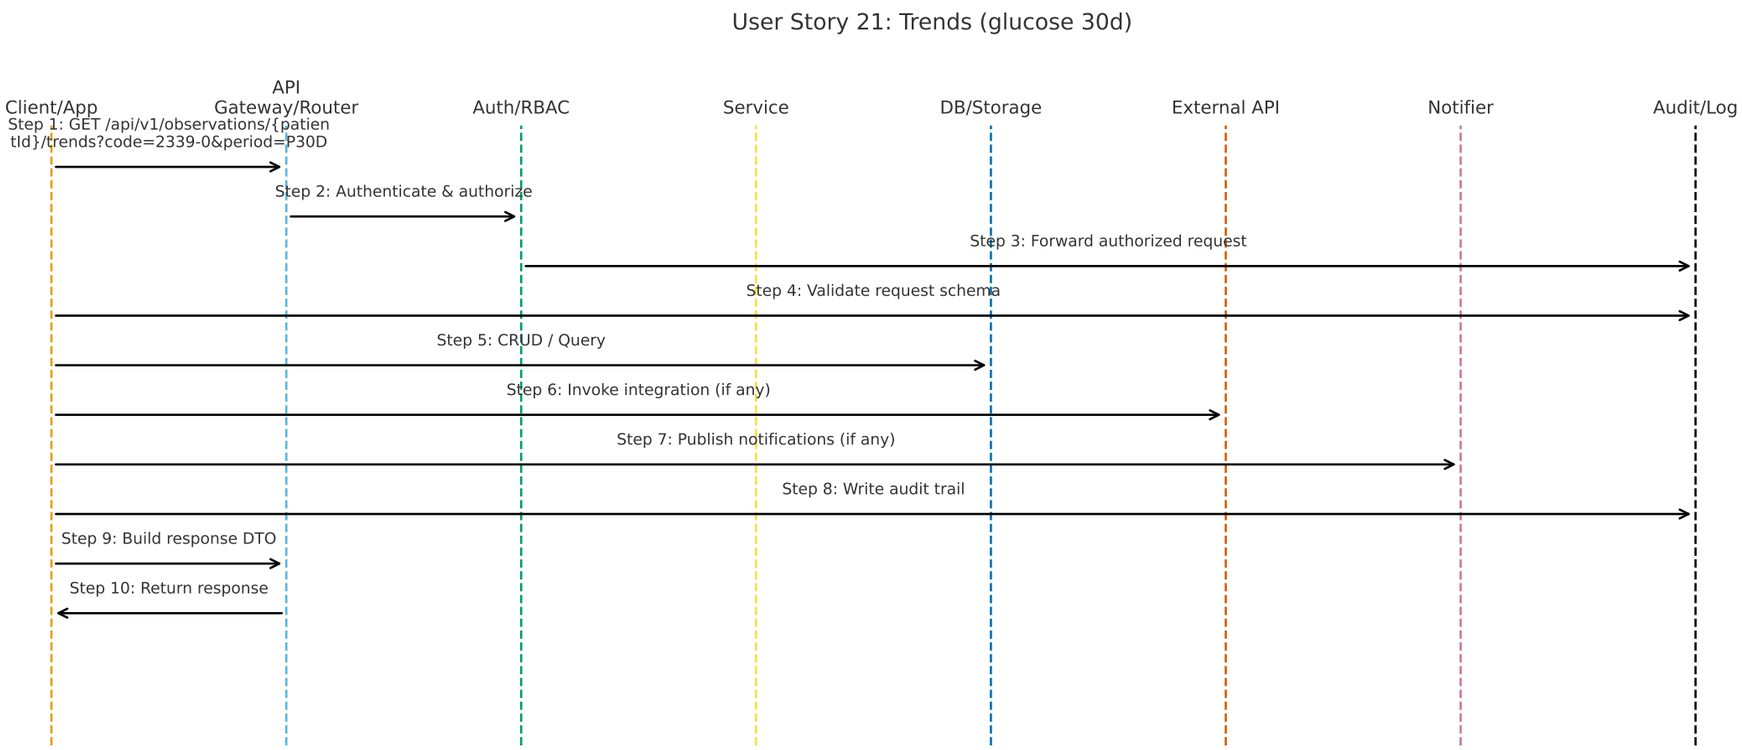
User Story 18: List patient versions
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /api/v1/patients/{patientId}/_history
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



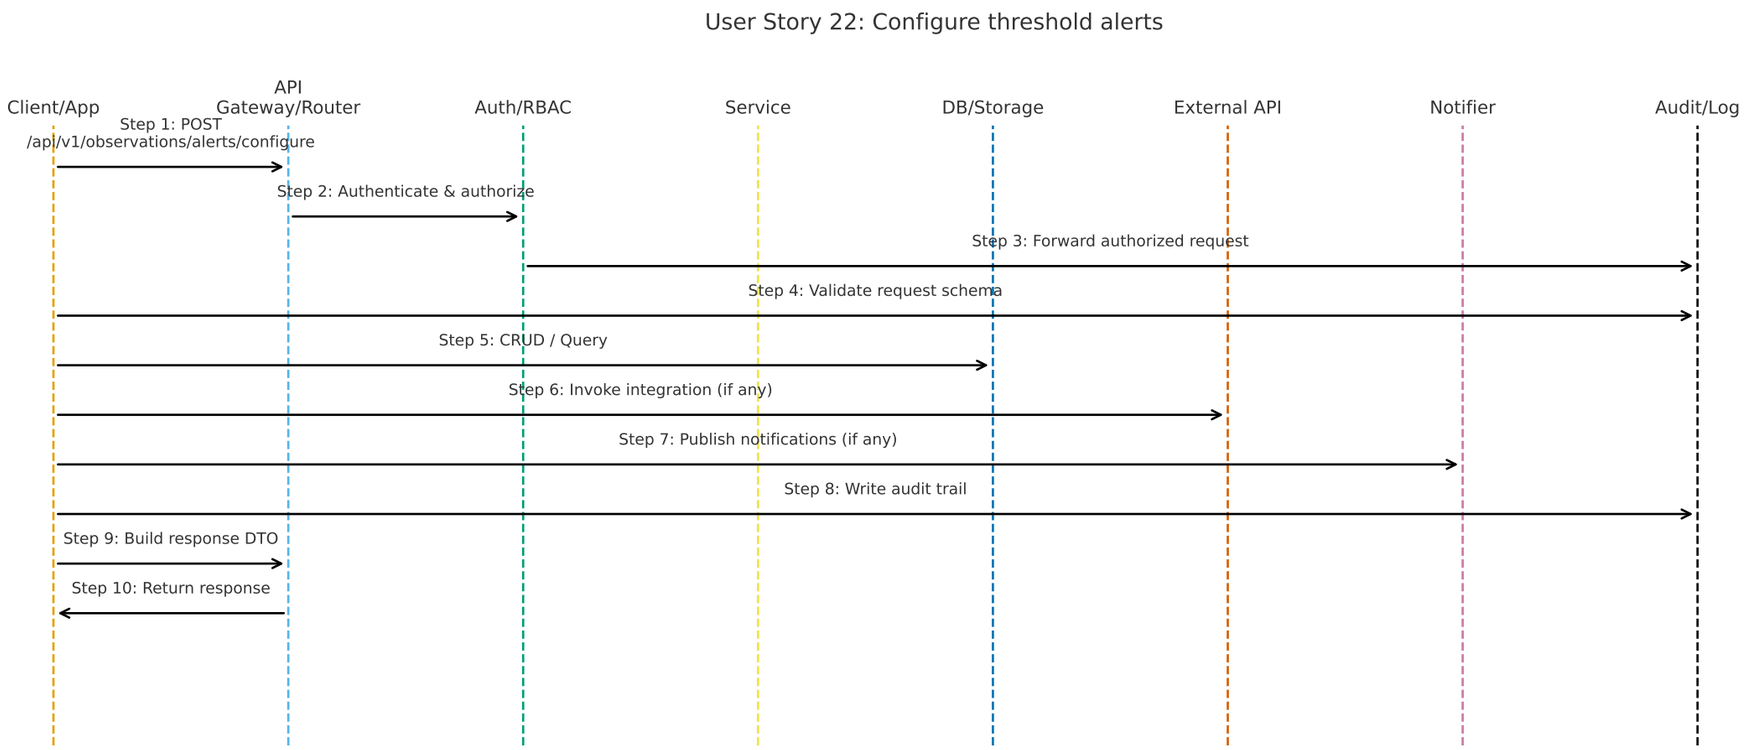
User Story 19: Create vital sign
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/observations
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



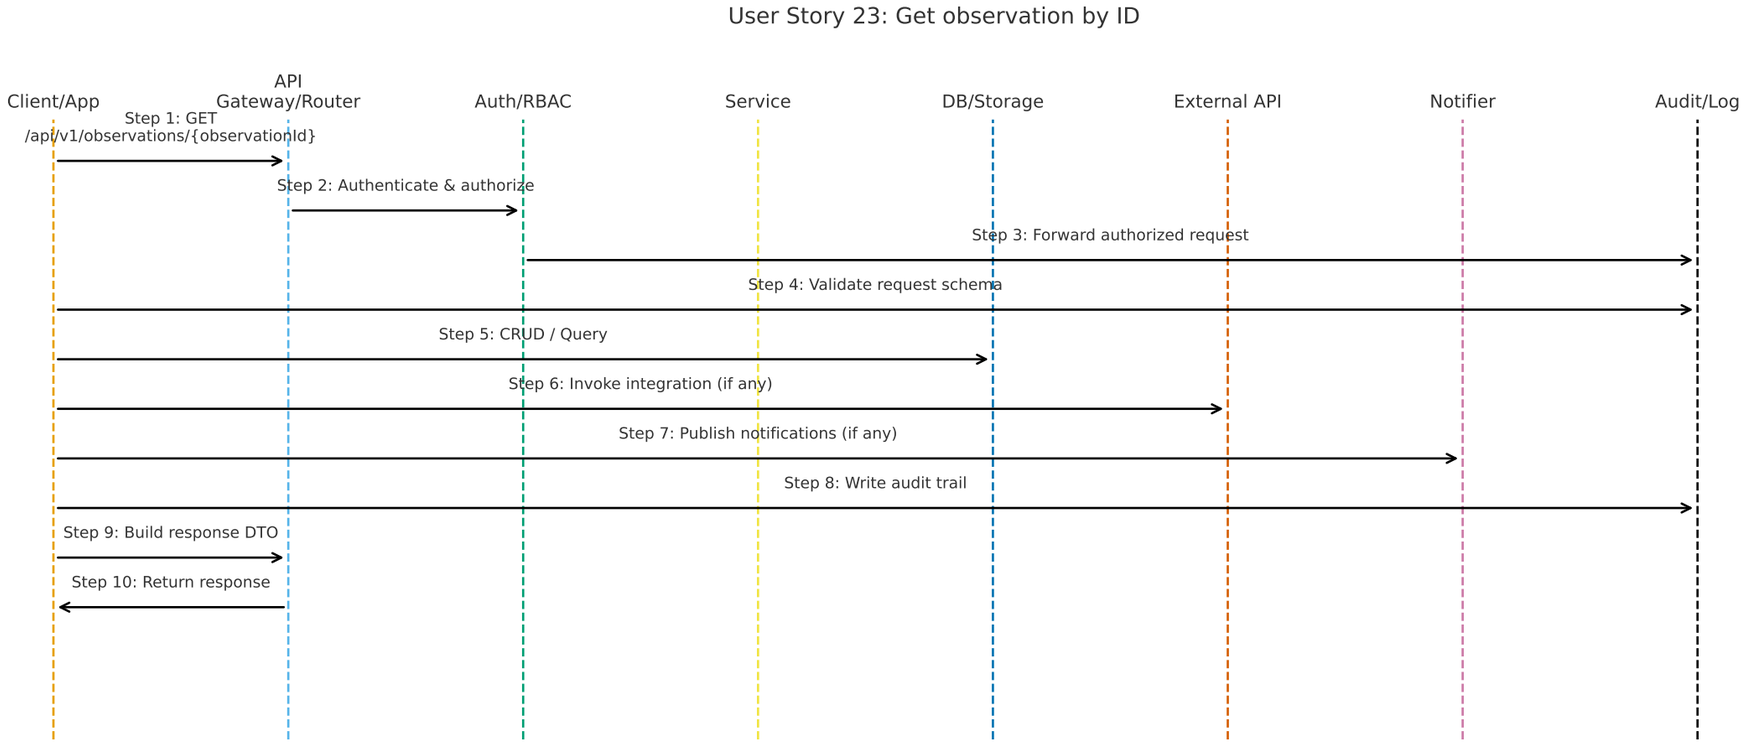
User Story 20: Batch lab results
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/observations/lab-results
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



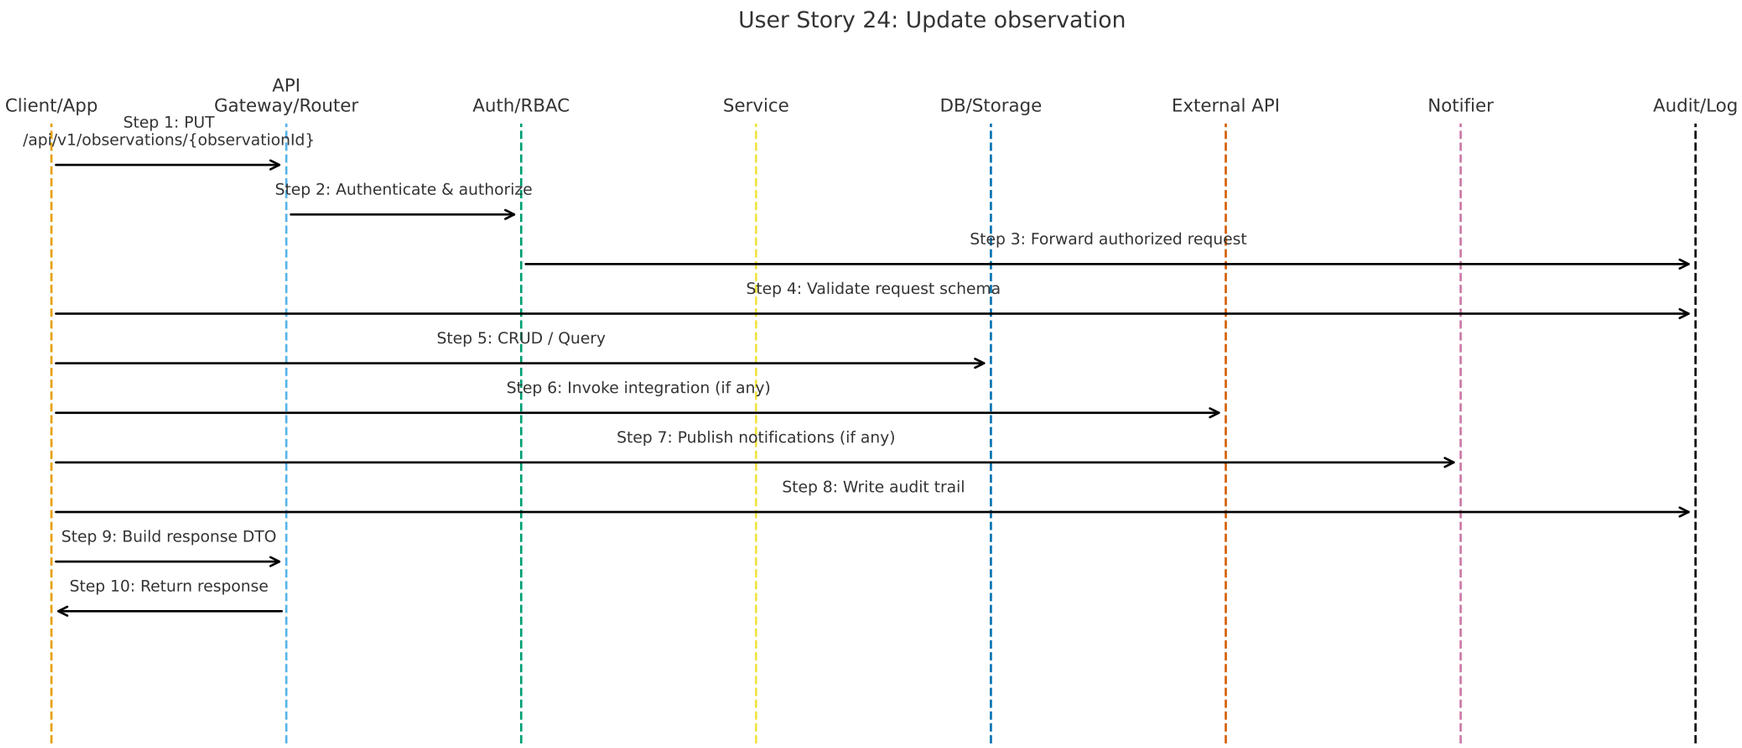
User Story 21: Trends (glucose 30d)
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /api/v1/observations/{patien tId}/trends?code=2339-0&period=P30D
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



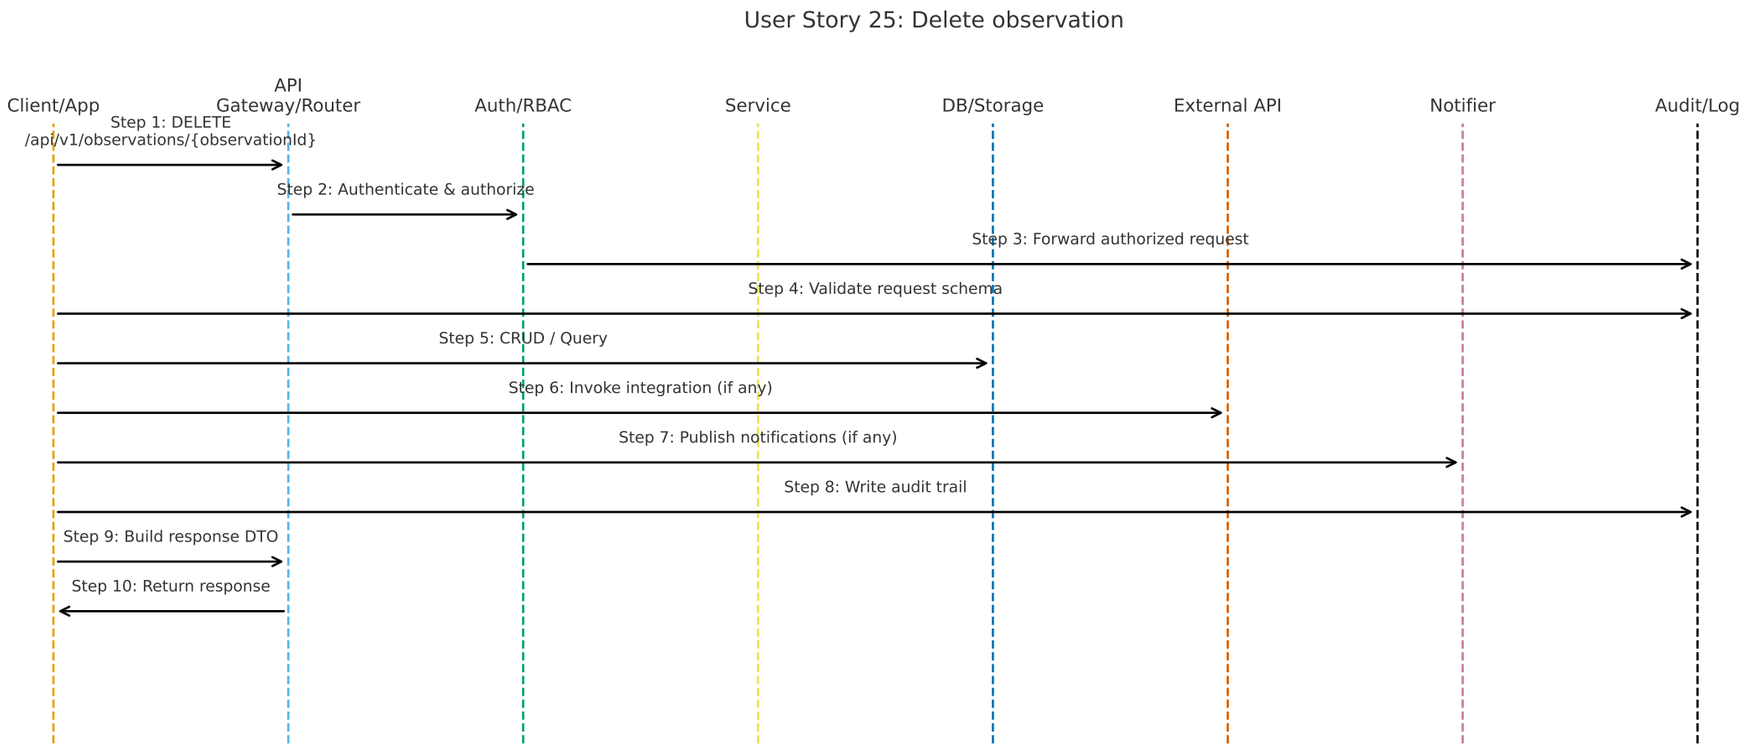
User Story 22: Configure threshold alerts
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/observations/alerts/configure
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



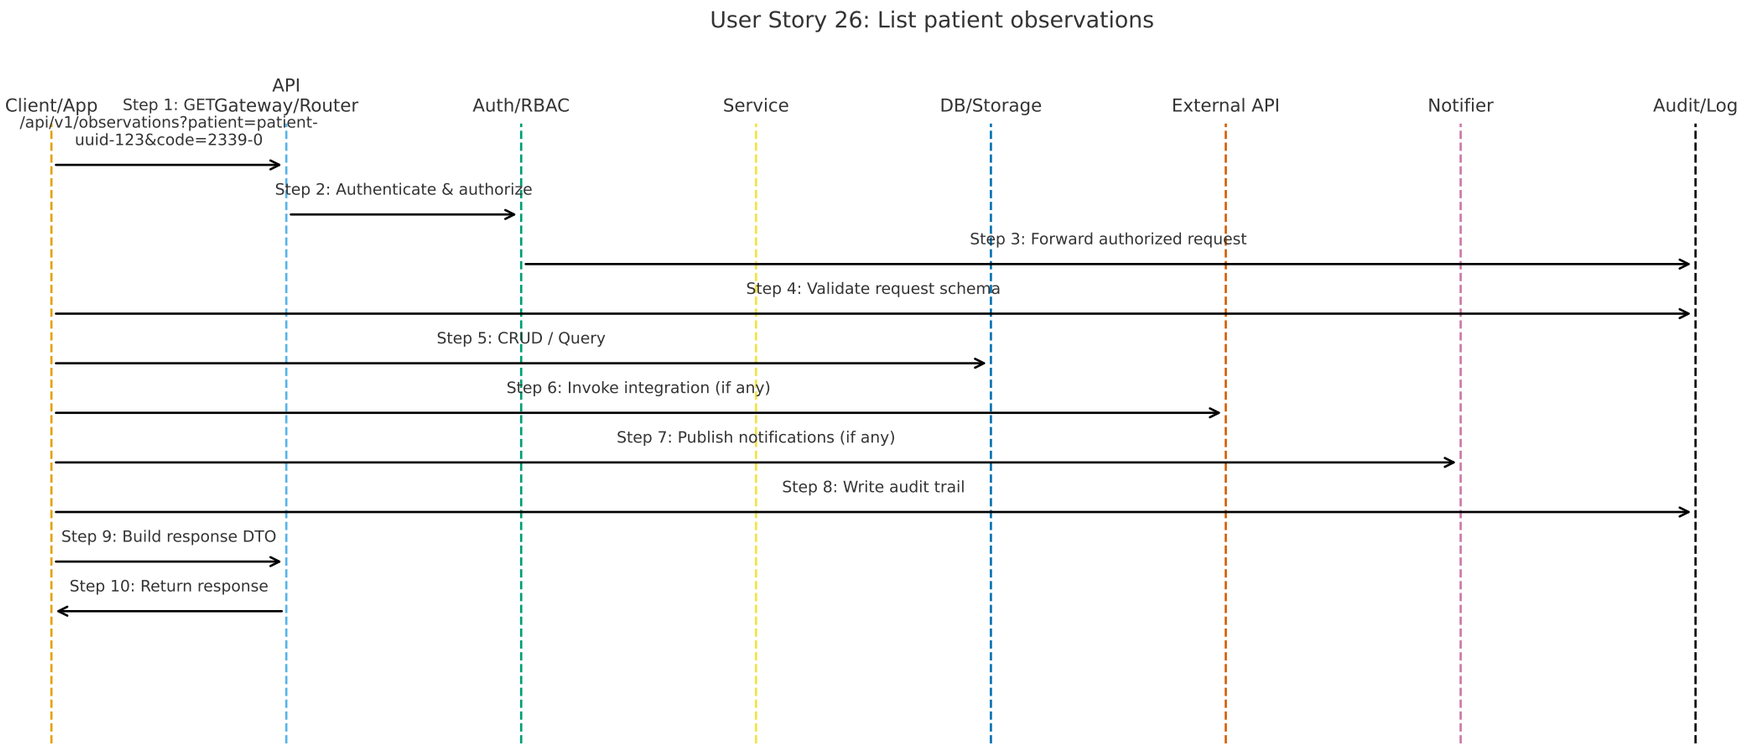
User Story 23: Get observation by ID
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /api/v1/observations/{observationId}
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



User Story 24: Update observation
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: PUT /api/v1/observations/{observationId}
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



User Story 25: Delete observation
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: DELETE /api/v1/observations/{observationId}
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



User Story 26: List patient observations
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /api/v1/observations?patient=patient-uuid-123&code=2339-0
Step 2: Authenticate & authorize

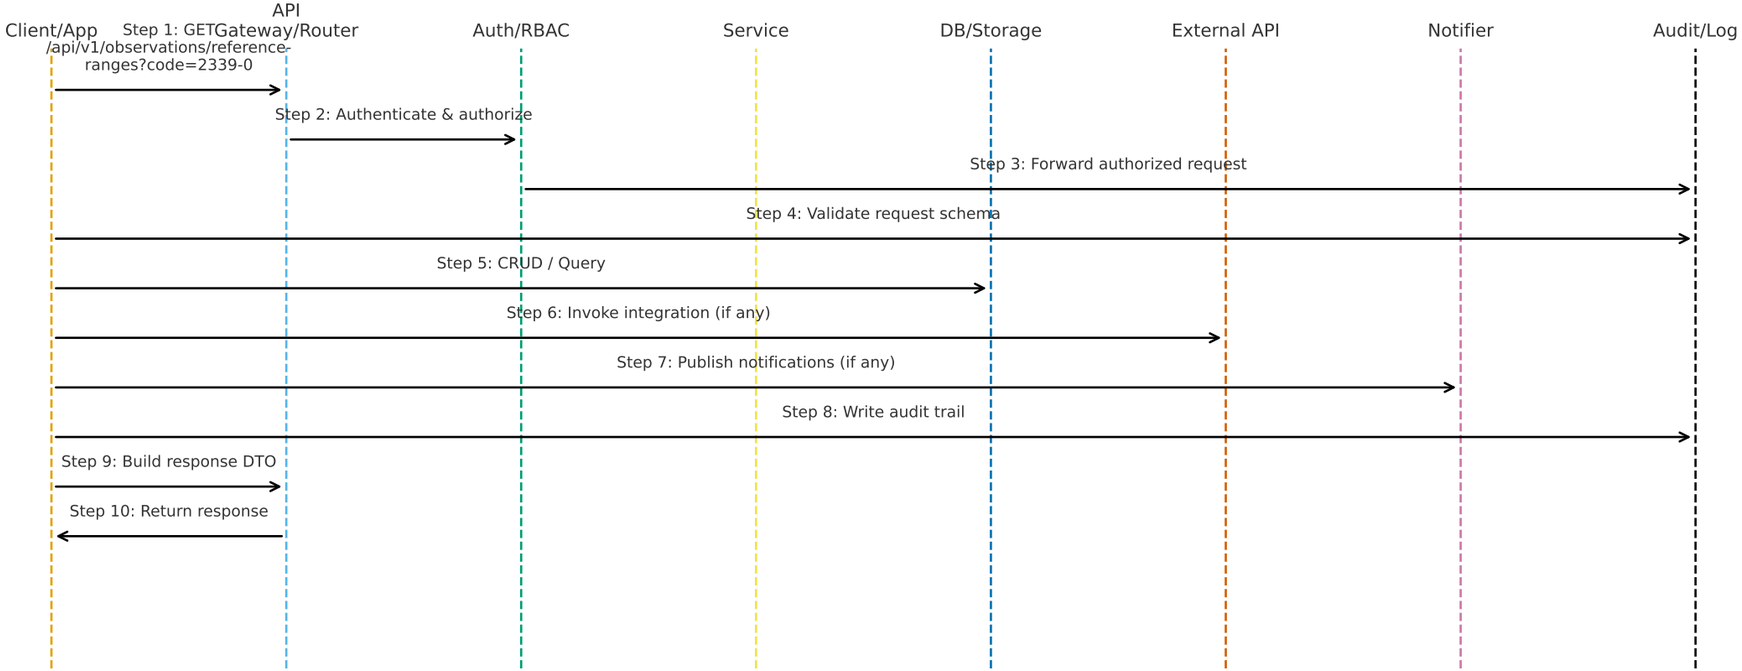
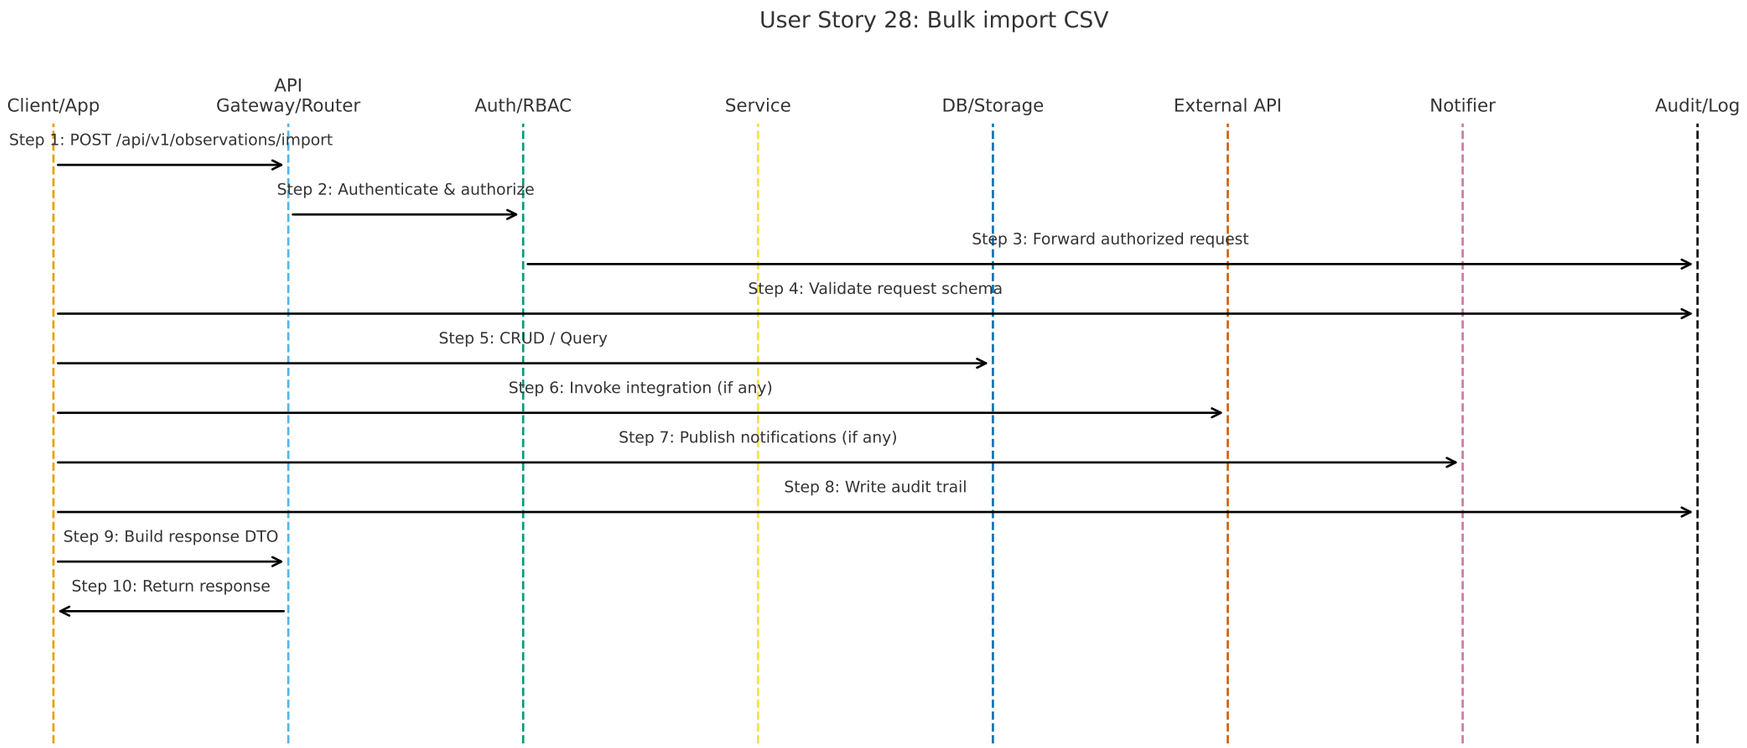
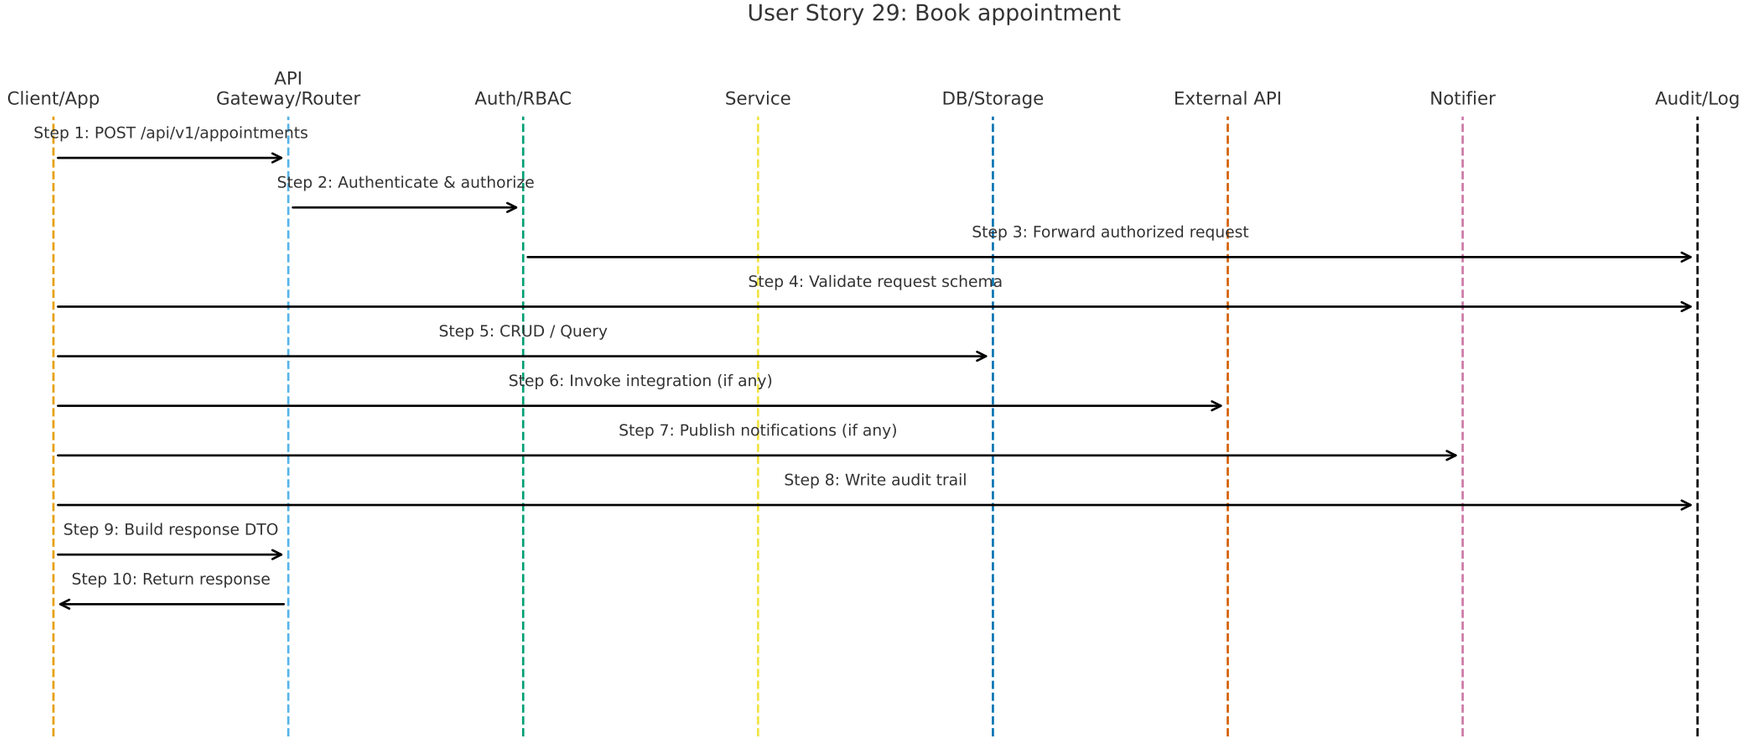
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response

User Story 27: Reference range library

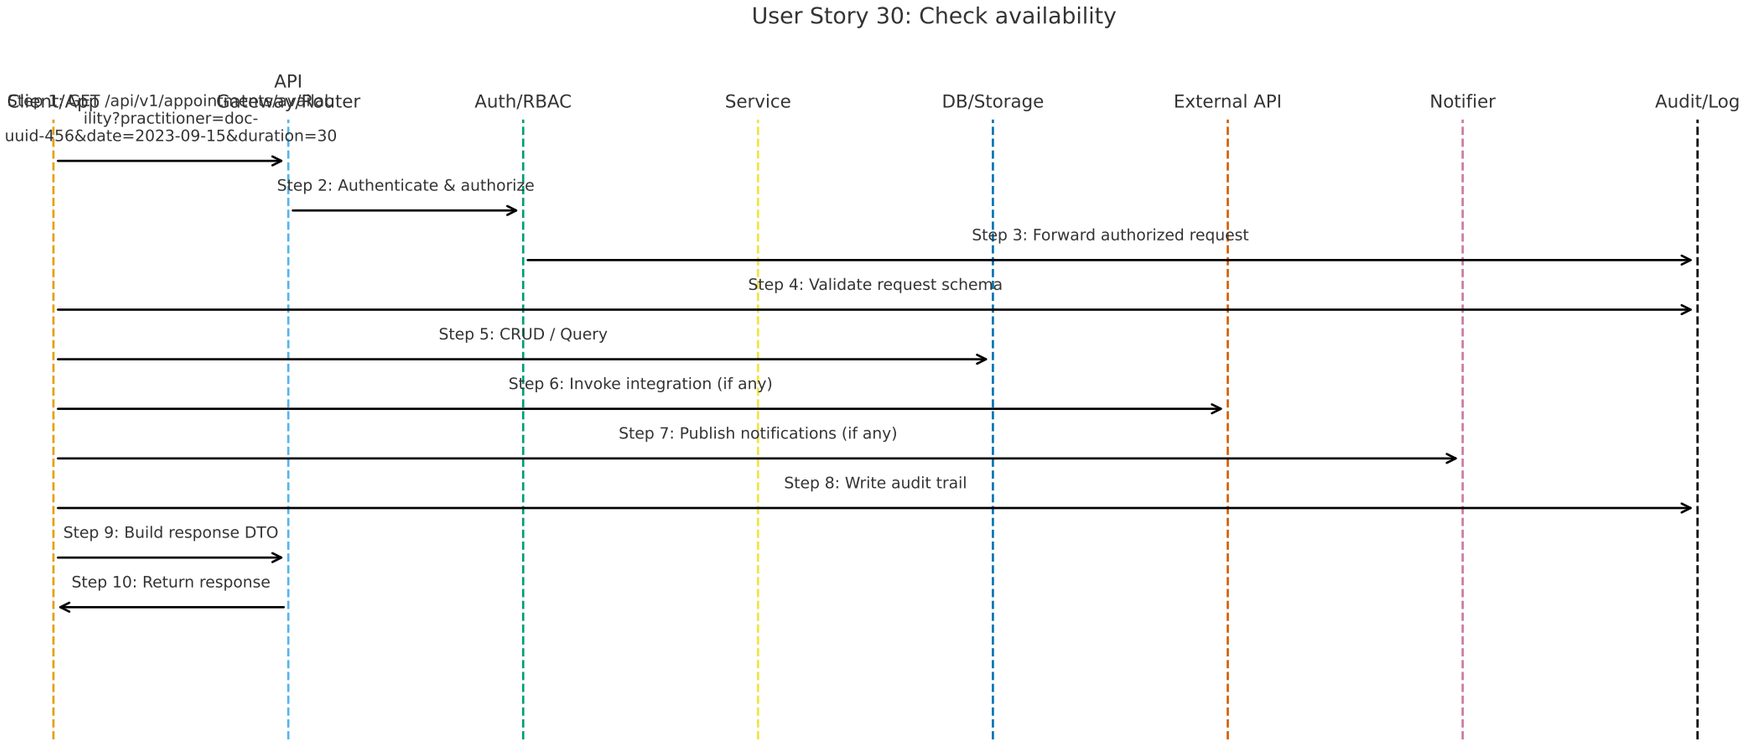




User Story 28: Bulk import CSV
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/observations/import
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



User Story 29: Book appointment
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/appointments
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



User Story 30: Check availability
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /api/v1/appointments/availability?practitioner=doc-uuid-456&date=2023-09-15&duration=30

Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response

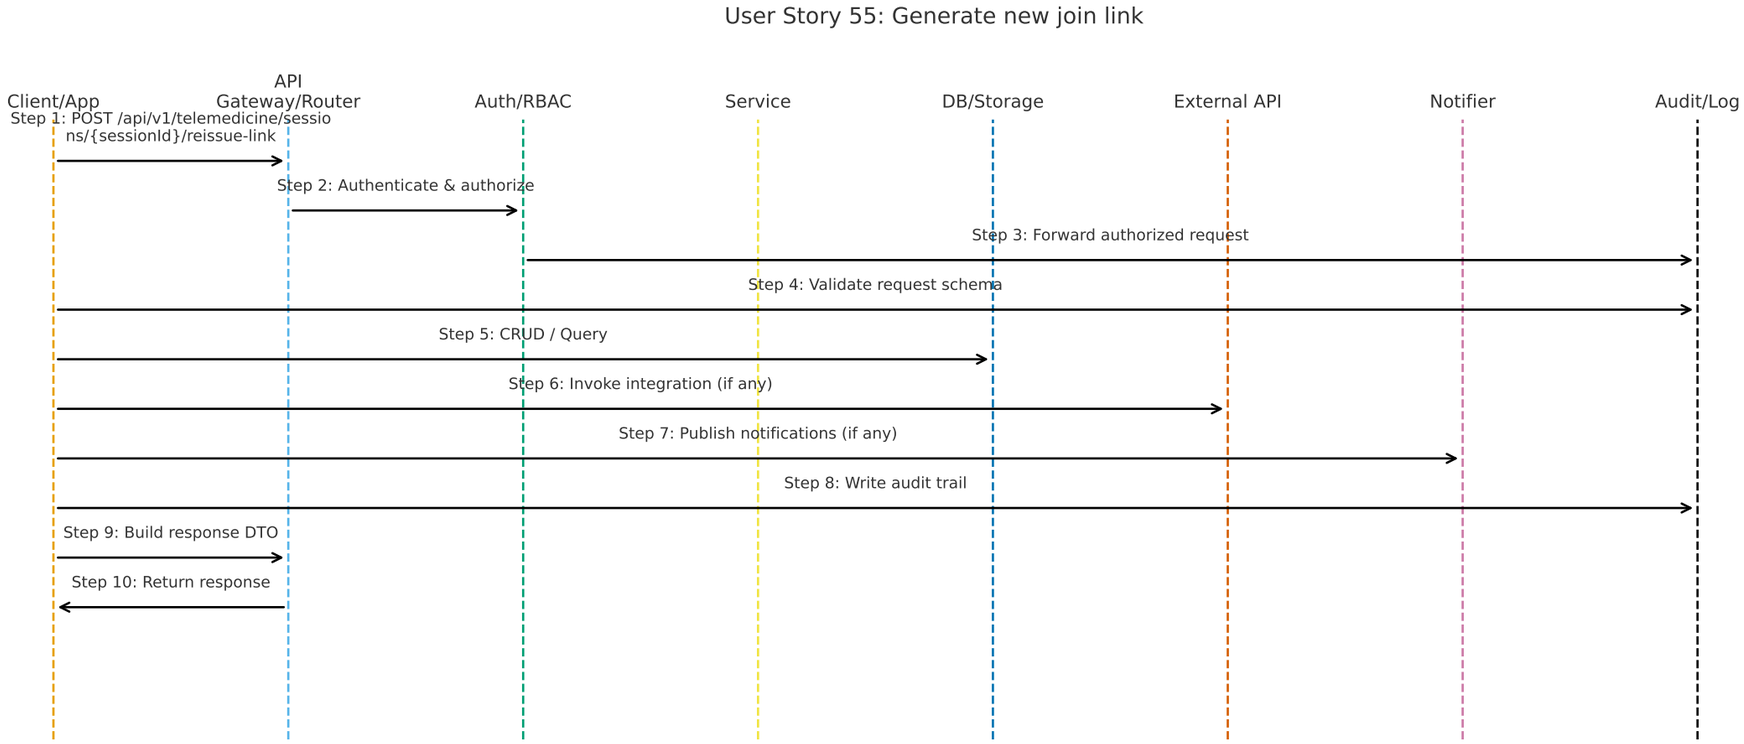
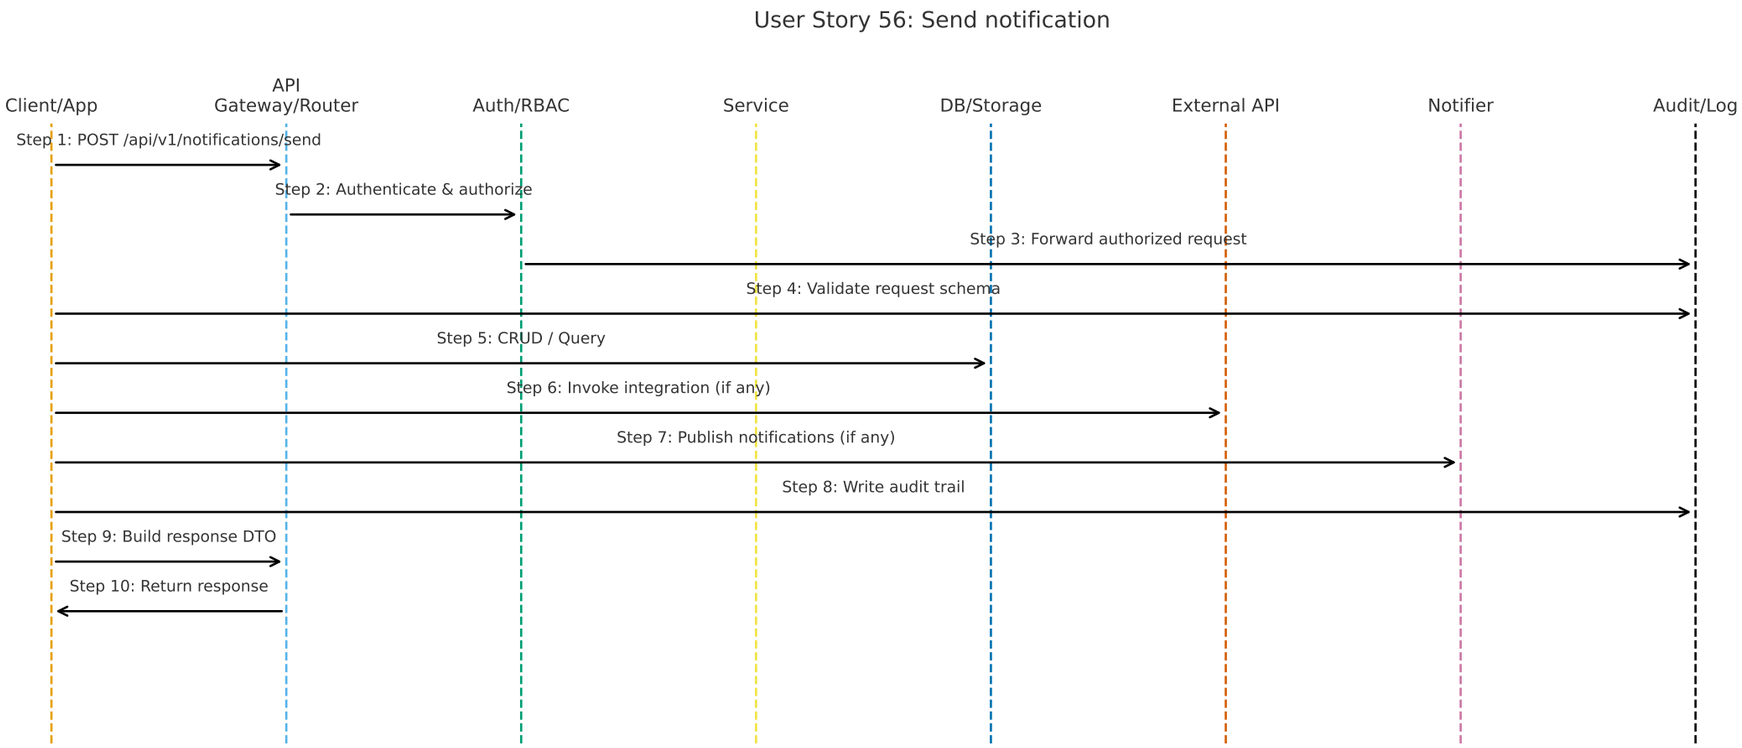
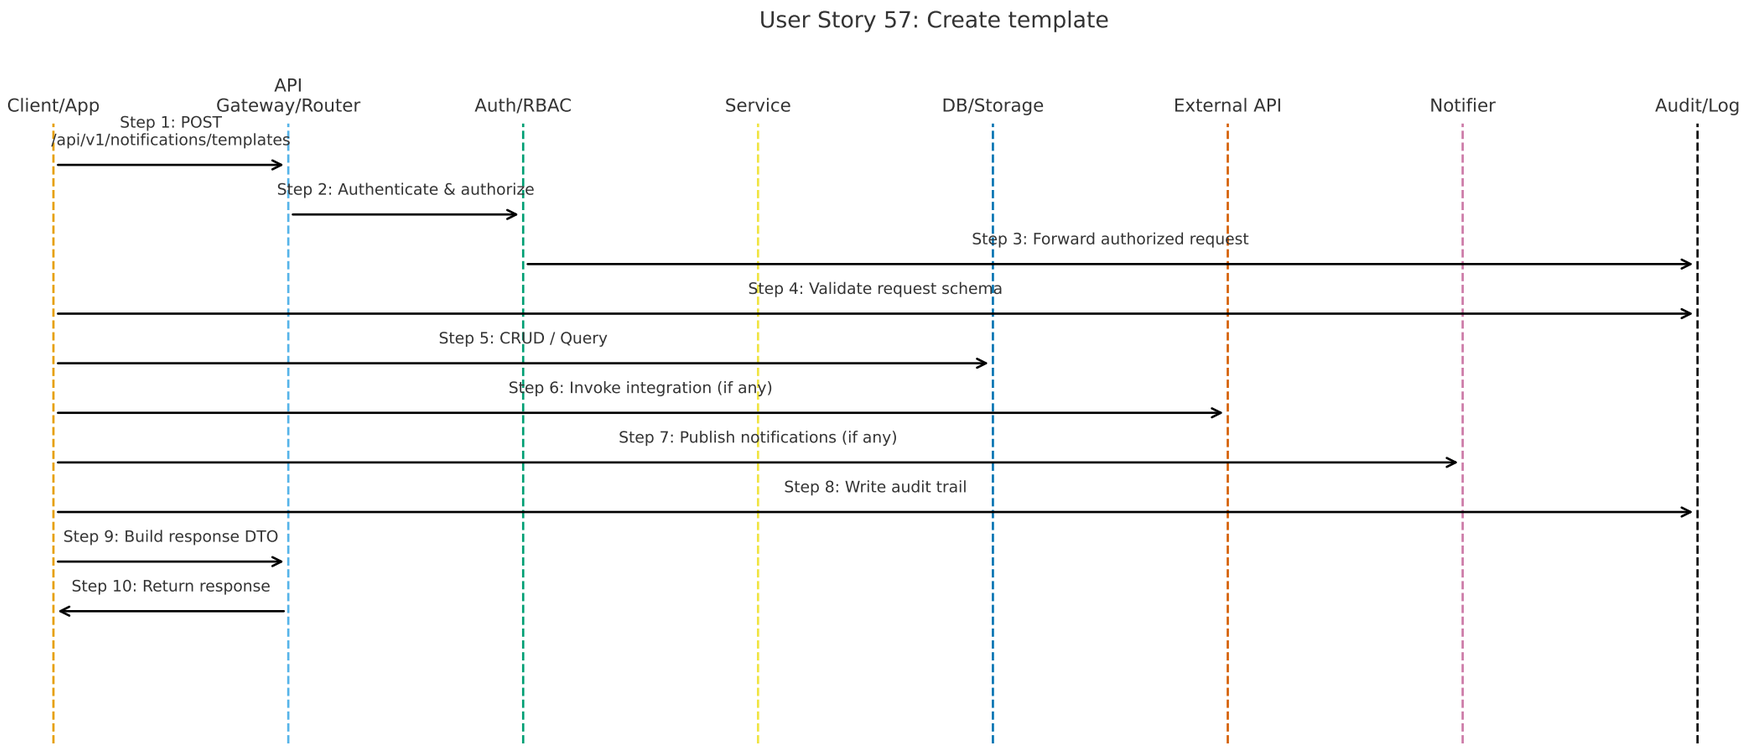
User Story 54: Chat toggle
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: PUT /api/v1/telemedicine/sessions/{sessionId}/settings
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



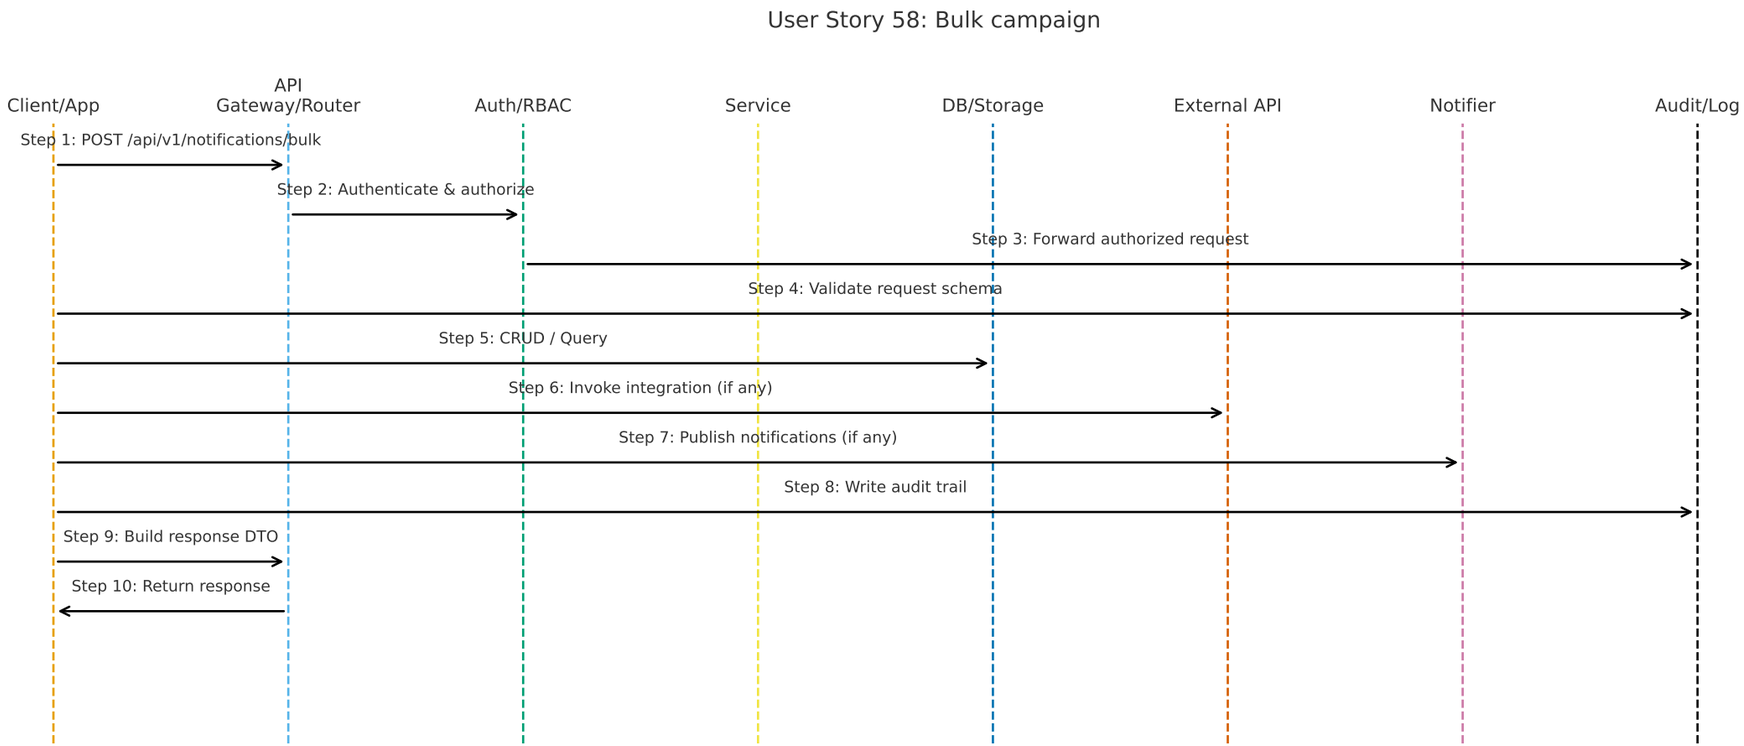
User Story 55: Generate new join link
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/telemedicine/sessions/{sessionId}/reissue-link
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



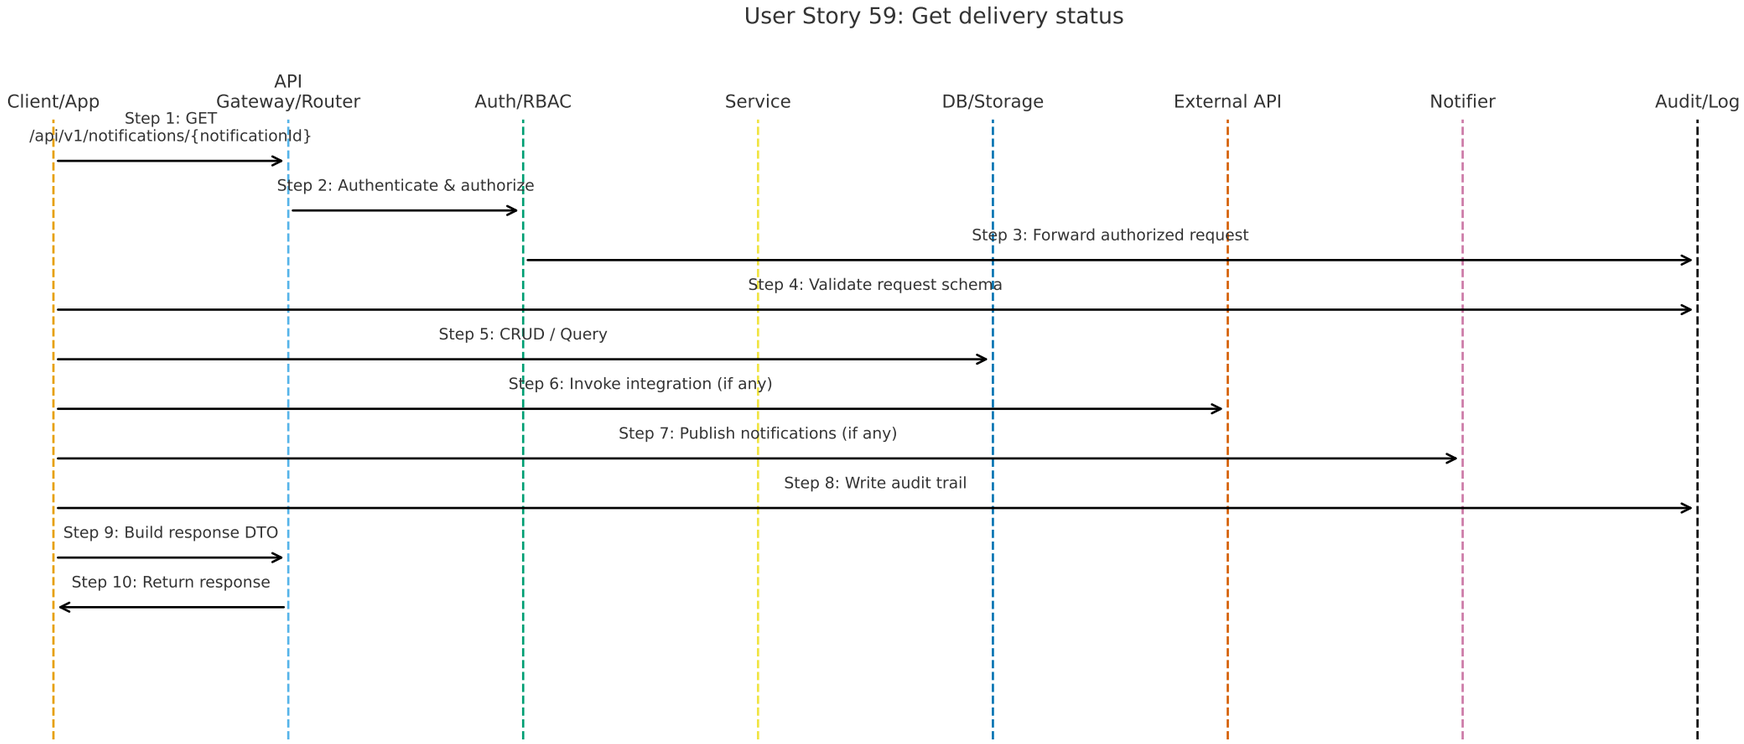
User Story 56: Send notification
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/notifications/send
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



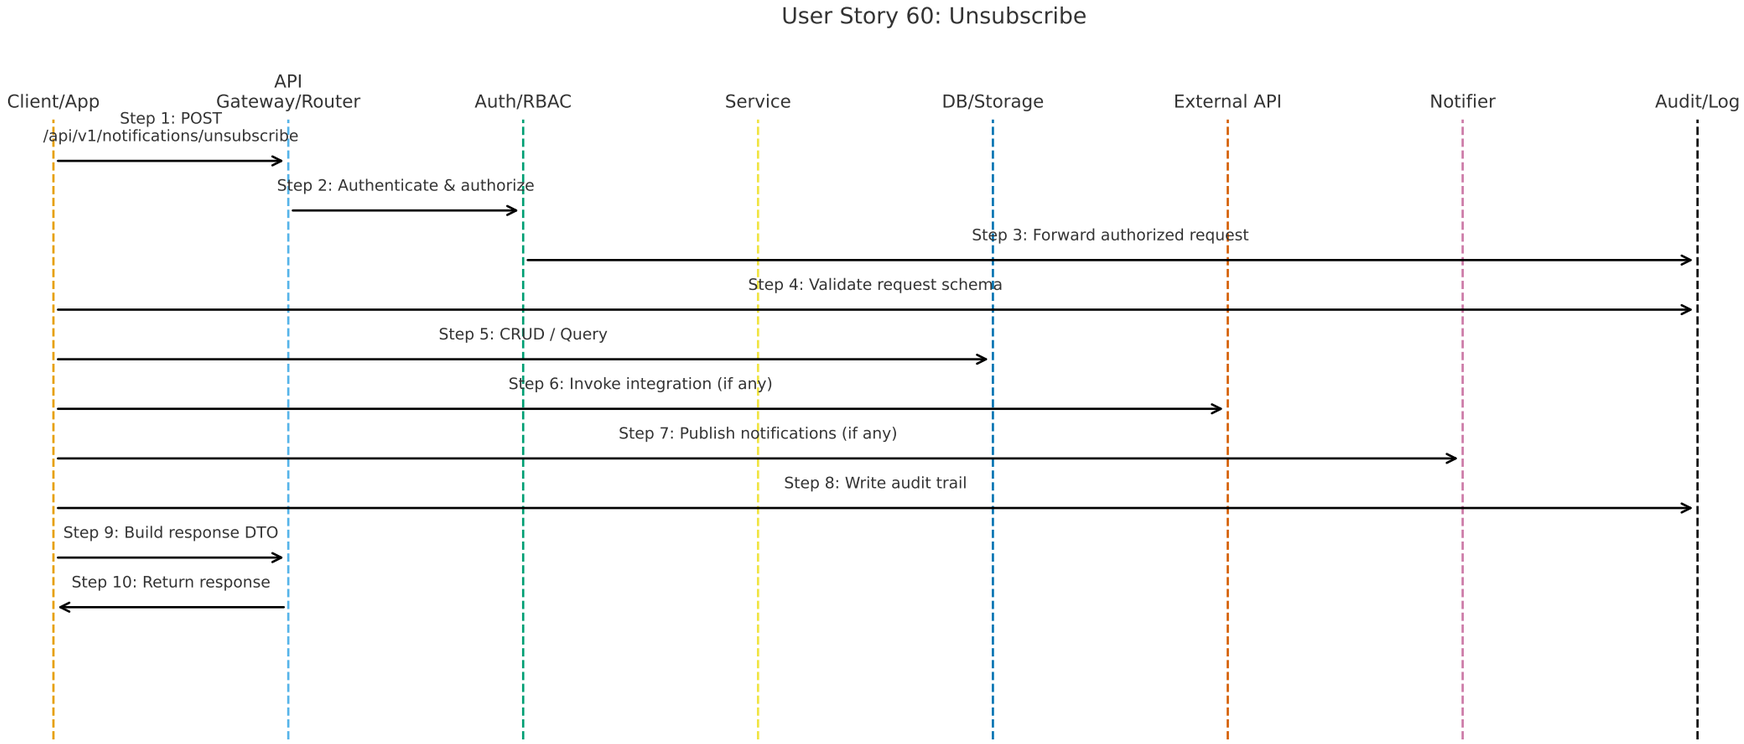
User Story 57: Create template
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/notifications/templates
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



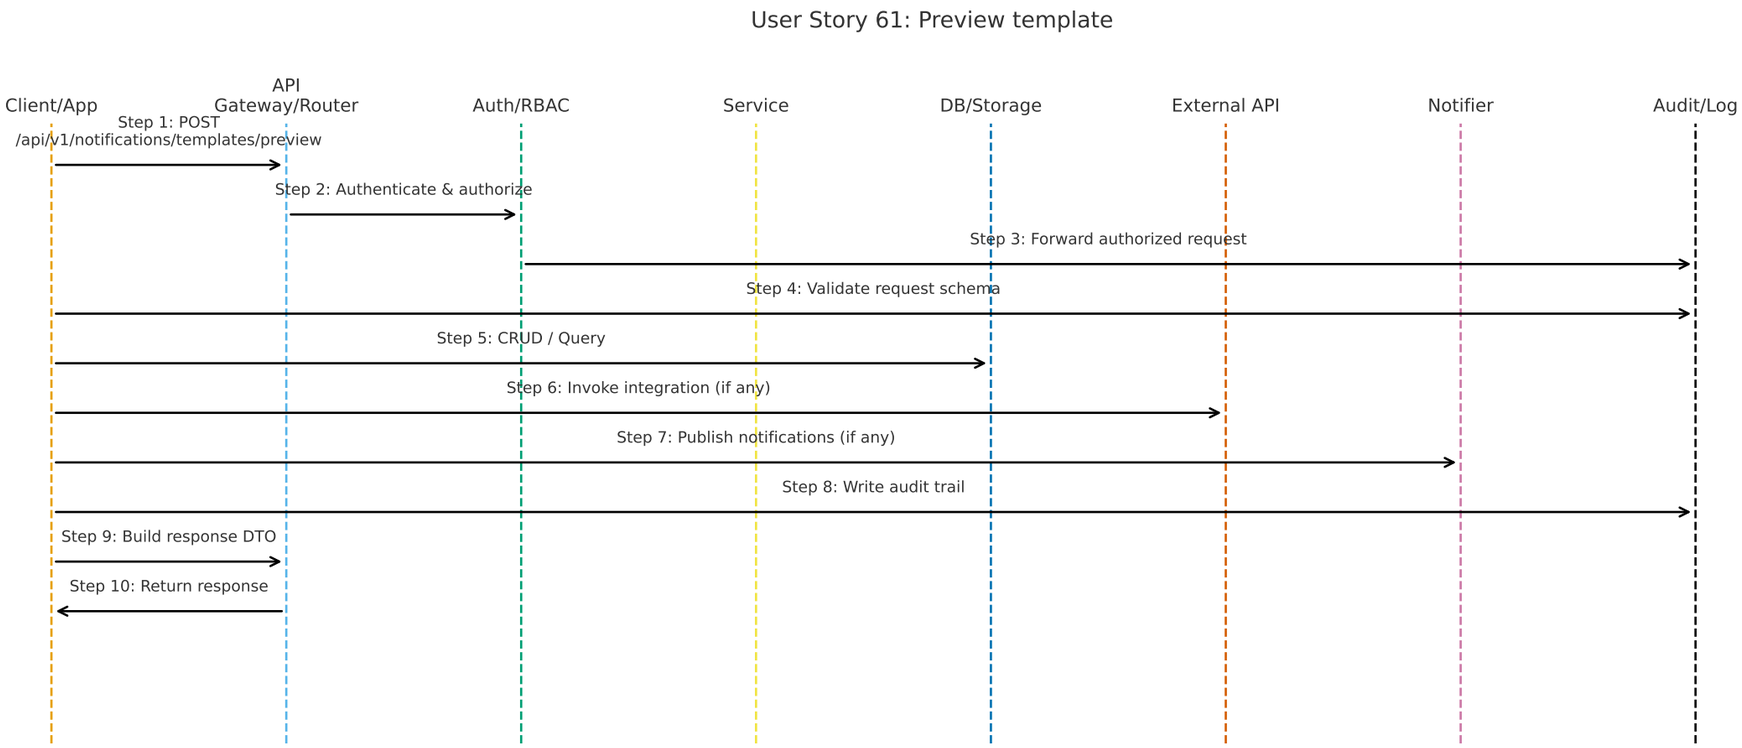
User Story 58: Bulk campaign
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/notifications/bulk
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



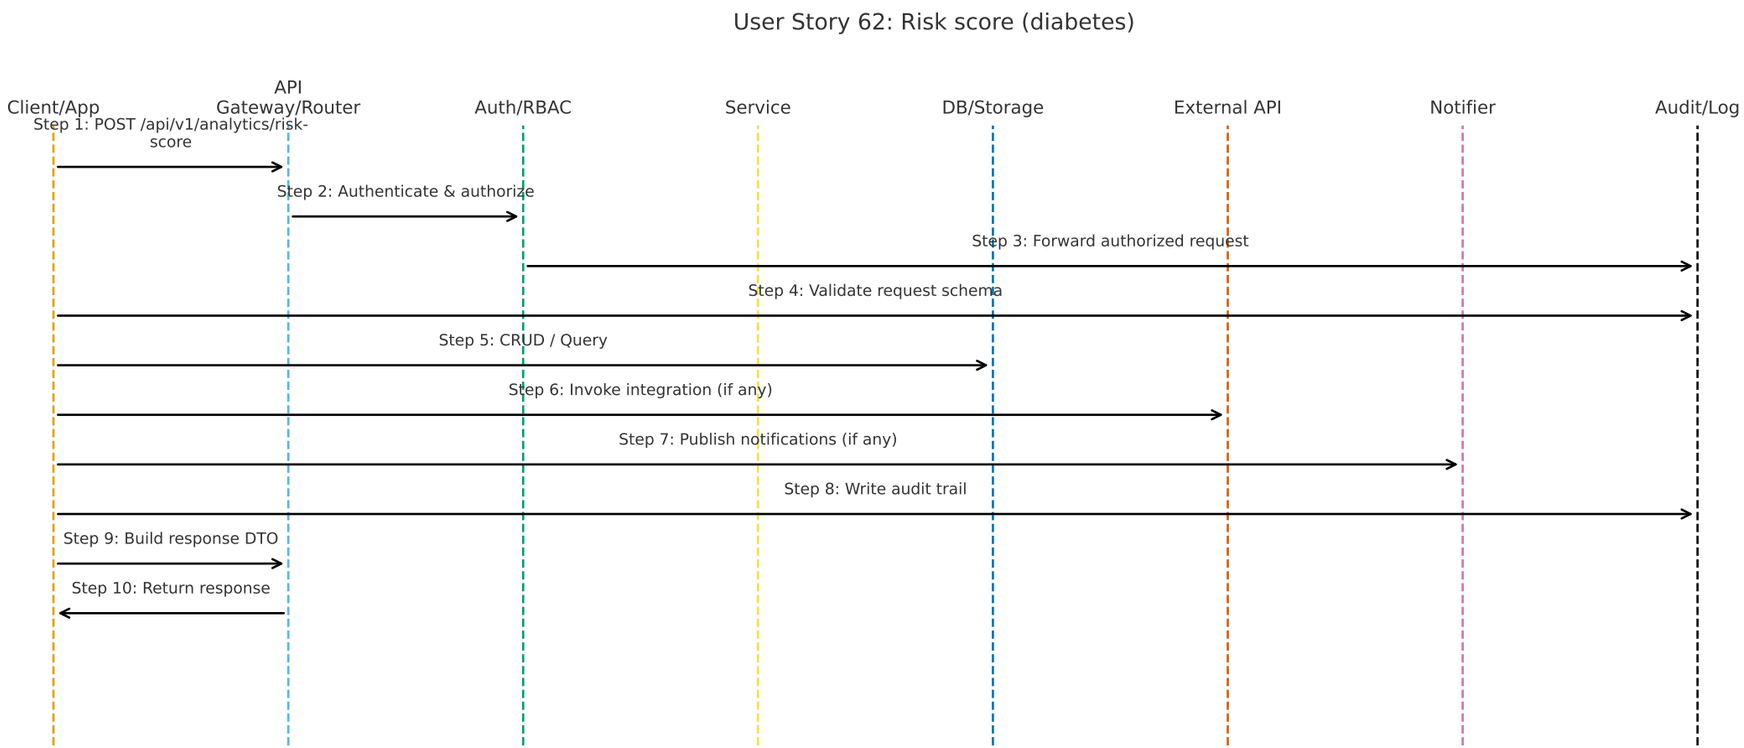
User Story 59: Get delivery status
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /api/v1/notifications/{notificationId}
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



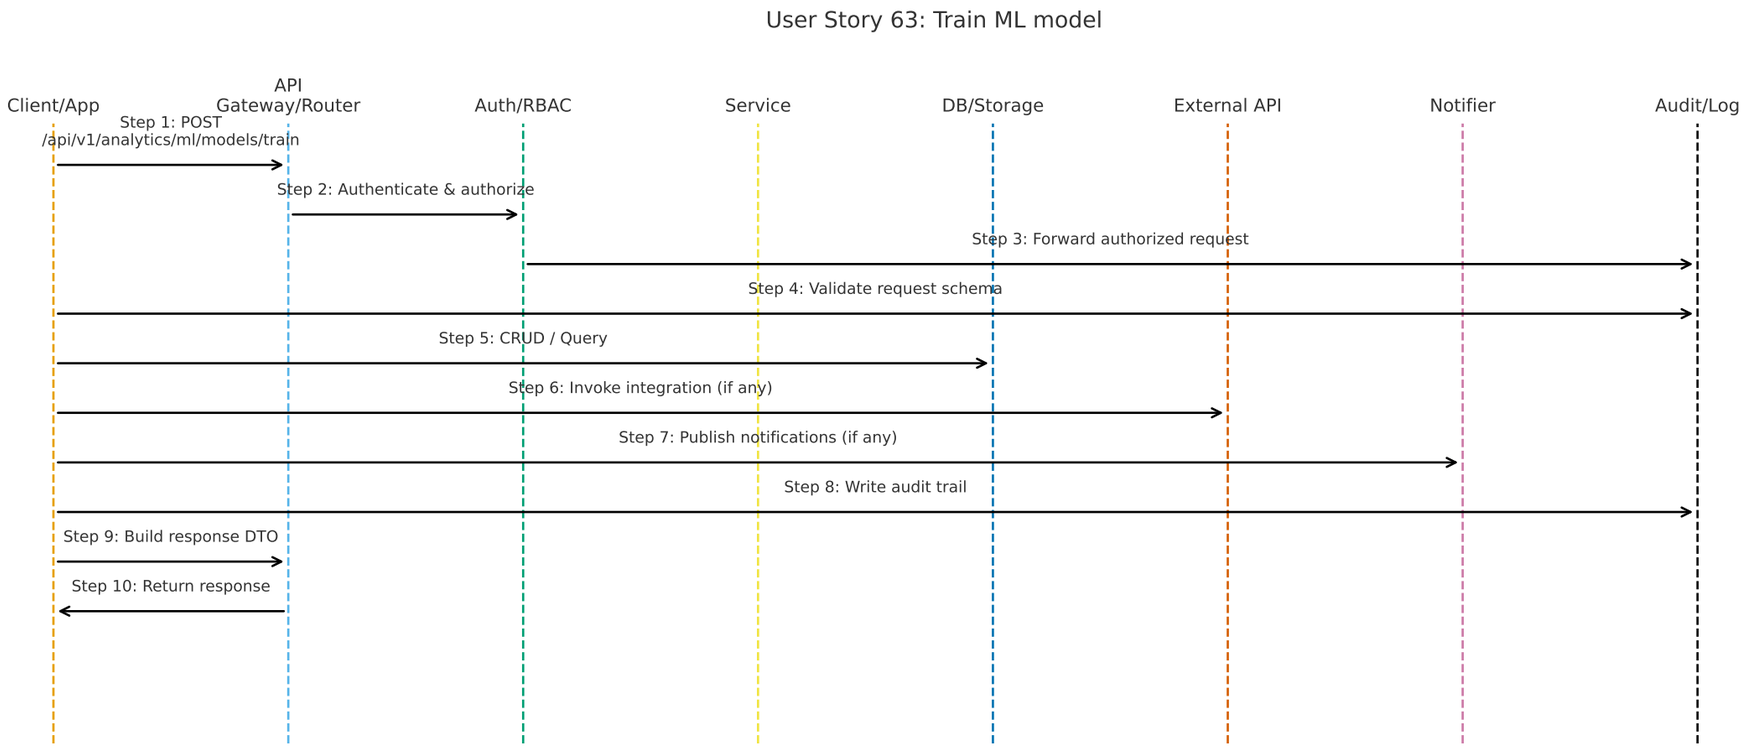
User Story 60: Unsubscribe
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/notifications/unsubscribe
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



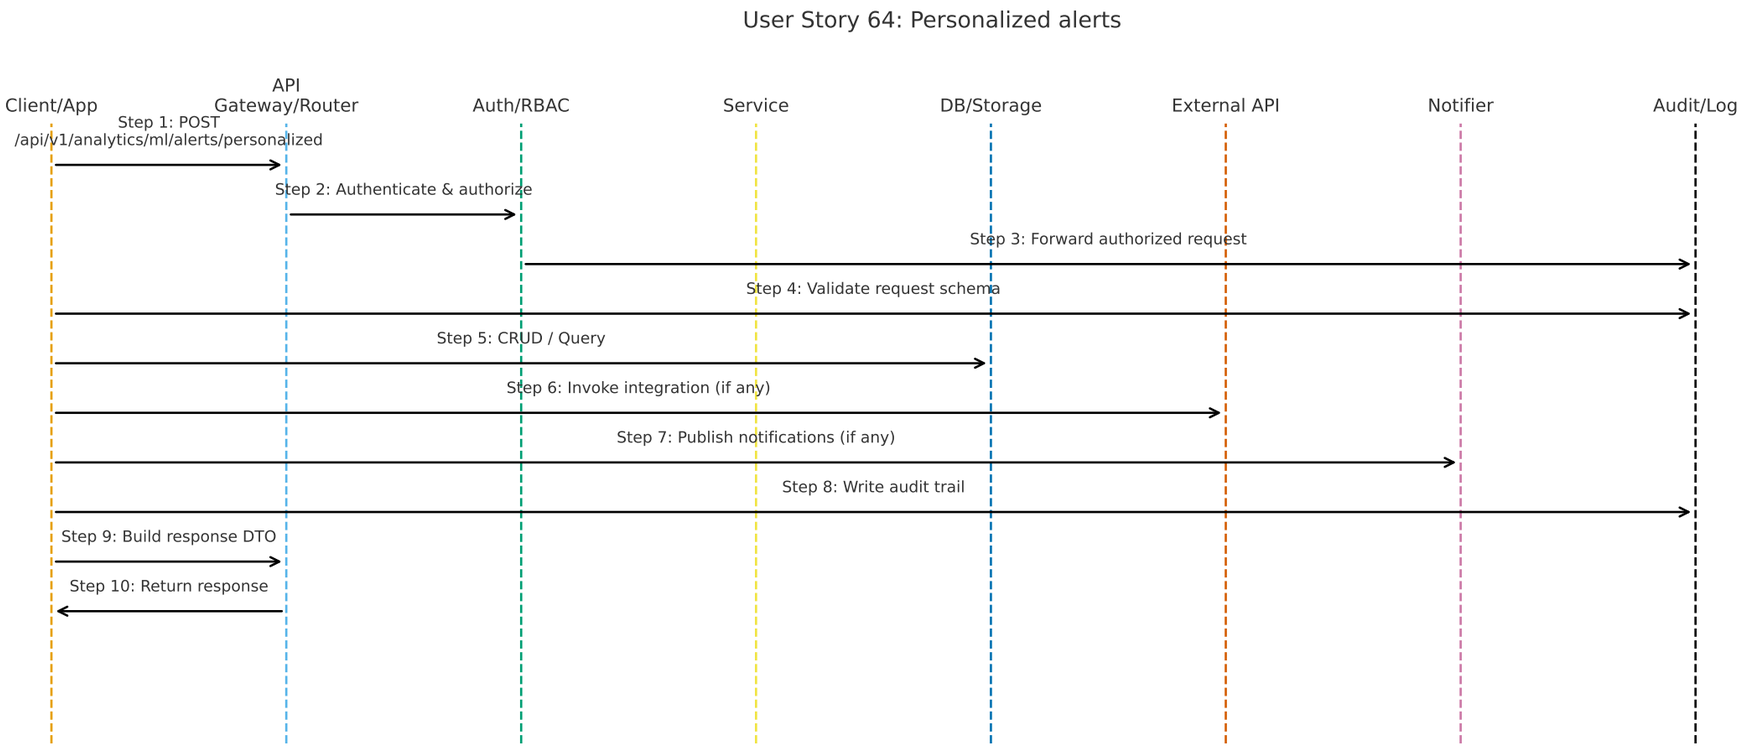
User Story 61: Preview template
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/notifications/templates/preview
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



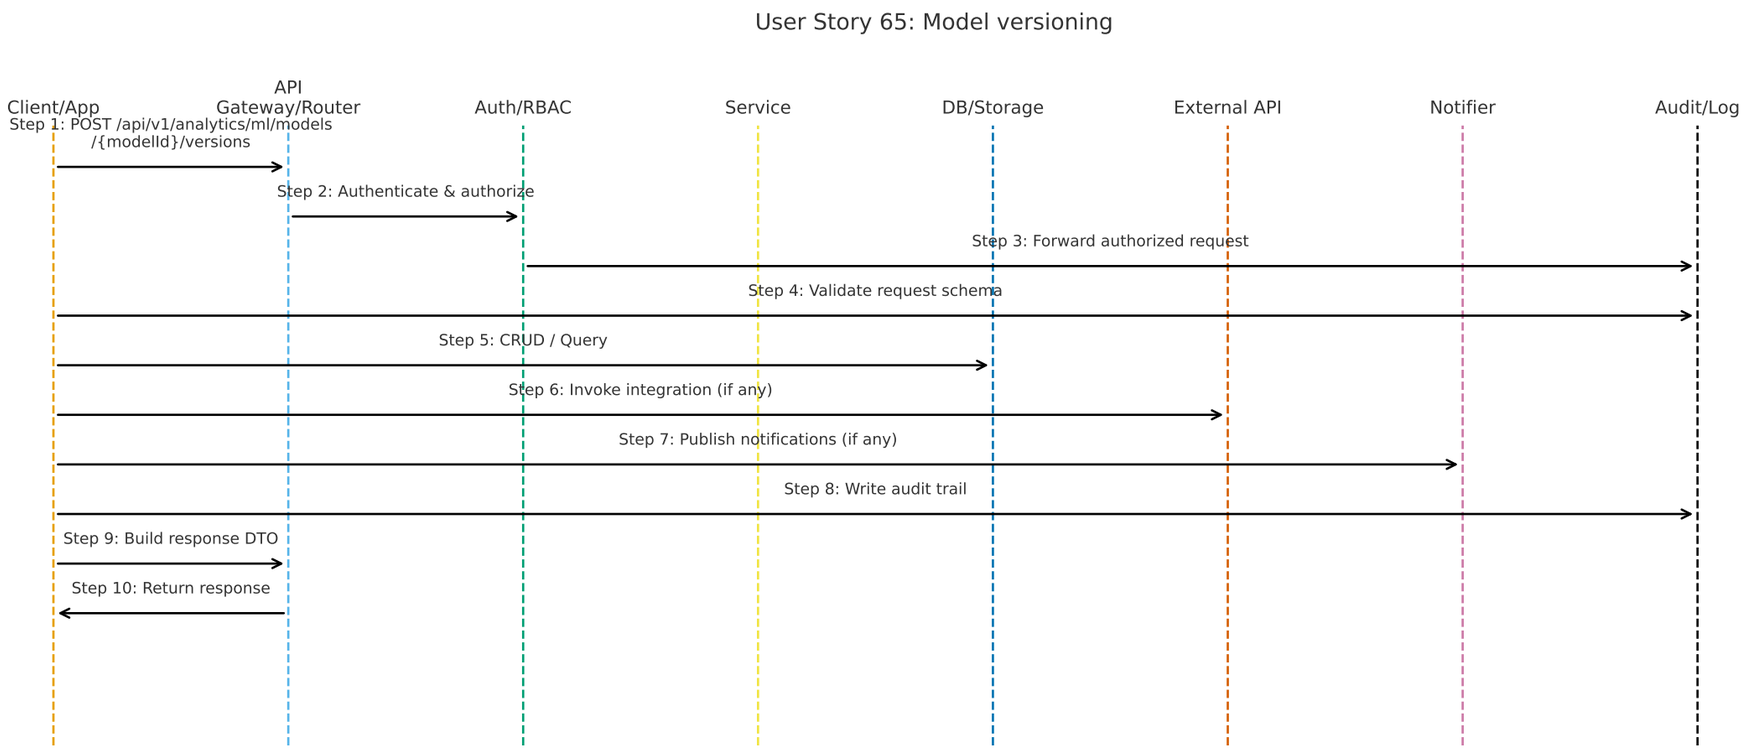
User Story 62: Risk score (diabetes)
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/analytics/risk-score
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



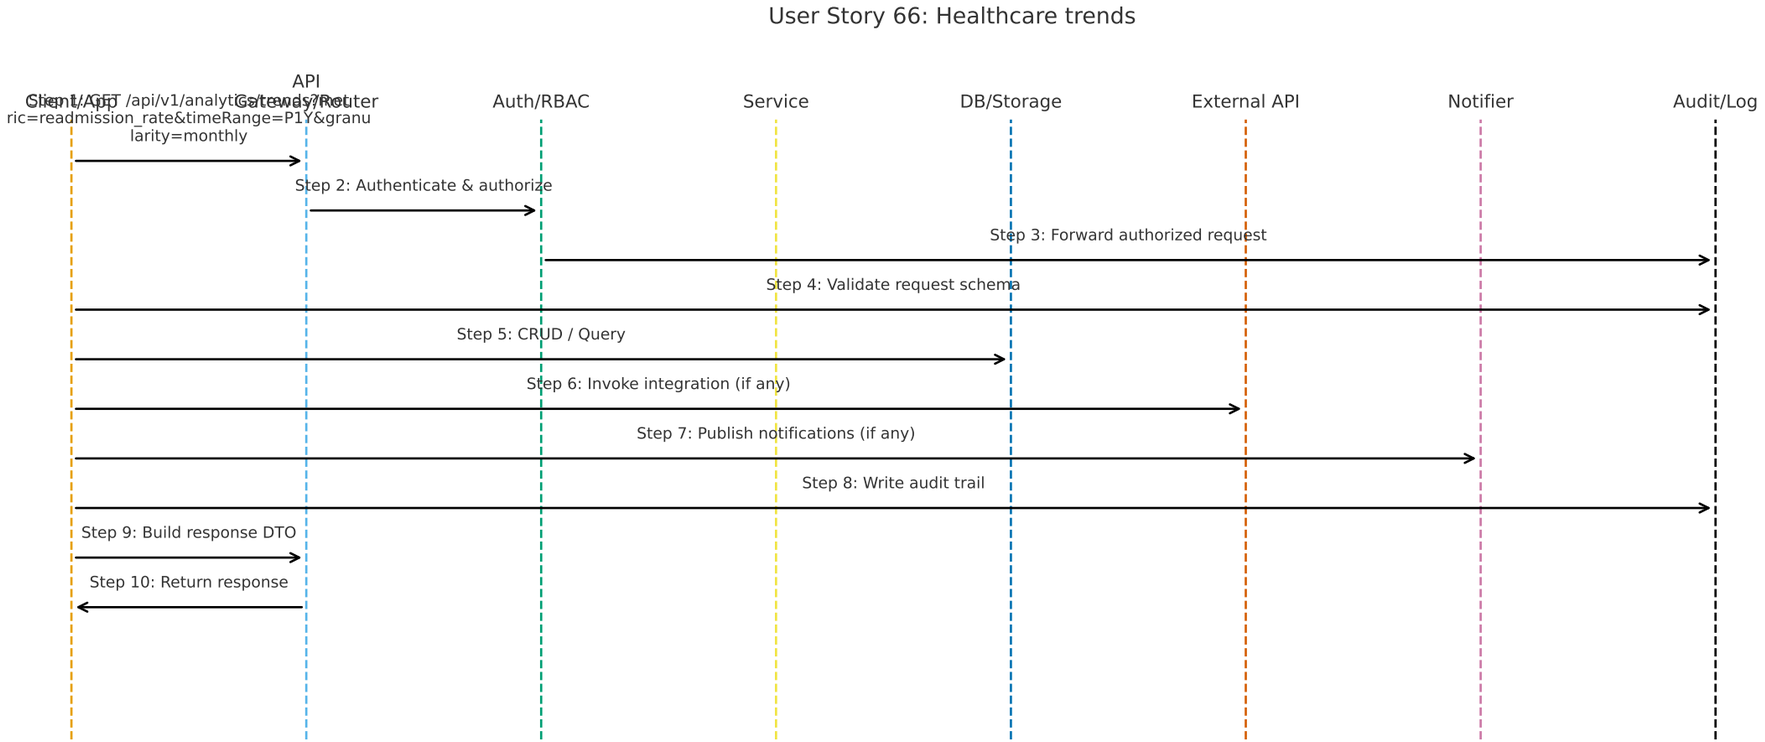
User Story 63: Train ML model
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/analytics/ml/models/train
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



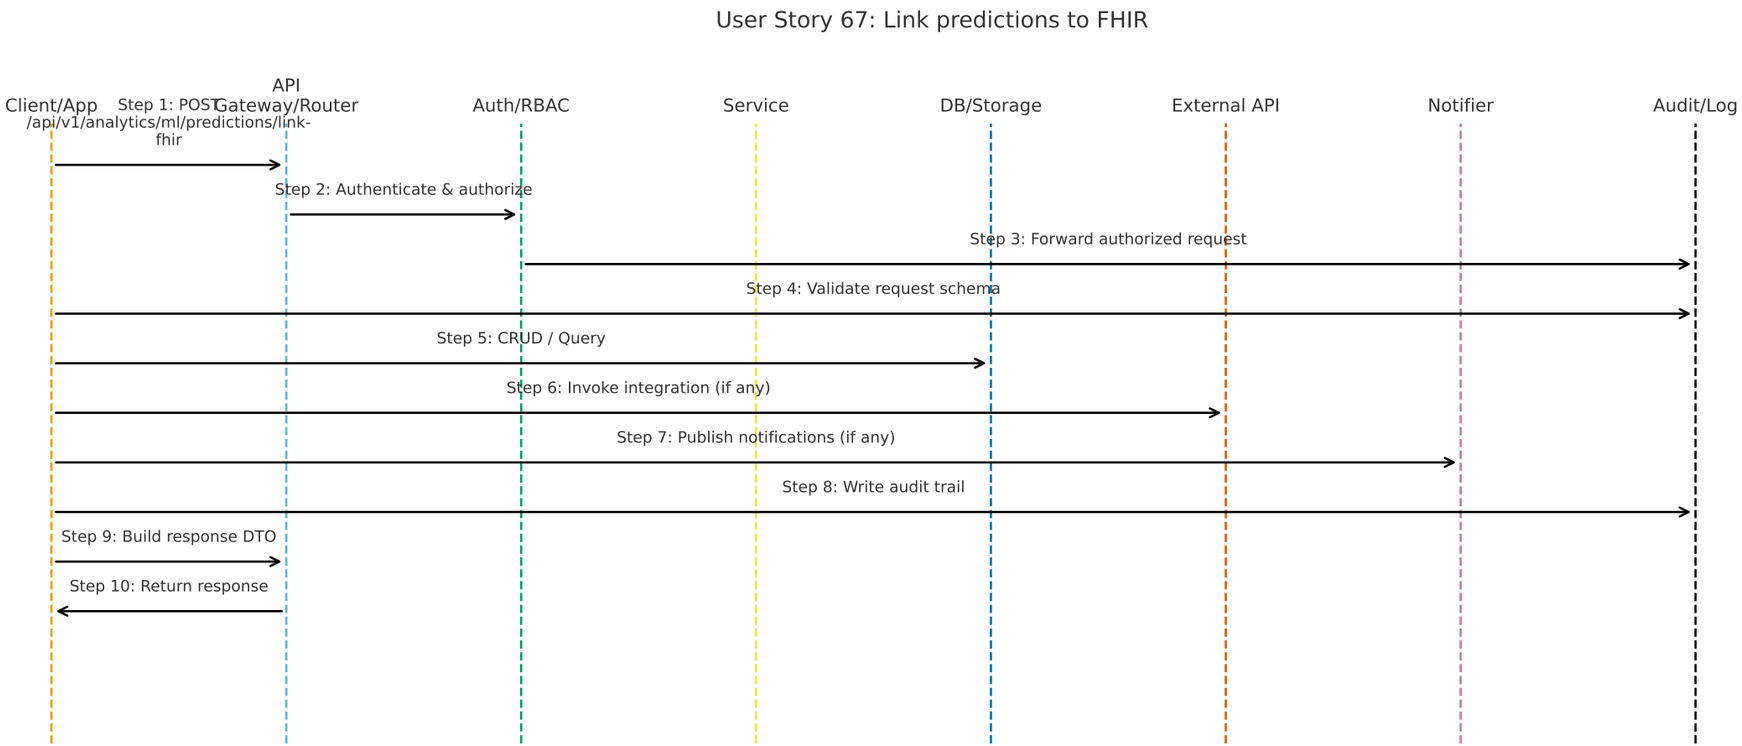
User Story 64: Personalized alerts
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/analytics/ml/alerts/personalized
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



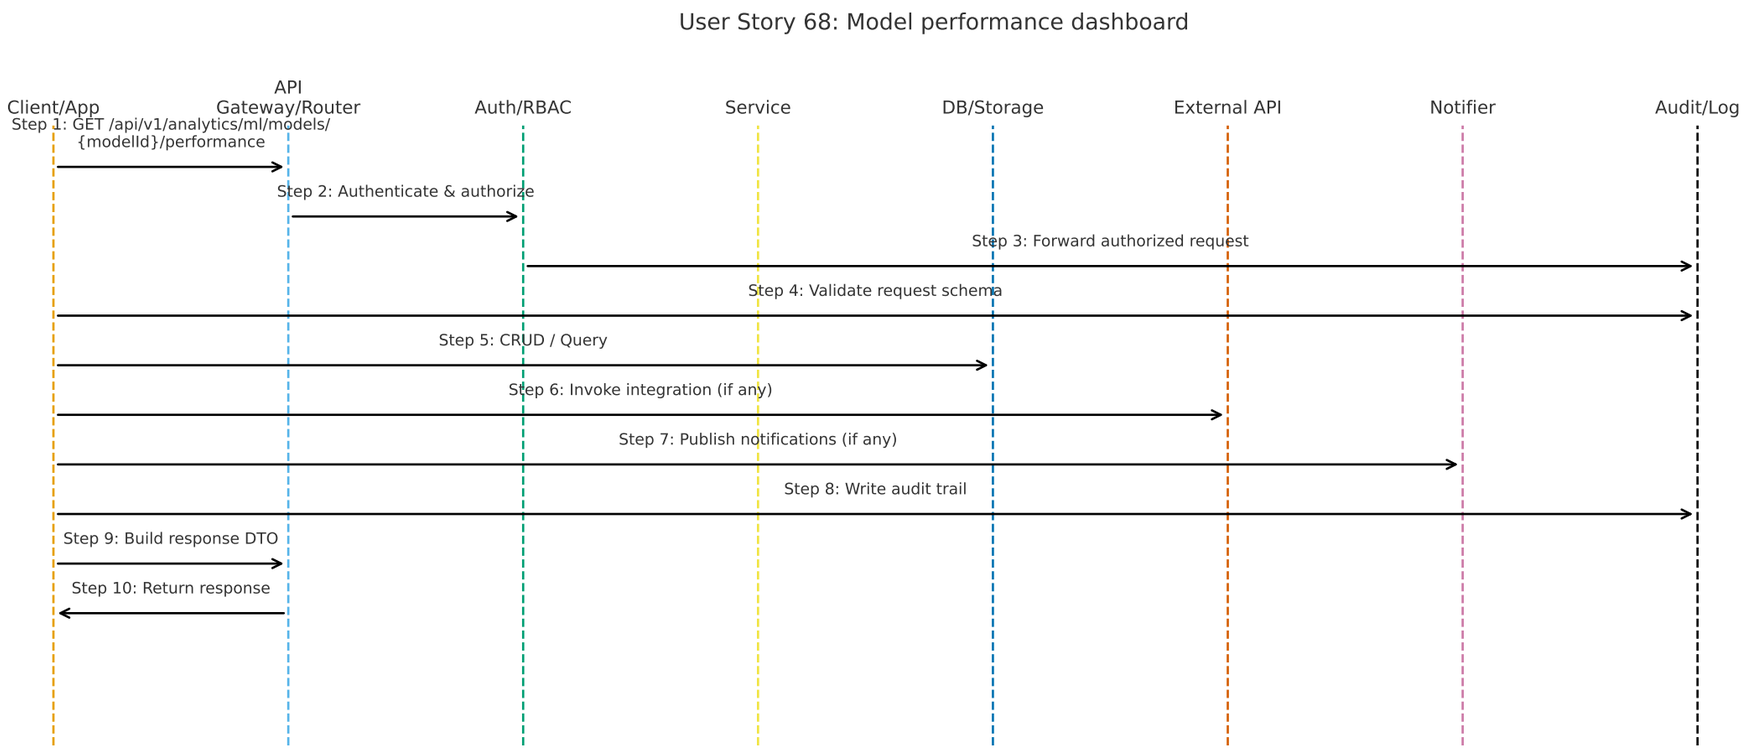
User Story 65: Model versioning
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/analytics/ml/models /{modelId}/versions
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



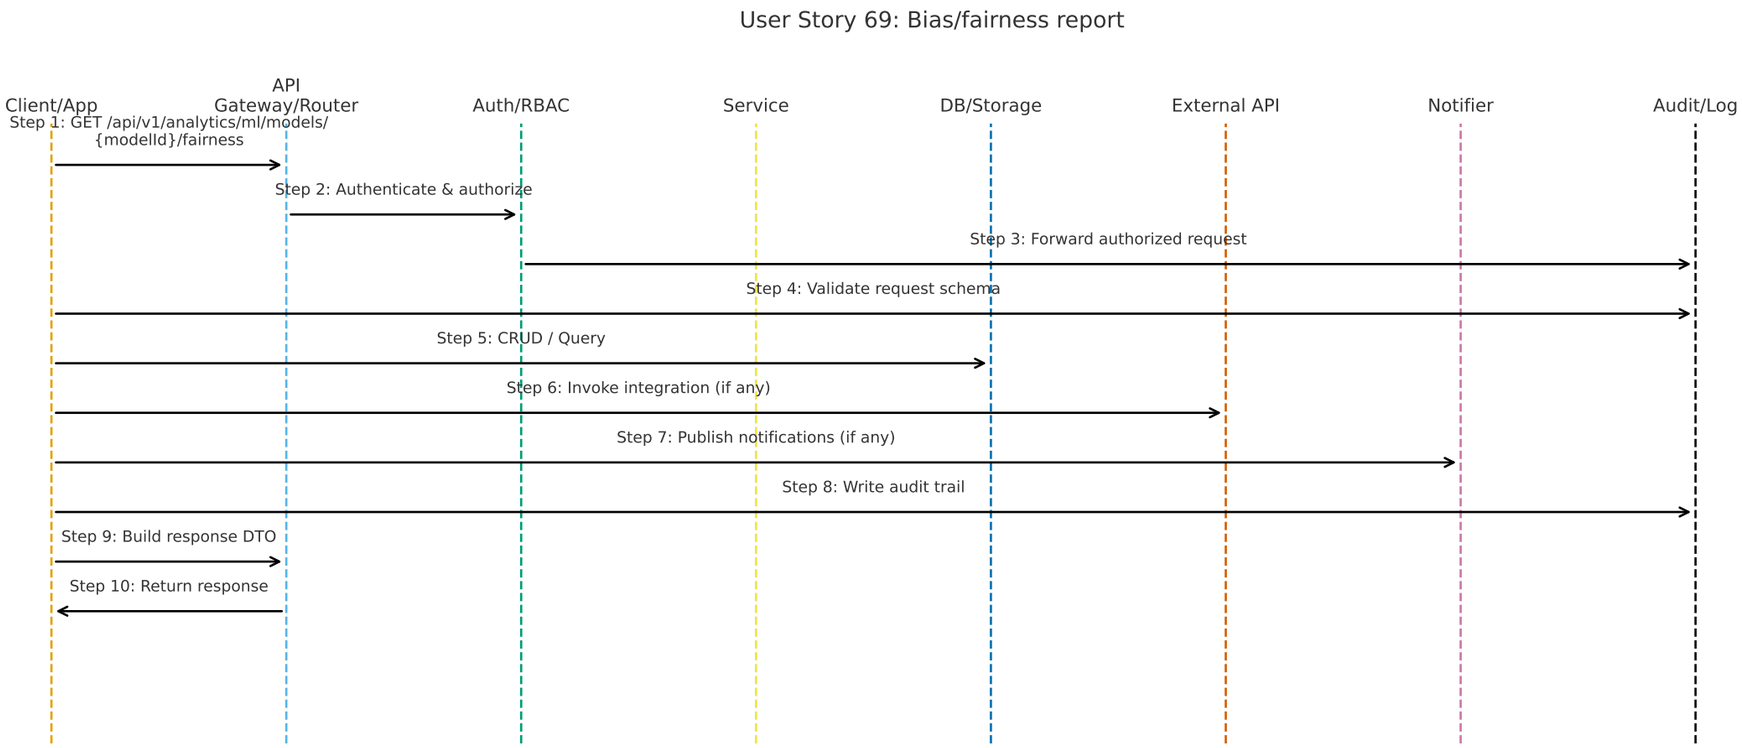
User Story 66: Healthcare trends
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /api/v1/analytics/trends?metric=readmission_rate&timeRange=P1Y&granularity=monthly
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



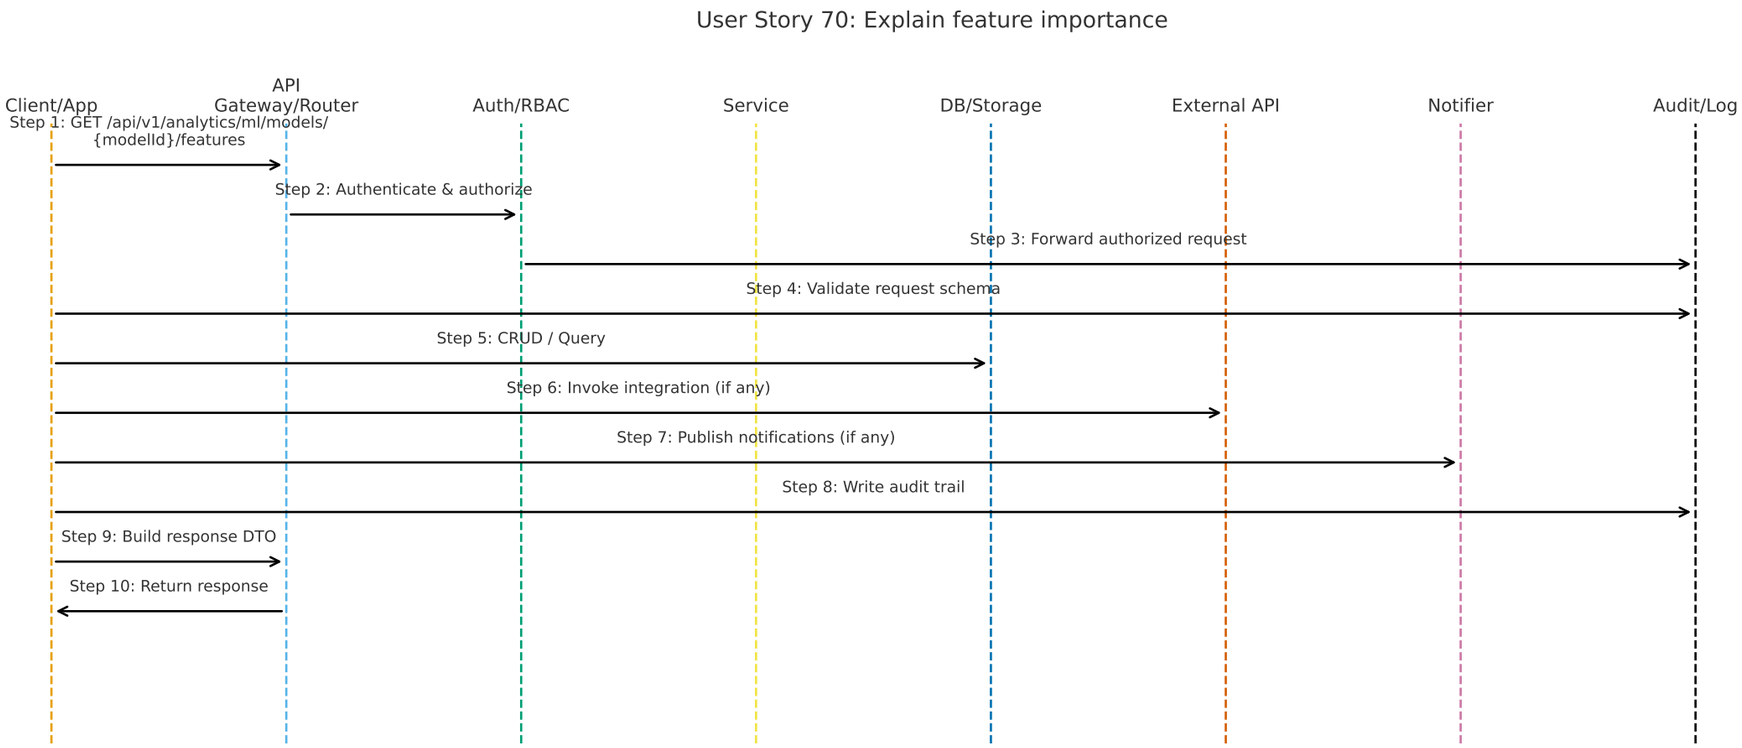
User Story 67: Link predictions to FHIR
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/analytics/ml/predictions/link-fhir
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



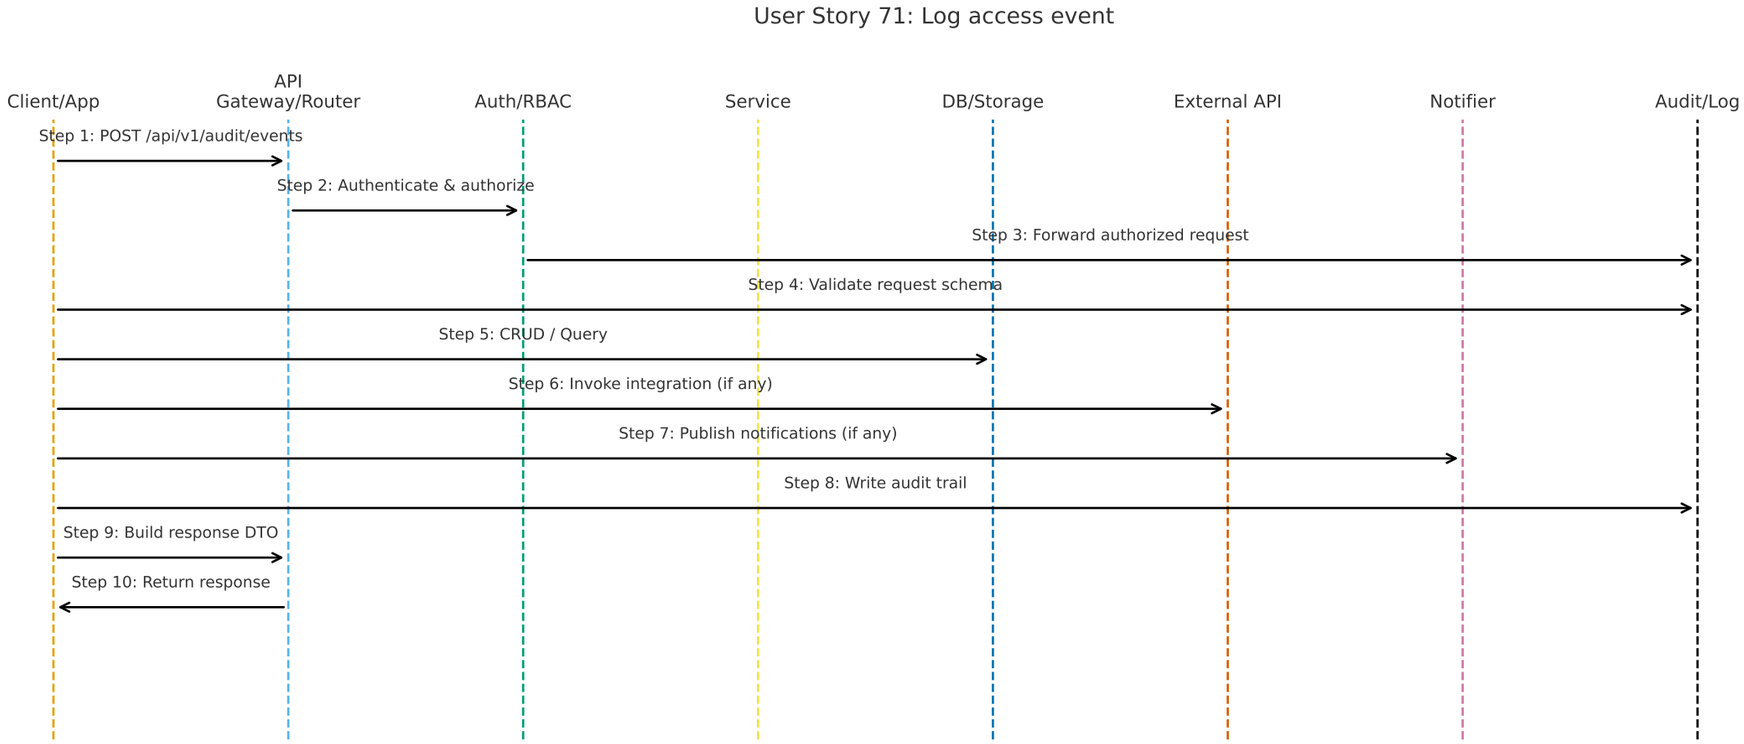
User Story 68: Model performance dashboard
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /api/v1/analytics/ml/models/{modelId}/performance
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



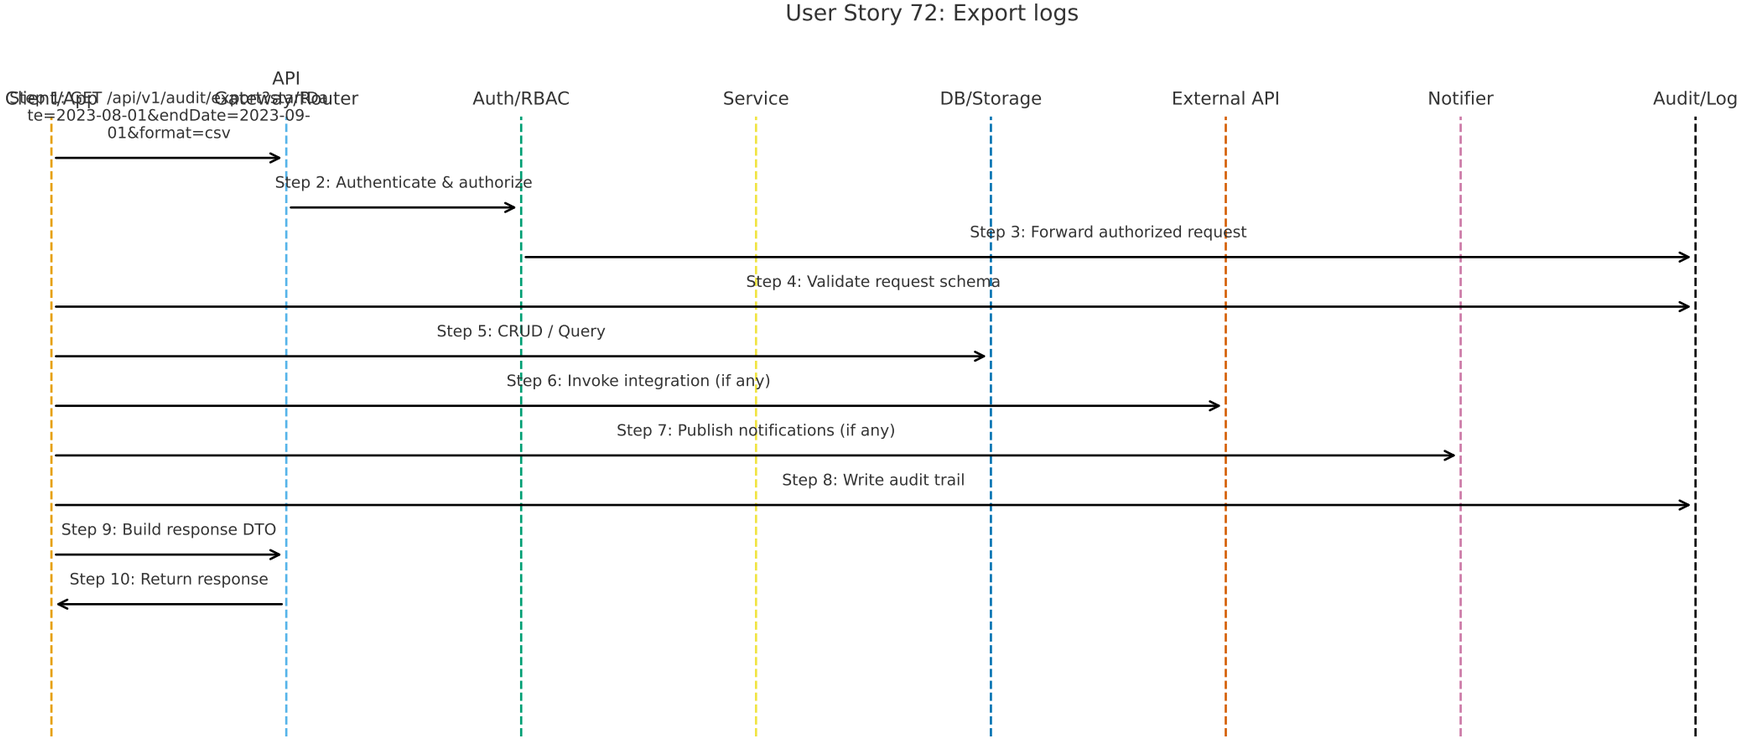
User Story 69: Bias/fairness report
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /api/v1/analytics/ml/models/ {modelId}/fairness
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



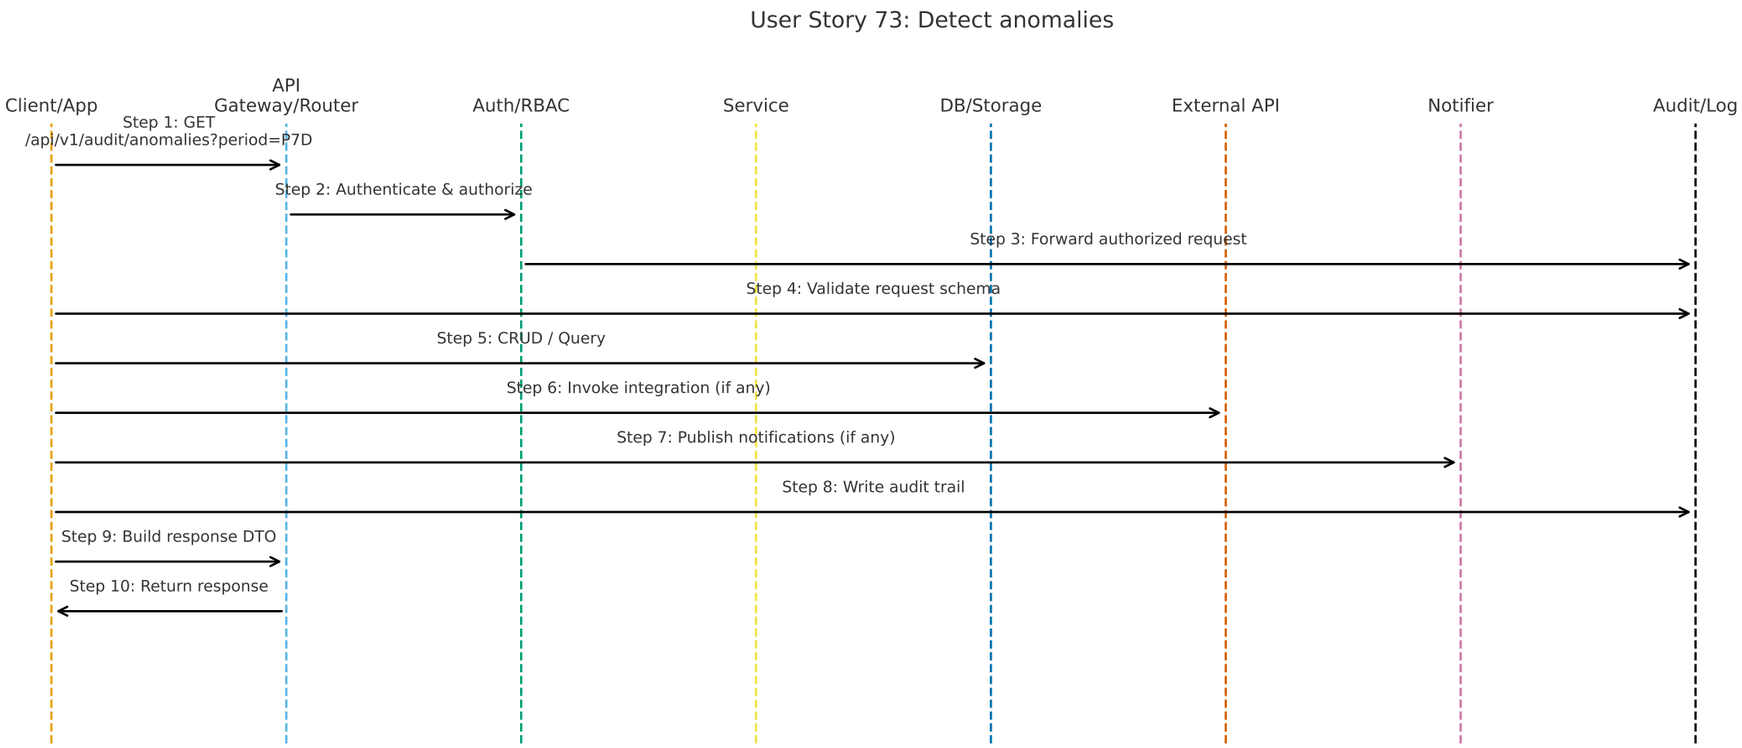
User Story 70: Explain feature importance
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /api/v1/analytics/ml/models/ {modelId}/features
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



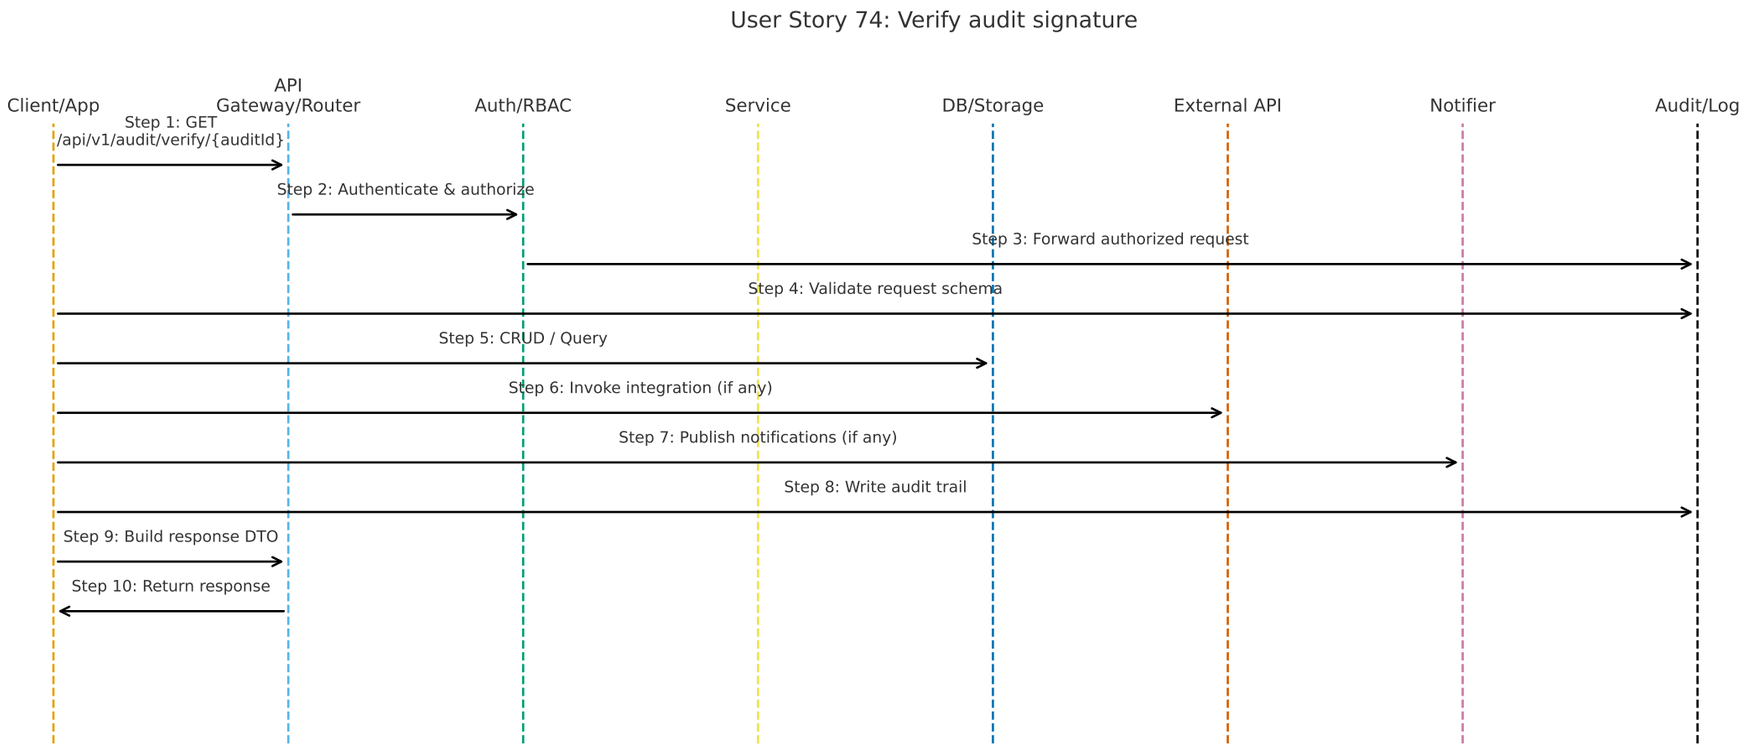
User Story 71: Log access event
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /api/v1/audit/events
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



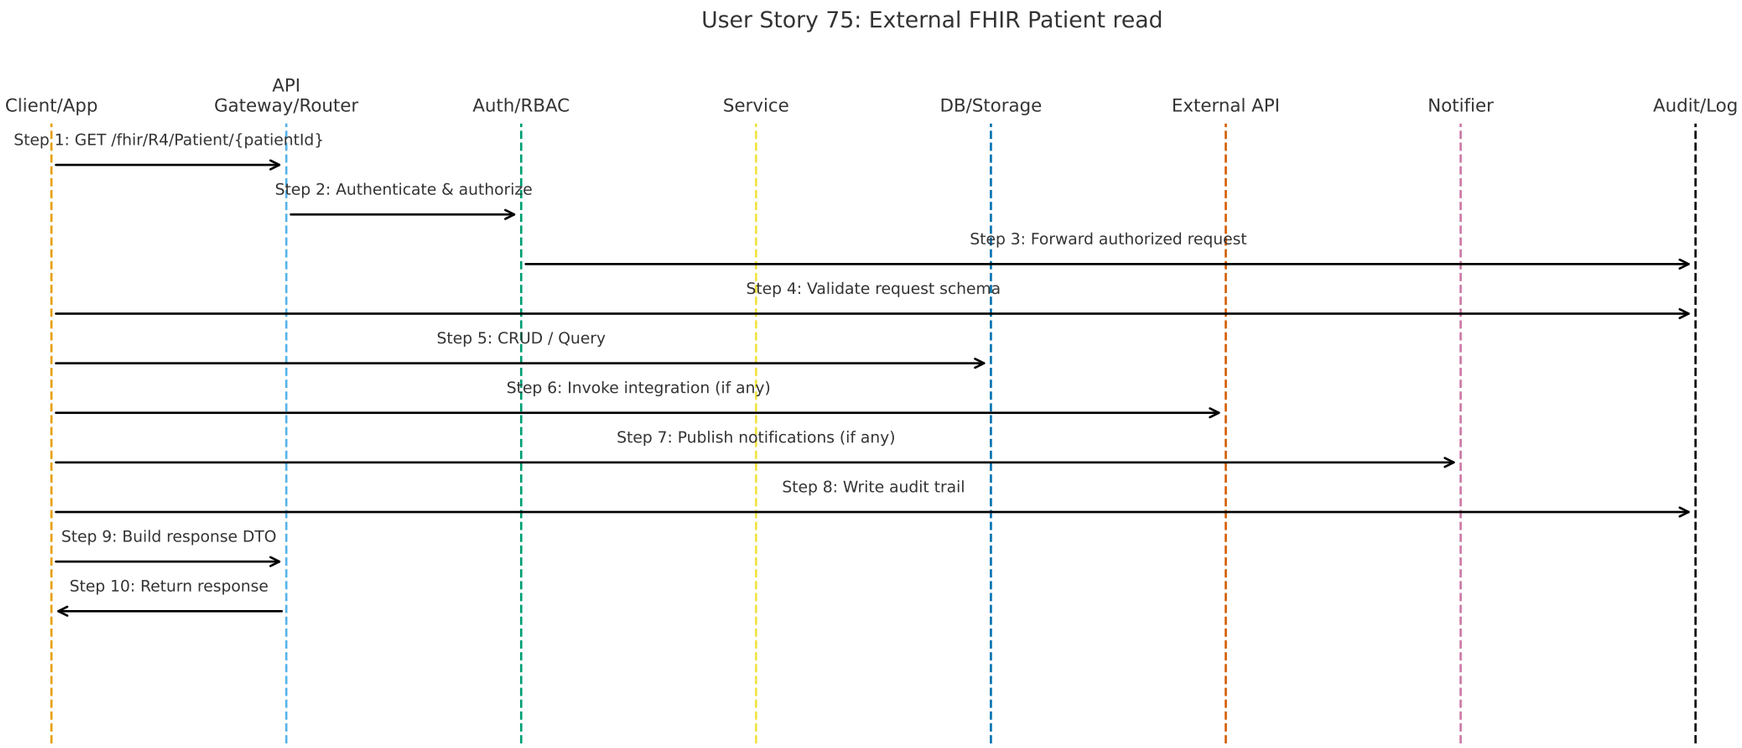
User Story 72: Export logs
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /api/v1/audit/export?startDate=2023-08-01&endDate=2023-09-01&format=csv
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



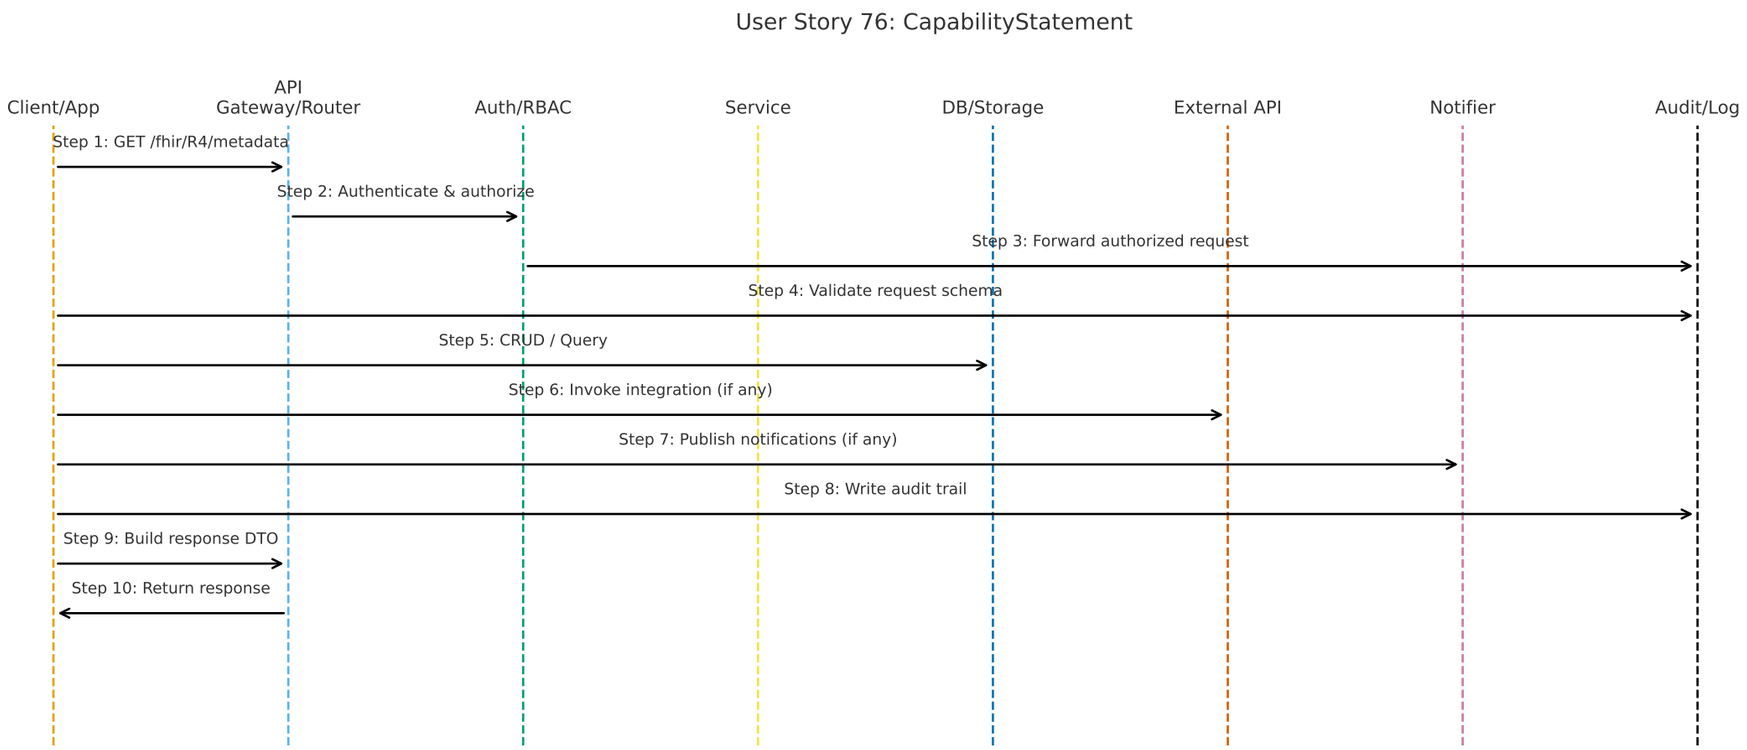
User Story 73: Detect anomalies
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /api/v1/audit/anomalies?period=P7D
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



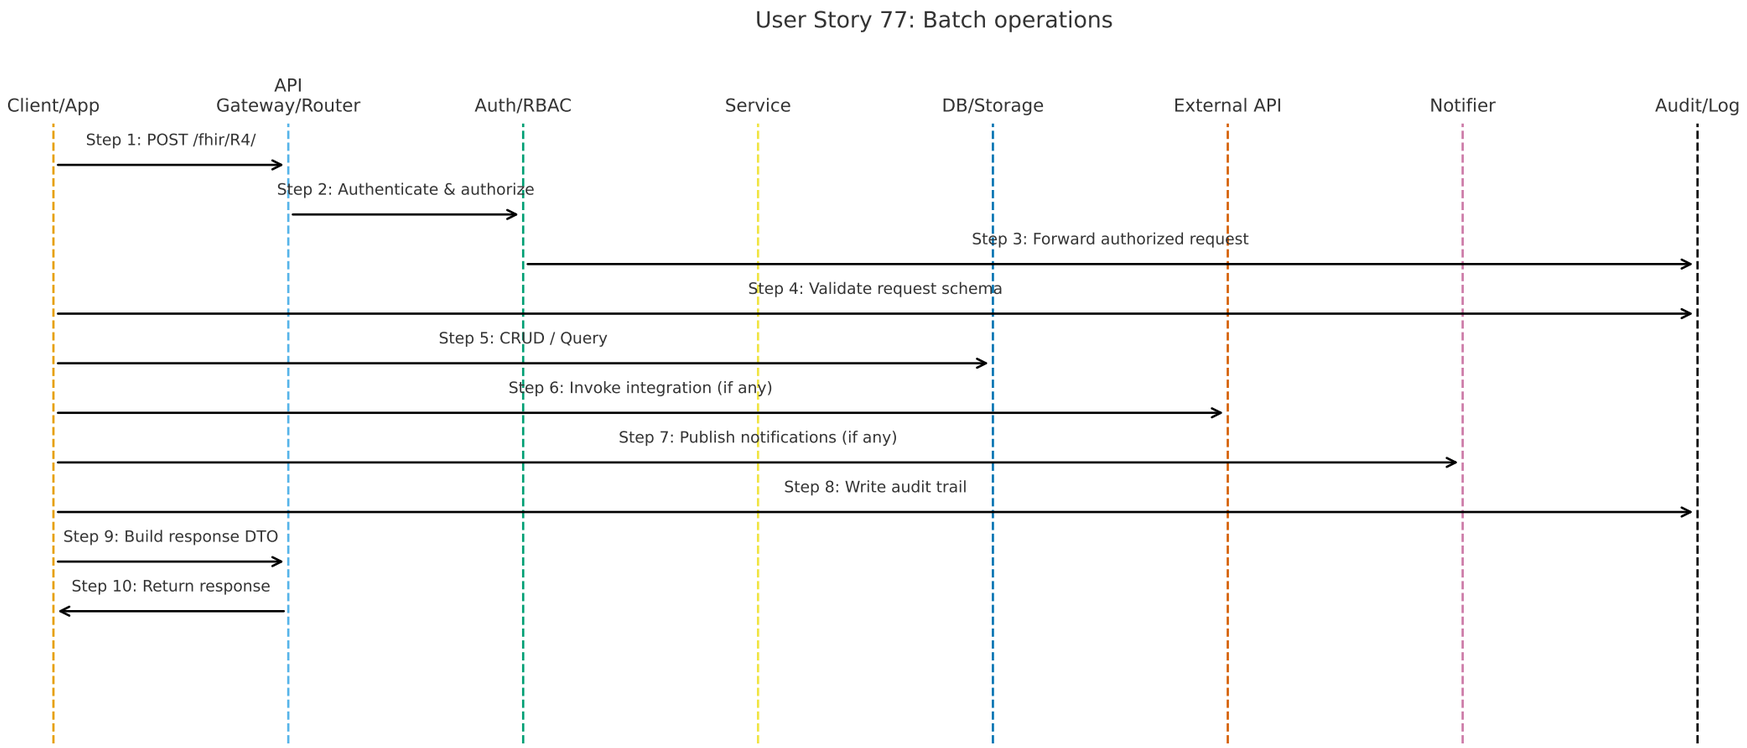
User Story 74: Verify audit signature
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /api/v1/audit/verify/{auditId}
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



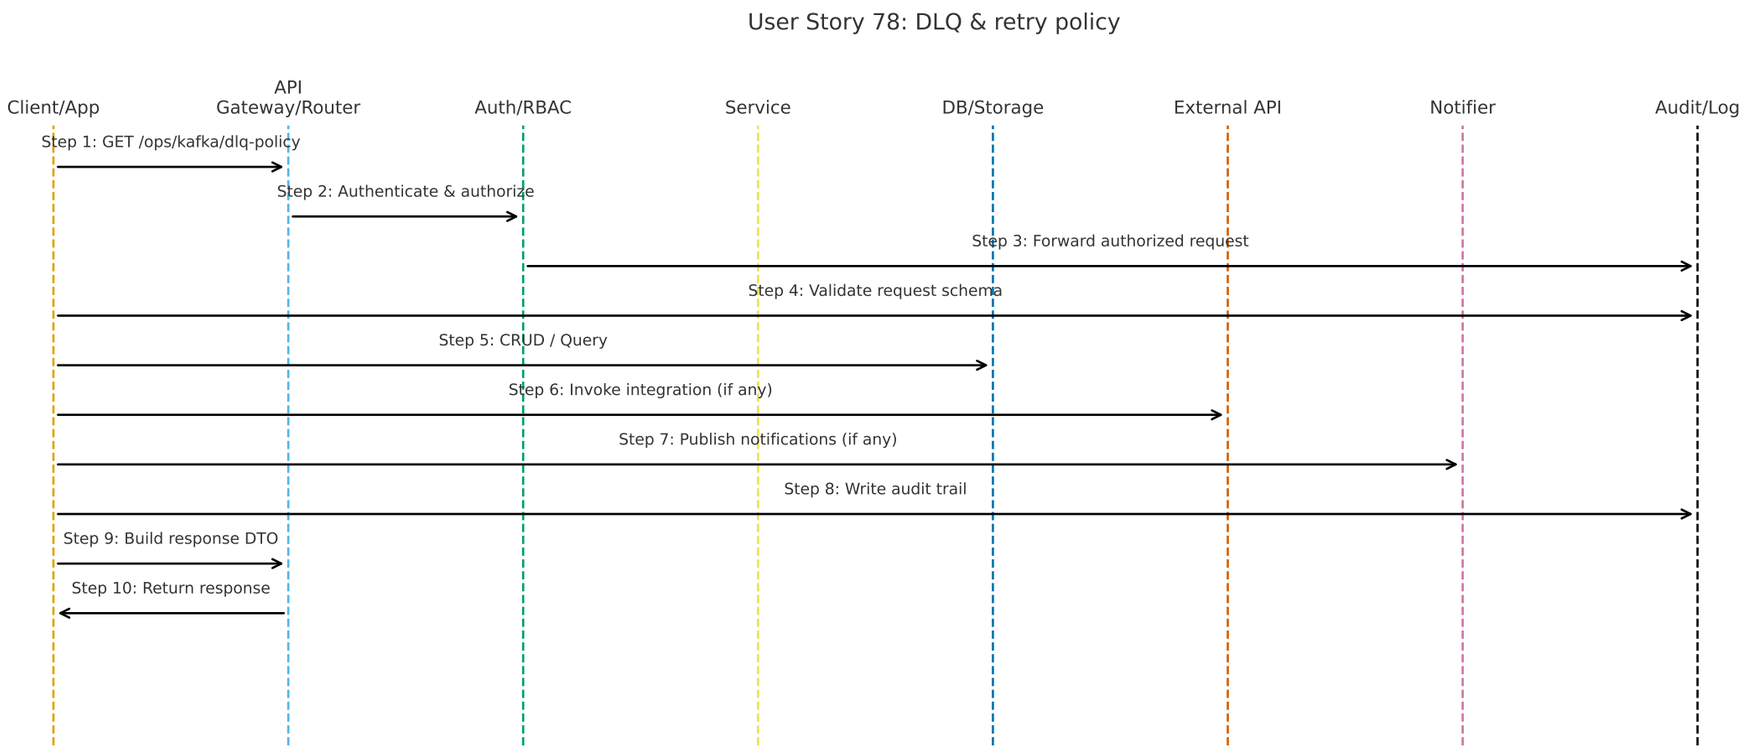
User Story 75: External FHIR Patient read
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /fhir/R4/Patient/{patientId}
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



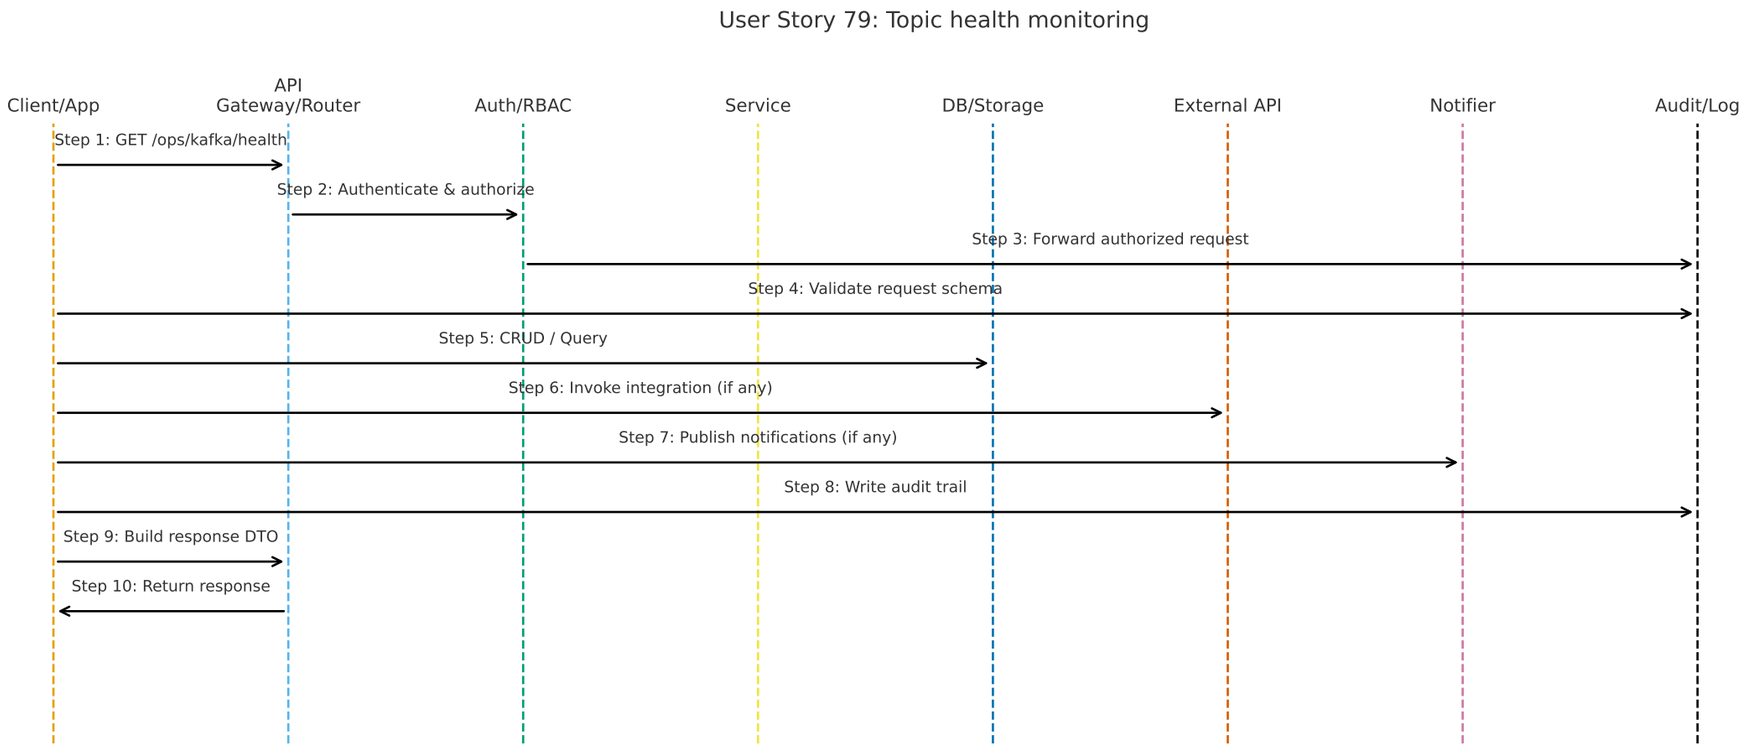
User Story 76: CapabilityStatement
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /fhir/R4/metadata
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



User Story 77: Batch operations
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: POST /fhir/R4/
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



User Story 78: DLQ & retry policy
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /ops/kafka/dlq-policy
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response



User Story 79: Topic health monitoring
Client/App
API Gateway/Router
Auth/RBAC
Service
DB/Storage
External API
Notifier
Audit/Log
Step 1: GET /ops/kafka/health
Step 2: Authenticate & authorize
Step 3: Forward authorized request
Step 4: Validate request schema
Step 5: CRUD / Query
Step 6: Invoke integration (if any)
Step 7: Publish notifications (if any)
Step 8: Write audit trail
Step 9: Build response DTO
Step 10: Return response
